More Troops in Philippines Than Any Time Since Pacification of the Islands.

Washington, Feb. 17. - It has been decreed by the administration that, come what may, American lives and American property in China shall be protected, even if it becomes necessary to resort to arms. Guided by the experiences of the Boxer outbreak of 1900, this government is quietly mobitizing a small army in the Philippines, within easy reach of Chinese ports, and is maintaining a fair-sized fleet of war vessels especially adapted to service in the rivers that reach im portant Chinese strongholds.

It is a fact that there are more troops in the Philippines than at any time since the pacification of the Phiippines. There are now on the way to the islands two additional regiments of infantry and two batteries of artillery. As shown by the records of the War department, the military strength in the Philippines today includes four full regiments of infantry, in addition totwo companies of engineers and three companies of the signal corps. These troops for the most part are in easy reach of Manila, and a comparatively large force could be landed on Chinese soil on very short notice and still leave an adequate garrison in the Philippines.

To supplement the land force is the Philippine fleet, which includes the battleships Ohio, Wisconsin and Oregon the last named under orders to return to this country. In addition, there are the cruisers Baltimore, Cincinnati, Concord and Raleigh, the monitors Monadnock and Monterey, the gunboats Helena and Wilmington and a number of smaller gunboats, which were captured from Spain and brought into the United States navy.
