Nature's Great Invention

The Hodge Jigs give a perfect separation of Zinc-Lead-Ores

JOHN A. TRAYLOR
MINING MACHINERY
DENVER, COL.

IN THE MOON ENCASED.

Hemingway has proved that the moon is made up of parts that can be taken out in useful form. To the moonbuilders of the future, his work may be a gold mine. At the moment it is only a step toward our future knowledge of the moon. But when men have learned more about it, this knowledge may be of great value.

HUMAN BLOOD MARKS.

A new discovery was made by Dr. E. C. H. Woot of the American Museum. The discovery was made in the Amazon region. The blood of the native Indians contains a substance which Dr. Woot calls 'Huma.' This substance is found in the blood of all mammals, including the human race. It is a new discovery, and may prove to be of great value in medical research.
