Entered at the postoffice at Cottage Grove, Oregon as second class mail matter.

SUBSCRIPTION RATES.

6 months.....\$1.00
1 year.....\$1.50
18 months.....\$2.00
If paid in advance.

Clubbing Rates.

The Bohemia Nugget one year with any one of the following publications one year for amount set opposite:
Pacific Monthly \$2.00
Weekly Oregonian (Portland) \$2.50
Weekly Journal (Portland) \$2.00
Daily Mining Record (Denver) \$3.50
Weekly Mining Record \$2.25

This paper is kept on file by THE AMERICAN MINING CONGRESS, Chamber of Commerce Building, Denver, Colo., where our readers will be welcome to the use of the leading papers from the various mining sections of the West, a scientific library and mineral exhibit.

THIS PAPER is kept on file at E. C. Drake's Advertising Agency, 34 and 35 Merchants Exchange, San Francisco, California, where contracts for advertising can be made for it.

WEDNESDAY, OCTOBER 18, 1905

UTAH RESOURCES

THE Mineral resources of the Uintah reservation are as yet unknown, and no locations of mineral can be made until 60 days from the opening or until October 28. But on the forest reserve, recently set aside, prospectors have been abroad for three weeks and are finding some fine specimens of ore, especially copper. In one assay of \$65 to the ton silver and lead predominated. Gold values seem to run low so far as definite information has been obtained. Considerable of gold rock has been shown, but whether from the reservation or from districts beyond is the query, for there are irresponsible people here, both of the Utes and Whites. As prospecting has but begun it is too soon to form an intelligent opinion of the kinds and extent of the minerals on the forest reserve. Down in the region of the agricultural lands more definite information has been obtained of the various deposits through the mining companies having concessions on the reservation for several years. They are operating gilsonite and elaterite mines and have located numerous claims which are shown on the government maps. A copper claim of 640 acres, and assaying \$85 to the ton in copper, silver and lead, has located near the eastern boundary of the reservation—a few miles from Green river—and 75 to 100 miles from the finds on the forest reserve. This vein is 14 feet thick and unknown in its extent. Near the southern boundary of the reservation and outside of it is the Parietta gilsonite mine, are many mines, that have been worked for several years; and east of Green river on the old Uncompahgre reservation are vast deposits belonging to the St. Louis Gilsonite company; the product being shipped over the Uintah railway to the main line of the Rio Grande, thence to eastern markets. In the vicinity of Colton, Utah, are large deposits of mineral wax known as ozocerite, and at Vernal is sand asphaltum with which the sidewalks there and at Fort Du Chesne are laid. In many localities a good article of bituminous coal has been discovered, and a mine on the reservation has furnished coal for the agency and the army post for years. During the present week a vein of coal has been found on the Myton townsite; not on the platted portion, but a little east in the bluff set aside for reservoir purposes. There is evidently enough already assured, to attract mining people when the mineral lands shall be opened to the public. And the fact that these various deposits are in close proximity to and even under the agricultural lands has induced many people to file homesteads, hoping that under the surface something good would be found after patent for the land had been issued. Utah can challenge comparison with any other state in the union in mineral resources; and now, this new empire, until so recently closed to the public, can be counted on for adding immensely to the state's output.—World.

Queen of Bronze.

The Queen of Bronze property is much in the public eye at present, their recent strikes, their new smelter, and transportation teams have interested many people in their successes. The property is located near Takilma, two miles from Waldo, just off the stage road and about 41 miles south of Grants Pass. The mine was worked about 30 years ago, but failed and finally passed into the hands of Henry Villard and

was later owned by Chas. L. Tutt of Colorado Springs and Salt Lake, and Senator Penrose of Philadelphia, who the Grants Pass papers call Senator Primrose, and now by Mr. Tutt alone. For a long time heavy development work has been done and in the spring of 1904 the erection of a 150 ton smelter was begun, and was blown in about Sept. 1st. In the first 20 days run 400 tons of matte was made for a test. For the handling of the business a transportation company was formed which operates 40 teams of 4 mules and two wagons each.

These teams carry in the coke, supplies and their own feed, and return with matte, hauling several thousand tons per month. The matte before the strike ran 30 to 35 per cent copper and now runs 40 to 45 per cent. The ore from the new discovery is of a black oxide and lays at the present time in a blanket form with indications of a dip south and west, the same has been prospected and shows it to be 30 feet thick and some 80 feet. The values run from 20 to 60 per cent taking everything that comes out.

They are working day and night crews of six men each and are mining and delivering to the smelter about 70 tons a day. The ore is easy to mine and all of it rich enough to smelt. Other similar drifts run in at an angle from the tunnel at various points along its length, shows the same body of solid ore, thus showing that the tunnel had been run parallel, and within five feet of this great body of copper ore. They have now mined from this new discovery in the neighborhood of some 3000 tons of ore. As some may not know who Chas. L. Tutt is, we may say that he is the president of the United States Reduction & Refining Co's Works, their principal office being at Colorado Springs, Colo. Mr. Tutt is also owner of the Queen of Bronze and holds the controlling interest in the Waldo Smelting & Mining Co's properties at Waldo, namely the Lytle, Marble, Copper King and Cow Boy.

Director of the Mint George E. Roberts has just given out F. A. Wing's estimate of the precious metal production of Oregon for the past year. This estimate is the final report of Mr. Wing, who annually furnishes the mint the figures of metal production in Oregon, Washington and Alaska. A preliminary estimate was made some time ago, after Mr. Wing had completed his tour of this territory, and it is found that the revised figures do not materially change the results.

Mr. Wing places the gold production at 63,368,322 fine ounces, worth \$1,309,939 and silver at 133,157,723 fine ounces of the commercial value of \$77,231. This estimate shows a falling off from the preceding year of several thousand dollars in gold. The explanatory statements of Mr. Wing, which would cover the decrease, are not made public, nor will be until the director of the mint issues his annual report.

There is disappointment among many operators of the state regarding the figures, but the tendency of early days to discredit the report of the mint official is rapidly passing. Mr. Wing is regarded as one of the most conscientious and energetic workers in the government force, and after it is learned that he is in possession of means of knowing metal production which no private individual can reach, it is held to be presumptuous to question him on the bare authority of one operator who knows more of his own property than all others. The mint has a check on all the big assay offices, smelters and refineries, and if gold slipped out of any state without being noted, it would have to reveal its identity when being turned in at some other place. In this respect it is said that one state gains about as much from anonymous depositors as it loses, balancing the state creditors properly.

The output of the northwest is incomprehensible. Back in 1884 it was declared by a distinguished American that agriculturally, Minnesota, Nebraska and Kansas, were competitors of England, Germany and France. This year the wheat crop of Minnesota, and the Dakotas alone, is estimated at 326,000,000 bushels. The total corn crop is estimated at 2,566,000,000 bushels. To carry this year's production will require 1,500,000 cars. These cars would fill every foot of four tracks from New York to San Francisco. This estimate is made upon the basis that one third of the crop only is marketed at a distance. On a liberal estimate the corn alone if placed in wagons of forty bushels to the wagon, would make a string of wagons that would belt the globe at least a dozen times. No wonder an enthusiastic German said when told of this production, "My! what a pot of mush that would make!"—Events.

Three Nights of High Class Amusement.

The Margarita Fischer Company will open a three (3) nights engagement in the Opera house, Cottage Grove, Monday, October 23d. They will present for your approval on the opening night "The Great Blue Grass Derby." The story concerns the fortunes of an interesting group of people representative of the mountain and blue grass regions of Kentucky. The lonely, half savage life of the mountaineers, with their strong love and stronger hates, their bitter feuds rivaling in vindictiveness the Corsican vendetta, yet elevated above blood-thirstiness by a sense of religious duty, is clearly set forth and seems all the more unique and strange in contrast with the peaceful, pastoral characteristics of the blue grass country. Numerous opportunities are given for the display of the strangest passions. About the fortunes of the hero—a handsome, chivalrous, young Kentuckian—is woven a web of love, treachery, hate and revenge, from which escape seems impossible. The heroine is a new type, entirely unlike the slangy soubrette, a young girl brought up in the mountains and to whom nature has given dauntless courage, a great soul allied with charming simplicity, shyness and true womanliness, a sweet, pure and dainty creature. The Colonel is a Kentucky product, pure and simple, a hearty, breezy, wholesome, hospitable son of Kentucky, whose one great passion is his love for a good horse, and incidentally, a nice regard for a well-made wint-julep. Change of play nightly with good song and dancing specialties between acts. Prices, adults, 35c, children 25c. Reserved seats 50c. Now on sale at New Era drug store.

The Fischer Company are favorites wherever known and as their plays and players are better than ever this season, should draw crowded houses. Don't miss seeing them and secure your seats early.

Opening New Districts.

Railroad building in the Pacific Northwest is a factor in mineral development that will prove of greatest significance by next year. Projected lines on which work is being commenced will open much valuable territory. In Northern Washington and Southern British Columbia mining will feel the effects of this work most. In Central Idaho the Grangeville extension of the Northern Pacific will bring valuable territory in touch with the world. Alaska will profit immensely if it is carried out along the lines of present work, and after its completion Tanana basin and much of the Yukon will be given reduced rates that will be worth millions to the mine owners. On the Oregon coast the Drain-Marshfield line will give railway transportation to the Coos coal fields, and open territory not touched yet, and the Wallawa extension will reduce the haul for a young mining district 40 to 60 miles. The influence of extensive railroad work mapped out and actually contemplated at present will be wonderful for the mineral industry.

An optician I know, five years ago had desk room in a jewelry store in a remote Western town. He had besides, an idea in his head—that it paid to advertise. It didn't seem that he had much to advertise, just a cheap little optical outfit for fitting glasses, but he advertised his business just the same. His friends and fellow opticians ridiculed him for wasting money on newspaper space. I saw him last summer; he owns the block now, jewelry store and all, and gives employment to several men who undertook to tell him how to run his business a few years ago. He is very ordinary appearing man but he knew enough to get a good square look at his road to the heights and he never swerved from it.

The physician who lost his life experimenting with the yellow fever germ added a discovery to medical science which shall be the means of eventually stamping out this plague of the far South. The profession was not too crowded to give him a career—nor Dr. Lorenz, nor hundreds of lesser lights who have found ways to health through applying original ideas to the carrying on of their life work.

John Wanamaker started a little clothing store in the most crowded, uninviting part of Philadelphia, forty-four years ago when he had so little money he had to deliver his first orders, in person, in a wheelbarrow. But he originated the department store idea, and proved to a credulous world that all man's material needs could be furnished him, successfully, from one establishment. This idea, carried out, made him a multi-millionaire. The "other fellows" had to "look out" in his case, but their presence in the business didn't discourage Wanamaker in the least.—A. S. Munroe in World's Events.

Absolutely Pure.

Makes the food more Wholesome and Delicious.

Japanese are Sulky.

Tokio, Oct. 16.—Baron Komura arrived here today and had an enthusiastic reception. Only officials were present. The streets were strongly guarded and he drove to the palace in the imperial carriage. The treaty of peace went into effect today, the text being published this afternoon. The minister of war has ordered the officers and men to refrain from criticism on the ground that the treaty is the outcome of sovereign power.

A LUCKY MISS

Mr. Chas. Mayhew's Little Daughter Cured of Deafness and Catarrh by Dr. Darrin.

Eugene Guard.

Those who think that Dr. Darrin, the famous electrical specialist and physician, at the Hotel Suedde, Eugene, does not perform difficult cures will have their doubts dispelled by hearing what Mr. Mayhew has to say on the subject. Mr. Mayhew and his little daughter visited the Guard office and in the course of the interview we secured valuable information. He is optimistic in his praise of Dr. Darrin's skill, and avows the merits of the doctor's method of treatment of the ear by electricity and medicine. His open letter follows and should decide all procrastinating people to visit the doctor while the opportunity is offered as he remains only until November 12. A word to the wise is sufficient.

Editor Guard: For six years past my daughter has been gradually growing deaf from the effects of a troublesome catarrh. We had despaired of relief until Dr. Darrin came to Eugene last May. I placed her under his care, though I must confess I had little faith in the new cure, by electricity and medicine. The doctor assured me that she could be cured sound and well. He has kept his word. She can hear as well as any child and the catarrh is cured. The street noises are almost painful to her ear, so acute is her hearing. Many times during the week we inclined to stop, as we saw so little improvement, but the doctor was so sanguine of a cure that we kept on and success has crowned our efforts. I reside at 79 East Sixth Street, Eugene, and will be pleased to answer all questions pertaining to this most remarkable cure.

CHAS. MAYHEW.

Scholl will have a complete line of holiday stock this year.

Sick headache is caused by a disordered condition of the stomach and is quickly cured by Chamberlain's Stomach and Liver Tablets. For sale by The Modern Pharmacy.

A FOOLISH PLAN

"It is a joy to eat—I welcome my dinner hour; because I root indigestion with August Flower." Constipation is the result of indigestion, biliousness, flatulency, loss of appetite, self-poisoning, anemia, emaciation, uric acid, neuralgia in various parts of the system, catarrhal inflammation of the intestinal canal and numerous other ailments that rob life of its pleasures if they do not finally rob you of life itself.

"I'm bound in the bowels," is a common expression of people who look miserable and are miserable—yet who persist in "letting nature take its course." What a foolish plan, when nature could be aided by the use of Green's August Flower, which is nature's own remedy for constipation and all stomach ills. August Flower gives new life to the liver and insures healthy stools. Two sizes, 25c and 75c. All druggists, Benson's Pharmacy.

Cottage Grove Flour Mills

MANUFACTURERS OF

Flour and Feed

Remember that the Cottage Grove Flour is sold at its merits, at lowest living prices. We use 25 per cent hard wheat in our Pride of Oregon brand. This Flour will produce more bread per sack than the cheap varieties now offered. Try it once and be convinced, and at the same time encourage a home enterprise.

INSOMNIA AND INDIGESTION CURED.

"Last year I had a very severe attack of indigestion. I could not sleep at night and suffered most excruciating pains for three hours after each meal. I was troubled this way for about three months when I used Chamberlain's Stomach and Liver Tablets, and received immediate relief," says John Dixon, Tullahoma, Ontario, Canada. For sale by The Modern Pharmacy.

DON'T BORROW TROUBLE.

It is a bad habit to borrow anything, but the worst thing you can possibly borrow, is trouble. When it is sore, heavy, weary and worn out by the pains and poisons of dyspepsia, biliousness, Bright's disease, and similar internal disorders, don't sit down and brood over your symptoms, but try for relief to Electric Bitters. Here you will find sure and permanent forgetfulness of all your troubles, and your body will not be burdened by a load of debt disease. At Benson's Pharmacy. Price 50c guaranteed.

PLANS TO GET RICH

are often frustrated by sudden break-down, due to dyspepsia or constipation. Brace up and take Dr. King's New Life Pills. They take out the materials which are clogging your energies, and give you a new start. Cure headache and dizziness too. At Benson's Pharmacy. 25c, guaranteed.

In the case of Hough vs. Hunt, Supreme Court of Colorado, 70 Pac. Rep., 1079, it was decided that where the locators of a quartz mine after being in possession for several years, and expending \$1000 in developing it, suspended work, and during a year did only \$25 work on the mine, but hired a man to live in a house on the location and watch the property, the amount paid to him could not be counted to make up the \$100 worth of work each year required to conform to the statute concerning preserving the right to the claim.
