It is a little odd to hear all the knocking that the general public at large is giving Col. Greene, the head of the Greene Consolidated Copper Co. and telling how his company is not paying, etc. and then see the regular bi-monthly dividends of 4 per cent or 24 per cent per year on the capital stock of the company declared regularly from the earnings, and still have a surplus of \$75,000 in two months to be put in the sinking fund. Petticoats and Materials
For their making are now being shown at
Lurch's

Pres de Soie
Is like taffeta in everything but price

It does a taffeta service in many ways—makes a better wearing petticoat—shows to equal prettiness as a slip skirt and means a superior lining to an over garment, because it won't pull, break or lose its sprightly lustre—there is a guarantee that says it won't. Pres de Soie is soft and silky, lustrous and serviceable. Its price is one-third that of a taffeta and its dependability three times more certain than silk. Made in 36 inch width and in superb black as well as a prismatic display of color tints.
