FARM AND GARDEN

By ANTHONY HOPE

A "wise man will make more opportunities than he finds." —Plato

WEBBER, the issue, is the highest of the season. The
latter is more or less expected to be the commis-
sioner of this year's crop. The late fall of plow-
ning, and the cold weather, have rendered it
necessary to plant a large portion of the
field early. The soil is in good condition, and
the weather is favorable for the rapid growth of
corn and wheat. The following is the schedule
of work for the present week:

Monday—Plowing and harrowing the
field for the corn. The land is in good
condition, and the weather is favorable
for the rapid growth of corn and wheat.

Tuesday—Fertilizing the field. The
land is in good condition, and the weather
is favorable for the rapid growth of corn
and wheat. The following is the schedule
of work for the present week:

Wednesday—Planting the corn. The
land is in good condition, and the weather
is favorable for the rapid growth of corn
and wheat. The following is the schedule
of work for the present week:

Thursday—Fertilizing the field. The
land is in good condition, and the weather
is favorable for the rapid growth of corn
and wheat. The following is the schedule
of work for the present week:

Friday—Planting the wheat. The
land is in good condition, and the weather
is favorable for the rapid growth of corn
and wheat. The following is the schedule
of work for the present week:

Saturday—Fertilizing the field. The
land is in good condition, and the weather
is favorable for the rapid growth of corn
and wheat. The following is the schedule
of work for the present week:

Sunday—Rest and preparation for
work. The land is in good condition, and the
weather is favorable for the rapid growth of
corn and wheat. The following is the schedule
of work for the present week:

CHAPTER II

The spring planting had been devot-
ed to tillage and preparation, and
the following is the schedule of
work for the present week:

Monday—Plowing and harrowing the
field for the corn. The land is in good
condition, and the weather is favorable
for the rapid growth of corn and wheat.

Tuesday—Fertilizing the field. The
land is in good condition, and the weather
is favorable for the rapid growth of corn
and wheat. The following is the schedule
of work for the present week:

Wednesday—Planting the corn. The
land is in good condition, and the weather
is favorable for the rapid growth of corn
and wheat. The following is the schedule
of work for the present week:

Thursday—Fertilizing the field. The
land is in good condition, and the weather
is favorable for the rapid growth of corn
and wheat. The following is the schedule
of work for the present week:

Friday—Planting the wheat. The
land is in good condition, and the weather
is favorable for the rapid growth of corn
and wheat. The following is the schedule
of work for the present week:

Saturday—Fertilizing the field. The
land is in good condition, and the weather
is favorable for the rapid growth of corn
and wheat. The following is the schedule
of work for the present week:

Sunday—Rest and preparation for
work. The land is in good condition, and the
weather is favorable for the rapid growth of
corn and wheat. The following is the schedule
of work for the present week:

CHAPTER III

The spring planting had been devot-
ed to tillage and preparation, and
the following is the schedule of
work for the present week:

Monday—Plowing and harrowing the
field for the corn. The land is in good
condition, and the weather is favorable
for the rapid growth of corn and wheat.

Tuesday—Fertilizing the field. The
land is in good condition, and the weather
is favorable for the rapid growth of corn
and wheat. The following is the schedule
of work for the present week:
