

Was Too Honest.
Honesty is one of the leading principles taught in the public schools, and the teachers begin early to impress the value of this trait in character on the minds of the youngest pupils. A South Chicago teacher had a pupil who gave her much sorrow by his unfortunate habit of fibbing on every possible occasion. One day she kept him after school and gave him a serious "talking to." "Just look at the life of George Washington," she said, "he couldn't tell a lie." "Huh," remarked the unrepentant youth, "what was the matter with him?"

A Sore Spot.
"Woody tells me he has been working on his family tree of late." "Yes, it seems to keep him pretty busy." "Father complicated work, eh?" "Yes, I believe he discovered a hangman's noose on one of the branches and he's having some trouble sawing it off."—Philadelphia Press.

The more we know of our life, the easier and sooner relief will come. Pain and aches of the flesh, joints and muscles are

PISO'S CURE FOR CONSUMPTION
CURES WHERE ALL ELSE FAILS.
Most Cough Syrup. Tastes Good. Use in time. Sold by druggists.

Hood's Sarsaparilla

Purifies, enriches and revitalizes the blood and builds up the whole system.

It radically and permanently cures all blood diseases, from pimples to scrofula.

It is the best constitutional remedy for rheumatism, rheumatoid and dyspepsia.

There is no time of year when it is not more widely useful than any other medicine.

These statements are confirmed daily by cured and grateful men and women.

Over 40,000 testimonials in the last two years—an unequalled, unapproached record!

Now put up in tablets, as well as usual liquid form. 100 Doses One Dollar.

Not Near Him.
"It's really distressing to think," said the wealthy Mr. Farrasy, "that many very common and ignorant people will be admitted to heaven." "Well," replied Mr. Cutting, "that needn't worry you."—Philadelphia Press.

Piso's Cure is a good cough medicine. It has cured coughs and colds for forty years. At druggists, 25 cents.

His Main Fault.
"But why should you worry over your son?" said the incubator drummer. "You said he was out out for something great?" "That's just the trouble," sighed the old farmer. "He is so slow that every time he gets an opportunity somebody jumps ahead and cuts him out."

FITS Permanently Cured. No fits or nervousness after first day's use of the Rine's Great Nerve Restorer. Send for Free Book and treatise. Dr. H. H. Rine, Ltd., 931 Arch St., Philadelphia, Pa.

A Business Opportunity.
Rachel—"Here is your ring, Solomon. I can never marry you, for I love another." Solomon—"Vere iss de man you love?" "Heaven! You won't kill him, will you?" "No, but I will sell him de ring ahead."—Times.

In the copper belt of Shasta county, California, ore has been found 250 feet deeper than it has been found hitherto.

Mother will find Mrs. Winslow's Soothing Syrup the best remedy for their children during the teething period.

Not Such an Easy Matter.
"These shoes will be all right," said the salesman, "after you have got them broken in." The young man, who had been hesitating between that pair and one a size larger, took the salesman's word for it and purchased the shoes. A week later he came back to the store with a perceptible limp. "I wish you'd stretch these shoes," he said. "They hurt my feet terribly." "Haven't you got them broken in yet?" asked the salesman. "Oh, yes," said the young man. "The trouble is that I can't get my feet broken in."

RHEUMATISM

BODY RACKED WITH PAIN

No other bodily suffering is equal to that produced by the pain of Rheumatism. When the poisons and acids, which cause this disease, become entrenched in the blood there is hardly any part of the body that is not affected. The muscles become sore and drawn, the nerves twitch and sting, the joints inflame and swell, the bones ache, every movement is one of agony, and the entire body is racked with pain. Rheumatism is brought on by indigestion, stomach troubles, torpid liver, weak kidneys and a general inactive state of the system. The refuse matter instead of passing off through nature's avenues is left to sour and form uric acid, and other acid poisons which are absorbed into the blood. Rheumatism does not affect all alike. In some cases it takes a wandering form; it may be in the arms or legs one day and in the shoulders, feet, hands, back or other parts of the body the next. Others suffer more seriously, and are never free from pain. The uric acid and other irritating substances find lodgment in the muscles and joints and as these deposits increase the muscles become stiff and the joints locked and immovable. It matters not in what form the disease may be the cause is always the same—a sour, acid condition of the blood. This vital stream has lost its purity and freshness, and instead of nourishing and feeding the different parts with health-giving properties, it fills them with the acids and salts of this painful and far-reaching disease. The cold and dampness of Winter always intensify the pains of Rheumatism, and the sufferer to get relief from the agony, rubs the affected parts with liniments, oils, lotions, etc., or uses plasters and other home remedies. These are desirable because they give temporary ease and comfort but have no effect on the real trouble which is in the blood and beyond the reach of such treatment. S. S. S. is the best remedy for Rheumatism. It goes into the blood and attacks the disease at its head, and by neutralizing and driving out the acids and building up the thin, sour blood it cures the disease permanently. While cleansing the blood S. S. S. tones up the stomach, digestion and every other part of the system, soothes the excited nerves, reduces the inflammation, dissolves the deposits in the joints, relieves all pain and completely cures this distressing disease. S. S. S. is a certain cure for Rheumatism in any form: Muscular, Inflammatory, Articular or Sciatic. Special book on the disease and any medical advice, without charge, to all who write. **THE SWIFT SPECIFIC CO., ATLANTA, GA.**

S.S.S.

PURELY VEGETABLE.

Books Written in Prison.

A publisher was talking about Oscar Wilde's strange book, "The Profound," with its pathetic description of a bird beating its wings against the bars of a cell.

"Wilde's is not the first good book to have been written in jail," he said. "Jail, in fact, seems to be a good place to write books in. Literary men surpass themselves there."

"John Bunyan wrote 'Pilgrim's Progress' in jail."

"Cervantes wrote 'Don Quixote' in prison."

"Defoe laid the plans for 'Robinson Crusoe' during a term of confinement." Imposed on him for the writing of a pamphlet called "The Shortest Way with the Dissenters."

"Leigh Hunt wrote 'Rimint' in jail."

"Sir Walter Raleigh, during his fourteen years' imprisonment in the tower of London, wrote his excellent 'History of the World.'"

"Silvio Pellico and Tasso both did their best work in jail."

Losses From Insect Pests.

C. L. Marlatt, of the Department of Agriculture in Washington, has prepared a statement as to the loss by insect pests in the United States each year. He notes that the losses each year in all the plant products of the soil, both in the growing and in the stored state, together with those in live stock, exceed the entire expenditure of the national government, including the pension roll and the maintenance of the army and the navy. Placing the value of these products at \$5,000,000,000, per year, he notes an annual shrinkage due to insect pests of fully 10 per cent—in many cases of 50 per cent; but at 10 per cent, \$500,000,000 is "the minimum yearly tax which insects levy upon the products of the farm." This does not include loss to farm products in storage, \$100,000,000; or to natural forest and food products, also \$100,000,000; making a total annual loss of \$700,000,000 directly traceable to insect pests.—From W. S. Harwood's "Saving California's Fruit Crops," in the February Century.

So Glad.
"We enjoyed your piano recital last evening immensely, professor." "I am glad you did, madam. I was unable to present myself, on account of an accident, but a brother artist kindly filled the engagement for me."

Deafness Cannot Be Cured
by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional treatment. Deafness is caused by an inflammation of the mucous lining of the Eustachian tube. When this tube is inflamed, it has a tendency to close, and hearing is lost. Unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; unless the cause of the inflammation is removed, and this is caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give one Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's S. S. S. Cure. Send for circulars, free.

P. J. CHENEY & CO., Toledo, O.
Sold by Druggists. Hall's Family Pills are the best.

Could Not Trust Him.
After a wordy argument in which neither scored two Irishmen decided to fight it out. It was agreed, says the Washington Post, that when either said "I've enough" the fight should cease.

After they had been at it about ten minutes one of them fell, and immediately yelled, "Enough, I've enough!" But his opponent kept on pounding him until a man who was watching them said:

"Why don't you let him up? He says he's got enough."

"I know he says so," said the victor, between punches, "but he's such a liar you can't believe a word he says!"

Popular Science.

Dr. P. L. T. Heroult, the French metallurgical expert, who has been examining the mining and other resources of Canada, predicts that in ten years the Dominion will have become a great metallurgical country, having an iron industry larger than that of any other country in the world. So, too, he thinks that within a decade Canada will outstrip all other countries in wheat growing. In Ontario and Quebec there are immense deposits of magnetite, which have remained undeveloped for lack of cheap fuel. The invention of the electric smelting process removes this obstacle, because in the neighborhood of the ore deposits water power is abundant.

The importation of injurious birds and mammals into the United States has been carefully guarded against since the passage of the Lacey act on May 25, 1900. In the five years ending June 30, 1906, the authorities issued 1501 permits for the entry of 1,000,394 birds (chiefly canaries), 2,845 mammals and thirty-eight reptiles, and thirteen permits for the entry of 6,500 eggs of game birds. Of the consignments 402 were inspected. No injurious animal is known to have been admitted, but seven mongoses, fifty-four flying foxes or fruit-eating bats, one koala, fifteen bluejays and two starlings have been refused entry. At Honolulu six keas were refused entry.

Statistics showing the enormous waste of energy involved in the production of artificial light are always interesting, if for no other reason than that they must continually stimulate inventors in the search for better methods. Sir James Dewar recently presented these figures before the Royal Institute of Great Britain: In an ordinary candle the total amount of energy transformed into light is only 2 per cent. Oil and gas lamps are not more economical. The incandescent electric lamp utilizes 3 per cent of the energy expended; the arc light 10 per cent, and the magnesium light 15 per cent. Then comes the glowworm and moths with its 99 per cent of expended energy turned into light.

The possible value of radium to the physician still remains chiefly a matter of conjecture. Two Italians, Tizzoni and Bongiovanni, have satisfied themselves that it has an important influence upon rabies, and that it may act either upon the virus or directly upon the bitten animal. When the virus is exposed for four to thirty-six hours to radium rays it is converted into a powerful vaccine, injections into a rabbit's eye overcoming the otherwise fatal effects of inoculations with dog's virus. With a powerful specimen of radium, the direct exposures of several hours during six days, animals inoculated forty-eight to one hundred hours before treatment were saved, while similarly inoculated animals not treated all died.

It is well known that pure quartz glass possesses the property of transmitting very abundantly, the so-called chemical rays of light, by means of which photographic effects are produced, and it has often been attempted to make photographic lenses of quartz alone. Unfortunately, quartz also possesses the property of double refraction, so that, unless the opening of the lenses is very narrow, good images are not produced. Recently a French optician, F. Morin, has succeeded in making small photographic lenses of quartz glass in which some of the difficulties have been avoided, and the lenses show great rapidity of action. Still, the problem, confessedly, has not been entirely solved, and the new lenses are recommended by their inventor only for special purposes. Astronomers are particularly desirous to obtain photographic lenses possessing the peculiar permeability to the actinic rays that characterizes quartz.

A Lack of Orphans.

The Irish duelist who lamented having "as pretty a challenge as ever was penned, but no one to whom to give it," was in the same trouble as the municipality of Paris. The city has a fine orphanage, liberally appointed and with an ample staff, but with no orphans. A Mme. Tanlives left nearly a million and her villa at Orsay to be maintained as an orphanage for girls of the eighth arrondissement. The girls were to be provided with a dowry on leaving. Paris has searched the highways and byways of the district, and but two orphans have been found.

Divided on Religion.

A curious diversity of religious belief is observable in the family of Lord Stanley of Alderley. The last previous holder of the title, a brother of the present peer, died in the Mussulman faith and was buried according to the rites of Islam. Another brother became a convert to the Roman Catholic faith and is now a domestic prelate to the Pope. One of Lord Stanley's nephews is a Buddhist, and a brother-in-law, now dead, was an atheist.

If the human race were built on plans that most daily requirements, men would have two more legs that they might constantly be kicking themselves, and women would have six more pairs of hands that they might keep up with the work the children make around the house.

As a town grows older, it becomes more and more expensive for a man to be a satisfactory father.

Hand-Pressed Oil of Lemon.
"This oil of lemon," said the spice merchant, "is an exquisite thing. It is hand-pressed—pressed by hand out of lemon rind. Smell it!"

The odor of the clear oil suggested sunlight groves miles in extent on a mountain side overlooking the blue sea.

"I'll tell you how the oil of lemon is extracted," he said. "A man sits with a sponge in one hand and a piece of fresh lemon peel in the other. He presses the peel against the sponge, giving it finally a certain difficult and dexterous twist, and this breaks the cells in the rind, and the oil—there's only a half drop of it—comes reluctantly out upon the sponge."

"When the sponge has taken up the dribblings of about a hundred rinds, it is wet enough to be squeezed out. An ounce or so of clear and fragrant oil then flows from it."

"There is no way to extract this oil within a lemon rind except by squeezing and twisting the rind by hand. It takes the rinds of about 1,200 lemons to make one pound of oil."

Not as a Dish.
"Our English cousins," remarked the woman who has just returned from the land of John Bull, "do not wait until the arrival of Halloween to become interested in the tasty and nutritious nut. I was particularly impressed with their manner of serving cobnuts, which are similar to though larger than our hazelnuts. For lunch or for tea these nuts were quite the most delicious things I ate. They were served fresh and green, with delicious brown bread and butter and a salad made of crisp white lettuce leaves, with a French dressing. Over these cobnuts come, as a rule, from the neighborhood of Kent, England may be lacking in fruit, but she certainly takes advantage of many of her other products."

Grandfather's Cure for Constipation

Intestines with a costly waste of Digestive Juice, as Salts, Castor Oil, Calomel, Jalap, or Aperient Waters, always do.

No—Cascarets strengthen and stimulate the Bowel Muscles instead.

These are the Muscles that line the Food passages and that tighten up when Food touches them, thus driving that Food on to its finish.

They are the Muscles that turn Food into Strength through Nutrition.

Well,—a Cascaret acts on your Bowel Muscles as if you had just Sawn a cord of wood, or walked ten miles.

That's why Cascarets are safe to take continuously in health; and out of health.

Because they move the Food Naturally, digesting it without waste of tomorrow's Gastric Juice.

They thus work all the Nutrition out of it before it decays.

The thin, flat, Ten Cent box is made to fit your Vest Pocket, or "My Lady's" Purse.

Carry it constantly with you and take a Cascaret whenever you suspect you need one.

Thus you will ward off Appendicitis, Constipation, Indigestion, — and other things besides.

Druggists—10 Cents a Box.

Be very careful to get the genuine, made only by the Sterling Remedy Company and never sold in bulk. Every tablet stamped "CCC."

FREE TO OUR FRIENDS!
We want to send to our friends a beautiful French-designed, GOLD-PLATED BORDON BOX, hand-embossed in color. It is a beauty for the dressing table. Ten cents in stamps is asked as a measure of good faith and to cover cost of Cascarets, with which this dainty trinket is loaded. 713 Send to-day, mentioning this paper. Address Sterling Remedy Company, Chicago or New York.
