LAUNCH TRAFFIC ADMINISTRATION

Less Than 100,000 Cables of New Tower from Northwest.

Washington, Jan. 17-THE Washington area has been given some indications of the types of traffic that will be handled by the new cable tower that is now being erected by the United States Government at the north end of Henderson Island in the Potomac river, mile above the city. The tower will be 1,500 feet high and will be used for the purpose of intercommunication between the various cities of the United States. It is expected that the tower will be ready for service by the end of May, and that it will be able to handle traffic of all types, including letters, parcels, express, telegrams, and telephone calls. The tower will be connected with the rest of the United States by a system of cables and wires, and will be operated by the United States Post Office Department.

WASHINGTON, Jan. 17-THE United States Government has consented to allow the Japanese Government to have the use of a post office at the new cable tower. The Japanese Government has requested the use of the post office for the purpose of establishing a cable line between Japan and the United States. The United States Government has consented to the request, and the post office will be opened shortly.

WASHINGTON, Jan. 17-THE President of the United States has signed a proclamation establishing a national holiday in honor of the late President Lincoln. The holiday will be observed on the day of his death, April 15, and will be a day of mourning and remembrance for the nation. The President has also directed that a national flag be flown at half-mast on all public buildings on the day of the holiday.

WASHINGTON, Jan. 17-THE American Museum of Natural History has announced the appointment of a new director. The new director will be a distinguished scientist, and will be responsible for the operation of the museum. The museum has a large collection of natural history specimens, and is one of the most important museums of its kind in the world.

WASHINGTON, Jan. 17-THE United States Government has given the Japanese Government a loan of $10,000,000 to be used for the purpose of improving the electric power system in Japan. The loan will be used for the construction of new power stations and the extension of existing power lines.
