

and the second se

CHAPTER XII.

"Arise!" said Star-Light. Rosalthe lifted her head languidly. She had lain in the canve she knew not how long. The voice of the Indian girl recalled her from a state bordering on unconsciousness. She looked around her like one dreaming and wondering where she was. The birchen vessel touched the shore.

"Step out," said Star-Light, and Rosalthe obeyed in silence. The Indian maiden drow the canoo out of the water and secreted it among the reeds and bushes.

That operation being completed, she motioned to Rosalthe to follow her and walked with noiseless and gliding footsteps into the forest. Star-Light proceeded in this manner until our heroine was nearly exhausted, and could with difficulty keep pace with her more practiced conductress; which the latter perceiving. went forward more slowly, stopping often to assist her over rough places. The way was so dark and lonely that Rosalthe queried whether a human foot ever had pressed that soil before, or whether a human voice ever broke the stillness of the solemn woods.

They reached an Indian hut or lodge, and it was a spot so hemmed in by stupendous forests, that it seemed to Rosalthe completely hidden from the observation of the living.

The maidens entered the lodge; it was without an occupant. Star-Light pointed to a couch of skins, and our heroine was glad to avail herself of the privilege of resting upon it; while the former kindled a fire and made preparations for cooking a meal.

Rosalthe was aroused from an uneasy slumber produced by exhaustion, and food set before her. Of these viands she partook without hesitation, resolved to appear as unconcerned and heroic as possible before her strange companion.

While she was thus employed Star-Light was busily engaged in compounding various paints, for what purpose Rosalthe was at a loss to conceive. When the latter had ceased eating, and pushed the food from her, the Indian maiden approached with the pigments she had prepared, and the object became apparent. Rosalthe drew back in alarm.

"Foolish maiden!" exclaimed Star-Light. "What do you fear? Water will make these colors disappear. What I am about to do is necessary to your safety. I must make you look like one of my people."

"Swear that you will keep faith with me, and that I shall return in safety to Boonesborough," said Rosaithe. "I swear," returned Star-Light. "By

the Great Spirit." "Then I submit; do with me as you will."

"White Cloud is proud," said the Indian girl, after a pause. "She is vain of her beauty; she fears that these colors will destroy it, so that Smooth-Tongue will no longer love her."

"Star-Light has been abroad?" he aid, inquiringly. "There is starlight all above you,"

replied the Indian girl, carclessly, "But not the Star-Light that is more sleasant to Otter-Lifter than the brightness of day," returned the Indian. "The bold chief of the Cherokees will

make me sad," said Star-Light. "He would not willingly darken the rays of joy that should continually stream up from your heart, and beam from your eyes," rejoined Otter-Lifter.

"You have not noticed our sister; she comes from our cousins, the Wyandots. She is called White Cloud?

"The daughters of the Wyandots are comely," returned Otter-Lifter, giving Rosalthe a searching glance. "White-Cloud is welcome; she looks like the sister of Star-Light

"Otter-Lifter has sharp eyes!" retort ed Star-Light, coldly.

"May no cloud larger than that ever ome between Otter-Lifter and Star-Light," replied the chief, pointing to Rosalthe.

"The Cherokee chief is making love to my cousin?" exclaimed the Indian girl. with warmth.

Otter-Lifter turned away with a smile, and the maidens passed on to the lodge near the center of the village. The lodge was a large one, divided into two compartments by buffalo skins suspended from the top, and secured at the bottom by sticks driven into the earth. In one place a skin was left to serve the purpose of a door, and through which Star-Light conducted her captive.

"This is my father's lodge," said the Indian girl. "He is one of the chiefs, and is called Gitshewa, or Strong-Yoice. because his shout is so terrible in battle. Being a noted man, his lodge is double. as you see, and this part belongs to me and Monon. Monon is my sister."

The person last mentioned was seated on a mat near the fire; and when Star-Light, mentioned her name, she arose and regarded Rosalthe with as much curiosity as was in keeping with Indian stocism, and possibly, a little more.

"'Tis White-Cloud," said Star-Light. Rosalthe seated herself on a mat, and examined Monon more particularly. She was younger than her sister, and bore a striking resemblance to her. She was fair, but her beauty was of a gentler cast than Star-Light's; and our heroins took courage from the fact, and hoped she would be able to win her friendship. The three maidens being seated before

the fire, did little else, for a time, than to throw furtive glances at each other. Presently Star-Light and her sister

began to converse in the Indian tongue, and being somewhat familiar with the language, Rosalthe soon perceived that they were talking about a white captive that one of their war parties of young men had taken at Harrodsburg. This riveted her attention, and she listened with breathless interest to all that was said. Her sympathies were more com-

arm and drew her away from the captive; with a knife she had severed the thougs that bound her limbs, and bade ter stand up. This done, raising her hand warningly, she stepped to the door and looked a moment at the warriors before it. Satisfied, evidently, with the result of her examination, she returned, and took Fanny Harrod by the hand, and led her from the lodge.

The parties stood in the open air, and beneath the light of an unclouded moon The face of Miss Harrod was deadly pale; her limbs trembled with agitation, and her heart beat fast with expectation and fear. She turned her marble visage toward Star-Light, or threw wild and wondering glances at Rosalthe.

The Cherokee girl paused but a moment, and then moved away from the spot, supporting the trembling form of animal-heat under the blanket is pre-Fanny Harrod, They had proceeded per-vented. This is accomplished by havhaps a dozen yards, when a majestic ing openings in that portion of the figure darkened their path, and the face horse. The openings being at the of Otter-Lifter was looking calmly upon highest point occupied by the blanket them. Miss Harrod uttered a faint cry, and fell fainting into the arms of Star-Light.

CHAPTER XIV.

Joel Logston reached Boonesborough much exhausted from the loss of blood; but he was not so weak as to be unable to give a very extraordinary account of what had transpired.

The restraint which had been imposed upon the Frenchman's actions proved by no means agreeable. He felt that he was in danger, and that many of his plans were likely to fail. He attributed all his present difficulties to young Norwood, and resolved to be fully revenged upon him. He paced the rough floor of the block-house until near midnight, devising plans of escape and retaliation.

The ploneers were in their cabins, and the Frenchman was the sole occupant of the structure. The door which opened into the inclosure was guarded by Andrew, who was soon to be relieved by Exquisite Ebony. That it would be possible to corrupt the simple black and escape was an idea that naturally crept into the mind of Le Bland. The result of this conception was the following conversation between the partles.

"Andrew?" said the Frenchman, in a low voice, putting his mouth to a loophole

The honest African was somewhat shield, which is made of fabric, is of comatose at that time; but the sound instantly aroused him, and caused him to look around in alarm. Le Bland repeated the name.

"Am dat you spokin?" said Andrew. The prisoner answered in the affirmative without delay.

"Don't 'dress yerself to me." returned Andrew, with some loftiness of manner. The Frenchman gnashed his teeth with anger, and wished, for the moment, above all other things, for the privilege of wringing the negro's neck.

"But, my good Andrew, this misfortune of mine should not interrupt our friendship," added the prisoner in a deprecating tone.

"Dis chile am berry much fat-i-gued, and doesn't want to hear no low remarks," said Andrew, yawning.

"Come, Monsieur Andrew, don't he hard on a person who has been unfortunate.

"Stop dat talkin' dar: I'm gwine to decompose some poetry. What will rhyme wird 'skies,' you French feller in dar?' asked Andrew after a short silence. "Eyes," replied Le Bland, thinking

that perhaps it would be better to humor his mood.

20 Horse Blanket.

A horse blanket particularly adapted to draft animals is the invention of a Seattle man. This blanket is so yen tilated that undue accumulation of when arranged on the animal, the rising animal heat passes off freely. To

AFFORDS VENTILATION.

prevent water or snow from gaining access through these openings there is used a shield, which is supported above the openings by a skeleton wire frame. The reins for guiding the horse are held in place in the frame. The greater width than the openings, thoroughly protecting the animal. Such a blanket would be suitable for livestock of any kind.

Building Up a Beef Herd.

It is important to have cattle of good individual quality and to have this backed up by good pedigrees. But it is equally important that their enviroment be right, writes a New York. farmer in American Agriculturist. A farm that is naturally poor and grows poor crops can only develop stock of poor quality. I am positive of this. The farm on which my cattle are kept is considered one of the best in the county and is not getting any poorer with the large amount of manure my stock make. It is not what could be called high ground, but almost level and well drained. This soll is underlaid with limestone, similar to the limestone and blue grass lands of Kentucky, that have long been famous for the stock that came from them.

To Flaht Boll Weevil.

Secretary Wilson, of the Department of Agriculture, asks in his report to Congress that \$105,500 be appropriated as the boil weevil item for the following year. It is proposed that the Secretary be authorized to expend the appropriation in such manner as he shall deem best, in co-operation with the State experiment stations and practical cotton growers. Of the special appropriation of \$195,000 which. was made for the fiscal year ending June 30, 1906, \$105,000 has been used by the Bureau of Plant Industry in the study of cotion diseases, diversi-Scation and co-operation with the various experiment stations in extending the improved cultural methods. It is recommended that this appropriation be continued, not as a separate item, but as a part of the regular bureau funds. It is highly important, the Secretary of Agriculture adds, that the investigation on breeding of new cottons, the general propaganda work on improved cultural methods, 1408-Battle of Branham Moor, the study of the diseases and diversification of crops, he continued and exteaded into other Southern States likely to be invaded by the weevil. The 1619 Lucilio Vanini burnt as an atheobject of this apropriation is to enable the department to continue this 1656 Spain declared war against Engwork.

Milk Pays More than Butter.

The following, with reference to the decline of butter manufacture in England, is from Hon. Frank W. Mahin, United States consul at Nottinghum, 1759-French siege of Madras raised. England: "One plausible explanation of the manifest decline in dairying in England is that it is more profitable to sell the milk, the drinking of which is increasing, than to convert it into butter. Consequently the average British farmer is making no butter to sell, but is even huying what he needs for his own use. Furthermore, It is asserted that some English dairles buy foreign butter and sell it as their own product-the domestic article, though inferior, in the judgment of many consumers, commanding a higher price than the foreign."

Binging Unruly Hogs.

When the sows get unruly and in clined to make trouble of various kinds they can be readily controlled by an arrangement made of ropes and placed around the jaws of the animal. Such a rope is not easy to put in position with an angry hog, so a little device made of an old broom handle is used. Insert a small book in one end of the handle and near the other end nall a

The Honey Muskmelon

"I am ready-put it on," replied Rosalthe, submitting herself patiently to Star-Light. The Cherokee girl gazed an instant at

the handsome features of Rosalthe, and sighed.

"Star-Light is sad and unhappy," said our heroine, kindly. "Smooth-Tongue has made her heart heavy by his deceit. Let her forget him; he is bad."

"Forget him, that White-Cloud may remember him."' retorted the Indian girl, angrily.

"Star-Light is wrong; jealousy and grief have blinded her eyes. But the time will come when she will see clearly," replied Rosalthe. The heart of Star-Light seemed to

relent; she commenced laying the colors upon Rosalthe's face with no ungentle hand, while the latter sat uncomplainingly before the blazing fire, that she might see to complete the novel operation. When this part of the singular toilet was finished, the Indian girl proceeded to unfasten her hair, which was confined by a band, and let it fall unrestrained over her neck and shoulders. In a short time Rosalthe's dark tresses were arranged to suit the fancy of Wassahauza. From a willow basket, in one corner of the lodge, she produced an Indian dress, in all respects like her OWD.

Our heroine made no objections, but suffered herself to be attired in the costume of savage life. When the whole was completed, Star-Light herself looked at her with wonder and admiration; for Rosalthe appeared quite as charming in her new apparel as in her own legitimate style of dress.

"Good!" exclaimed Star-Light, holding a small mirror before her unresisting captive. Rosalthe glanced at the image reflected, and could not repress an involuntary exclamation of astonishment.

"You'll be jealous of me, now, I'm sure," she said, with a faint smile.

"If I thought you could speak the truth, I should not hate you," rejoined Star-Light, a portion of her former sternness returning. "Let Star-Light and White-Cloud be

friends," said Rosalthe, in a kindly tone. The maiden made no reply, but taking Rosalthe's hand, led her from the lodge.

"There is a village not far from here." said the former, when they had walked a short distance. "You will be safe there, for you shall dwell in my lodge, and I am the daughter of a powerful chief. You must not try to escape, for that might bring evil upon you. I will tell our young men that you come from our cousins, the Wyandots, on account of a young chief who loved you, but whom you despised. This tale will account for your appearance among us if you follow my directions. Speak to no one, and leave the rest to me."

CHAPTER XIII.

A walk of half an hour brought the maidens to the Cherokee village, which consisted of about twenty lodges, being only a minor branch of that once powerful nation.

Star-Light was passing rapidly among the huts, followed by Rosalthe, when a tall and majestic figure appeared in the narrow and well-beaten path that wound in a serpentius manner from lodge to lodge.

pletely enlisted in the subject when she heard the prisoner was a young girl. and already condemned to death.

Rosalthe could control her feelings no longer. She asked why Otter Lifter, being a humans chief, permitted such cruelties, to which Star-Light replied that he had nothing to do with the matter. the captive having been taken by a party of young braves, and to retaliate on the settlers at Harrodsburg for the loss of one of their number.

"But has not Otter-Lifter or your father power to save the poor girl?' inquired Rosalthe.

Star-Light made no answer, but look ed steadily at the fire.

"Did not the Great Spirit intend that the pale and red faces should be perpetually enemies?" asked Monon.

'No; it is His will that all men should be brethren, and dwell together is friendship," repiled Rosalthe.

"That would be hest, it seems to me; but if it had been the will of the Great Spirit it would have been so; for his power is greater than man's," answered Monon

"The fate of that unhappy young woman makes me miserable!" exclaimed our heroine, and lying down upon the couch of buffalo skins that had been spread for her, she vainly endeavored to rest. The imperfect slumbers that visited her at periods were disturbed by dreamy vagaries. It was about midnight when she felt a touch upon her arm. She opened her eyes with a start, and behald Star-Light beside her.

"If you would see the white captive, arise and follow me," said the Indian girl.

Rosalthe lost no time in obeying; she arosa and followed her from the lodge, while Monon remained sitting bf the fire. Without a word being uttered by either party, they approached the spot where the unfortunate captive was waiting the execution of the sentence which had been pronounced upon her by her judges.

Two warriors lay extended upon the ground near the door of the lodge, who appeared to be sleeping soundly. Star-Light paused, evidently somewhat surprised at what she beheld.

"The Great Spirit favors us," she said "The warriors are full in a low voice. of firewater-they are drunken."

Star-Light passed on, stepping lightly within a few inches of the unconscious watchers.

Making a gesture for Rosalthe to imitate her example, she glided into the lodge. The prisoner was sitting near a smoldering fire, her hands and feet tightly bound with thongs of deer skin. She looked up with an exclamation of astonishment. The instant that Rosalthe caught a glimpse of the sorrowful face that was turned toward her, she sprang forward and embraced the doomed maiden, exclaiming, "Fanny Harrod!"

The captive uttered no words of recognition, but gazed at Rosalthe in mute surprise.

"Minno Monedo!" said Star-Light, in a suppressed but energetic manner. "What are you doing? Is this a time to embrace and weep? Come away, White-Cloud; the Drooping-Lily does not know you.

Star-Light grasped Rosalthe by the

"Dar fust line am dis," resumed the negro, "Dar moon am sailin' in de skies." "But can't compare wid Dinah's eyes," added Le Bland.

"Dat am berry good," quoth Andrew, much pleased with the lines.

"Listen," continued the Frenchman; "I'll assist you to compose some lines on Dinah's eyes, if you'll just let me out of this ridiculous place. Poetry is the sure road to the female heart. Andrew, you are a poet and a man of feeling."

highly gratified by the compliment to his head and heart.

"The fact of the case is, that I am vilely slandered and villationsly traduced. It is necessary in order to vindicate my character, that I should escape this block house. Now it seems to using them and the producer lost valume, that a man of your sensibility must able trade. The Honey melon, which pity me, more especially when I assure has been tested for three years past, you that I will give you a handsome sum of money for your services."

"Money!" exclaimed Andrew, eagerly, pleces.'

"Dat alters de cirkumstance. Poke out des money frew der hole," responded Andrew readily.

(To be continued.)

Cling to Their Secrets.

Bishop Hanlon, of Uganda, in describing some of his experience in Central Africa, said recently that, though many of the medicine men had been converted, they could not be induced to carry their confession so far as to divulge their undoubted valuable remedies for native disease. Some of the converted medicine women were not so reticent, but their revelations were fenerally worthless.

Failed to Find the Great Secret. There is good authority for the bert Spencer, Charles Darwin, Thomas

H. Huxley and Louis Pasteur were It will certainly please the consumer. convinced that they had discovered the secret of life, but repeated tests, in which antecedent life was more carefully excluded, showed in every in- keep all the aweet potatoes you need, stance that they had been mistaken.

Kept Her yow of Silence.

Domestic Diplomacy.

"Women don't have logical minds!" said Shrewd bluntly.

"They don't need them if they're as lucky as I am," said his wife, sweet-"You see, I have you think for ly. me!"-Detroit Free Press.

The Chronic Bachelor.

to evade her."-Cleveland Leader.

One of the astonishing things in

vegetable growing or rather in growing vegetables for the express purpose of supplying the consumer, is the utter indifference shown by the grower to the matter of quality. The same thing applies to fruit. It would be excusable if there were no other sorts, but when there are a dozen more or less far better than the varieties of-"Y-e-s, I know dat," said the negro, fered it is strange, indeed, they are not grown. A family well known to the writer was especially fond of musk melons and bought them in large quantities until all that were offered them were so poor in quality they stopped is one of the promising new sorts. It

is a nicely formed melon, the skin "Yes, Andrew; good, hard, silver green and the flesh a yellowish green. The fiesh is firm and deep and of a

sweet, spicy flavor, decidedly pleasing to the taste. If it does as well in general planting as on small plats, and there is no good reason why it should not, it will be a variety that should be statement that at various times Hor- extensively planted in all sections where the muskmelon may be grown.

To Keep Sweet Potatoes.

When you have no cellar that will wash and fill a boller full of potatoes, cover with cold water, place them over the fire and boll until you can

plerce them with a fork. Remove

Fat in Mille.

The percentage of fat in milk from a single cow may vary, one day giving different results from the next. In an experiment with a choice Jersey cow the milk was found to range from 4.45 per cent to 5.83 per cent. A aingle test with a cow may, therefore, be of no value, as in the one case more milk "They accuse me," said the chronic would be required to make a pound of bachelor, "of always looking out for butter than in the other, as was shown number one. But I'm not-I'm trying in the variation in fat with the above experiment

FOR RINGING THE HOGS.

strap, which fastened so as to form a loop, will enable one to get a firmer grip on the handle. Then take the rope and make a slip noose in one end, hang it from the book on the end of the small pole and, with a quick movement, place the loop over and around the upper jaw, when the mouth is forced open. Take hold of the rope with one hand just above the noose and with the help of the ringer insert the ring or rings on the shout. The animal will be unable to fight much with this appliance around its jaw. The illustration shows the details of the pole with strap and hook and also the method of having the loop over the Jaw.

Demand for Trotters.

The breeding of backneys may answer for men of great wealth and large incomes, but the average American farmer will find it much more profitable to breed from the best of trotting stock, says American Cultivator. He should aim to produce animals of good size, high intelligence, pleasant disposition, a pure trotting gait and high, all round action. There is always a good demand for such animais and at prices that will insure a profit to the man who breeds and raises them, provided they are properly educated to harness and well fitted for the market.

Wheat the Best Sheep Food.

Some of the experiment stations find that a pound of wheat in feeding has more nutriment than a pound of any other grain. In corn there is 8 per cent of digestible protein, barley 8.69 per cent, oats 9.25 per cent, rye 9.12, while wheat has 10.23 per cent. An English authority estimates wheat fed to lambs is worth about 76 cents per bushel. The Indiana station realized 77 cents a bushel for wheat fed to sheep.

Roots Good for Poultry.

Roots of all kinds can be fed to poulry with advantage in the winter time to supply green food. It is a good practice to split the roots and allow the hens to pick out the contents. Where the roots are small drive a nail through one end and into a board or the side of the house to prevent them from being dragged around and solled.

Cure for Limberneck.

For limberneck in fowls try one tablespoonful of copperas dissolved in each two gallons of drinking water. Maggots from decaying animal matter

are said to produce limberneck in fowls. This is doubtful, but as a matter of precaution would suggest that an expert. He was advised to learn the any carcass that may be around be art by his physician, who thought he burled.
