BAY CITY ROTTEN

Rascals at Bay.

Munising, Mich., Oct. 21.—The evidence that they had gathered sufficient
mass to make it worth while to
side a dam or more extensive, a number
of these same Rascals were
about to carry out their wearisome
quests for the benefit of the nearby
towns and the state.

While some of these people could
be considered as valued for their
labor, others were known to be
nuisances, and the local authorities
had been instructed to co-operate in
the search for these fellers.

The search was set for tomorrow,
and the Rascals were expected to be
arrested and hauled to the county
Jail.

Snow Gets Deeper.

Snow in many sections of the
state has been reported to be up to
7 inches deep, and in some places
12 inches.

The snowfall continues to increase
in intensity, and it is expected that
the depth will continue to grow as
the winter season nears.

For the evening

WILL INDOCT THE MARYS AND OTHERS.

Mayer Schlosser and Dean Paul Sprogg
of the University of Michigan, assisted
in the ceremony.

San Francisco, Oct. 21.—The
existence of the San Francisco
Police Department, which has been
in operation for over 100 years, was
celebrated with a parade and a
speech by the mayor.

The parade consisted of firemen,
police officers, and other city
employees.

The mayor spoke of the
importance of the police force in
maintaining order and keeping the
people safe.

Cold Great in Wyoming.

Buck Falls, in Sweetwater County
near Dubois, Wyo., Oct. 21.—The
most storm noises in years for the
people of Dubois have been
accompanied by heavy snowfall, and
the air is very high winds.

The Powder River has now risen
to its highest point in many years,
and the city of Dubois is now
under water.

West of Green River, Wyoming,
the forests are covered with snow,
and all the country is white.

The snowfall has been
unprecedented in the history of the
area, and the people are urged to
take precautions to protect their
property.

CHILD VOLCANO BELCHES.

Valle de Vetiver Swamp a
Raging Fume.

San Salvador, Oct. 21.—Tepaleque
volcano, which has been
inactivity for some time, has
erupted again.

The volcano is
located in the Valle de Vetiver
Swamp, and the eruption has
caused a violent belch of ash and
dust into the sky.

The belch is
likely to continue for some time,
and the people are advised to
avoid the area.
