

OBEYS THE SCRIPTURES

Why Dr. Darrin Does Not Hide His Light Under a Bushel.

Those who search the Scriptures will find therein words advising mankind not to make a practice of hiding lights under a bushel.

We do not know that it was from studying the Bible that Dr. Darrin got the idea of advertising, but we do know that since he has resided in Eugene the doctor has not been afraid to use printer's ink.

Experience has proven to the doctor that in no other way can the afflicted learn so quickly that there is a present opportunity to be healed, that chronic diseases can be cured; that new life and energy can be imparted to those within whose breasts hopes of health had almost ceased to exist; that the worthy poor can be treated free; that all others can receive treatment at a price to accommodate their means.

DEAF 29 YEARS—CURED.

To the Public:—For 29 years I have been gradually growing deaf until it was with difficulty I could hear without embarrassment, and then I would often miss the meaning of those talking. Dr. Darrin has cured me and I most emphatically commend him to all. I will add that I am receiving great benefit for dyspepsia. My address is 137 West 5th street, Eugene.

J. M. HOWELL.

Geo. Hill, of Fort Klamath, Oregon, was in Eugene not long ago for treatment by Dr. Darrin. He reports his nephew was cured by Dr. Darrin four years ago of epileptic fits and general nervous debility.

Mrs. C. A. Cornell, five miles north of Eugene, reports her cure of deafness as perfect.

Mrs. E. J. Coburn, four miles north of Eugene, is very much pleased with the cure of her boy of stomach and general.

L. M. Hartwig, of Vida, Ore., is so well pleased with his cure of eczema, piles, dyspepsia, constipation, liver and kidney trouble that he has placed other members of his family under Dr. Darrin's care.

W. V. Bernsten, of Eugene, and W. F. Deadmond, of Lenburg, Ore., are both cured of granulated eyes.

Chas. Maljewe's daughter, 79 East Sixth street, Eugene, is happy over the cure of catarrh and deafness of six years' standing.

Mrs. M. McCully, 75 West Eighth street, Eugene, has no return of her affliction, having been cured of inflammation of neck of the bladder. Her husband was also cured of liver and kidney complaint. Scores of

others might be mentioned. The afflicted should call upon Dr. Darrin. If the case is hopeless he will so inform the patient. If he takes the case it is large odds that the patient will be permanently cured.

Remember Dr. Darrin will be at the Smeade Hotel, Eugene, until November, 12 only. Examination is free and charges \$10 a month for the time required. The poor free, except medicines.

Where gold ores contain copper it is often difficult to secure satisfactory results by the cyanide process. Metallic copper is slightly soluble in cyanide solutions, but, like gold, is not acted upon sensibly if in large grains or sheets, but many of the ores of copper decompose cyanide solutions, some of them such as the carbonates and oxides, so rapidly as to render the direct application of the cyanide process, for the extraction of gold, commercially a failure. In such cases some success has been attained by first leaching out the with a weak solution of sulphuric acid; washing the ore to displace the acid, and when necessary neutralizing the remaining acid by the addition of lime, and the subsequent treatment of the ore by the cyanide process for the recovery of the gold. This process is said to have been introduced with considerable success at Barstow, Cal., on ores from Camp Rochester in San Bernardino county. Ores containing as high as 3 per cent copper can sometimes be treated by cyaniding better than by any other process, but it is often occurs than an ore containing less than 1 per cent copper will give much trouble, the copper accumulating in the circulating solution until it can no longer be used. Where copper becomes thus troublesome it is often better to use the electrical process for precipitation. There is considerable literature available on the subject of electrical precipitation of gold and silver from cyanide solutions.

The Flag Contest Will Close Dec. 20, at 6 p. m.

The merchants have agreed on a plan of closing the Prize Flag contest on Dec. 20th, at which time the final vote will be counted and the flag awarded to the school or society having the highest vote and cash prizes paid to the persons making the nearest estimates, regardless of the number of coupons used.

Riding the Free Horse to Death.
A strange incident occurred at one of the leading hotels Sunday evening that shows how little some people think or appreciate favors or conveniences always participated in by the entire city, the majority of which never have occasion to patronize the hotel. We call it thoughtlessness for we can not conceive the thought that a man could think as much of a penny as the action of a gentleman would indicate.

A party occupied the writing room and as is the custom used pen, ink, light and stationary furnished by the hotel, when through writing asked for stamps so he could deposit his letters in the mail box at the hotel for the hotel man to carry and mail on the train. Two stamps were handed him for which he put down a nickel, after waiting with hand out for the penny in change was told that there was no penny in the money drawer, he still demanded the penny, having none the hotel man could not produce it, and hot angry words followed. The party went out but soon returned and gave up the two stamps and demanded the return of the nickel which was given him. The hotel man received no thanks for his stationery and comfortable writing room. The penny man went out thinking he had been greatly abused and probably held his letters until next day to mail. It takes all sorts of people to make the world go.

Up to the time of Liebig's discovery in 1835 mirrors were practically all made by applying a coat of tin foil of amalgamated with mercury to the surface of plate glass. In 1835 Liebig observed that on heating alcohol with an ammoniacal solution of nitrate of silver in a glass vessel a brilliant deposit of metallic silver was formed on the surface of the glass. To this discovery the more recent process of silvering glass is really due. In 1849 Drayton employed as a backing composition two ounces of nitrate of silver, one ounce of ammonia, three ounces of alcohol and three ounces of water. The defects of these two modern processes are that the deposit of silver on glass is not so adherent and unalterable under the influence of sunlight and sulphurous fumes as the old amalgam of tin and mercury; and besides gives the glass a slightly yellowish tinge.

These disadvantages have been overcome by applying to the silver coating a weak solution of cyanide of mercury, which immediately forms a kind of amalgam and renders the deposit at once much stiffer and more adherent. The silvering is protected from abrasion and chemical action by a coating of shellac or varnish, and when dry there may be added further a covering of red lead.

FULL OF TRAGIC MEANING
are these lines from J. H. Simmons, of Casey, Ia. Think what might have resulted from his terrible cough if he had not taken the medicine about which he writes: "I had a fearful cough, that disturbed my night's rest. I tried everything, but nothing would relieve it, until I took Dr. King's New Discovery for Consumption, Coughs and Colds, which completely cured me." Instantly relieves and permanently cures all throat and lung diseases, prevents grip and pneumonia. At Benson's Pharmacy, guaranteed, 50c and \$1.00. Trial bottle free.

What about your watch and clock. You can have them properly repaired at Schell's.

SOME SEASONABLE ADVICE.
It may be a piece of superfluous advice to urge people at this season of the year to buy a supply of Chamberlain's Cough Remedy. It is almost sure to be needed before winter is over, and much more prompt and satisfactory results are obtained when taken as soon as a cold is contracted and before it has become settled in the system, which can only be done by keeping the remedy at hand. This remedy is so widely known and so altogether good that no one should hesitate about buying it in preference to any other. It is for sale by The Modern Pharmacy.

Subscribe for the Nugget.

HOW TO CURE CORNS AND BUNIONS.
First, soak the corn or bunion in warm water to soften it; then pare it down as closely as possible without drawing blood and apply Chamberlain's Pain Balm twice daily, rubbing vigorously for five minutes at each application. A corn plaster should be worn a few days to protect it from the shoe. As a general liniment for sprains, bruises, lameness and rheumatism, Pain Balm is unequalled. For sale by The Modern Pharmacy.

A JUDICIOUS INQUIRY.
A well known traveling man who visits the drug trade says he has often heard druggists inquire of customers who asked for a cough medicine, whether it was wanted for a child or for an adult, and if for a child they almost invariably recommend Chamberlain's Cough Remedy. The reason for this is that they know there is no danger from it and that it always cures. There is not the least danger in giving it, and for coughs, colds and croup it is unsurpassed. For sale by The Modern Pharmacy.
