First Logs In Pond.

The Coast Fork Timber Co. is pushing its work of building the mill as fast as possible, but the principal delay is on account of the shipping of the machinery, which is not quite complete. Last week a number of logs were floated down the river and into the pond to see how everything worked, and no difficulty was found in landing the logs right where they were wanted. By the time the mill is ready for operation the pond will be jammed full of logs, and will be kept full from then on. As no difficulty is found in getting the logs in at this time in the year, it can always be handled.
