A GREAT INVENTION

Cottage Grove Man Is Inventor of Process to Make Cuts for Newspaper Work.

W. C. Cochran of Cottage Grove will take a high place beside Bigelow through his invention of a process to make cuts for printing at a very cheap rate. An average stone engraving, or half-tone, involves the labor of a skilled man for a long time; whereas a cheap cut may be produced in 50¢-

With the invention described to Mr. Cochran, or rather his father, it is possible for any man to make his own cuts in the home, or at a cost of only 5¢ or 10¢. The invention consists of a sheet of wood, a hard and penetrable material, which will stand the cuts. The sheets are suitable for all kinds of wood, from printing presses to newspaper work.
