Secretary Horace W. Wilson has ascribed the falling off of nominations to the Kentucky Futurity to the fact that there are so many of this class of stakes that the owner who would enter in all of them assumes a burden greater than is warranted.

enter on the training is found physically suited to the work.

In a case involving the management of an English insane asylum several former inmates were called as witnesses, and the king's counsel who called them remarked that they were as sane as any one in the court. The judge on the bench showed no enthusiasm at the announcement.

Sometimes buried landscapes exist in countries now densely inhabited. Recent investigation has shown that one lies beneath the region in England known as Charnwood forest. The rocky projections seen there are the peaks and arotes of a buried mountain chain belonging to the old red sandstone period.

The other day, just as the tide in the Thames was turning from ebb to flow and the fish were coming up the river again, a very heavy rain, following several days of drought, suddenly flooded the sewers of London, and the risk of foul water killed the fishes by the millions, so that the dead bodies covered the banks for miles.

The telegraph line from Vienna to Chernowitz is the longest line in Europe which uses the duplex system, being 630 miles long. Cretinism, which is one form of idiocy, is curable, according to Professor von Wagner of Vienna. He has treated fifty-two cases with thyroid gland and finds improvement in body and mind in all cases, even when the patients had passed the age of growth. All improved in their power of speech, and some of the children were made fit to attend school.

Weak Hearts

Are due to indigestion. Ninety-nine of every one hundred people who have heart trouble can remember when it was simple indigestion. It is a scientific fact that all cases of heart disease, not organic, are not only traceable to, but are the direct result of indigestion. All food taken into the stomach which fails of perfect digestion ferments and swells the stomach, puffing it up against the heart. This interferes with the action of the heart, and in the course of time that delicate but vital organ becomes diseased.

Mr. D. Kauble, of Nevada, O., says: I had stomach trouble and was in a bad state as I had heart trouble with it. I took Kodol Dyspepsia Cure for about four months and it cured me.

Since a French engineer named Gumond planned a submarine tunnel in 1857 various projects have been advanced for connecting England with the continent. The latest is the suggestion of Lunau-Varilla, who wants to build a tunnel to within three miles of England and thence a bridge which England, which has not favored a tunnel, could destroy at any time in case of danger of a foreign invasion thus rendering the tunnel useless.

The old three-decker Duke of Wellington, once the pride of the British navy, is being broken up at Portsmouth. She was launched in 1832 and headed the fleet that went to the Baltic when war was declared against Russia in 1854. At that time she was the largest iron-hulled ship in the world, though her tonnage was only 6,071. But she carried 131 guns. "She can fire 200 shots a minute. What can stand up to her?" said a London paper. She was of wood, of course, and represented the produce of seventy-six acres of forest oak, reckoned at forty oaks, 160 years old, to the acre.

His Choice.

He Was It.

"Geniuses," declared the poet, "are born, not made."

"Are there more geniuses in the world like you, pa? Ma said you were the only one."

"Your ma is usually right, my boy."—Chicago Record-Herald.

An Illusion.

"Do you think that an egotist has the best chance of success in life?"

"No," answered the philosopher. "The egotist is so well satisfied with himself that he is likely to seem successful whether he is or not."—Washington Star.

Bright's Disease and Diabetes.

We desire to place in the hands of those afflicted with Bright's Disease and Diabetes a pamphlet that is saving human lives. It is not an ordinary pamphlet, such as commonly used to advertise medicines, but is principally made up of reports of scientifically conducted tests in a large variety of cases, showing 87 per cent of recoveries in those hitherto incurable diseases.

The specimens employed in these tests are known as the Fulton Compounds and the results obtained prove conclusively that these dreaded diseases no longer lead to death from Bright's Disease alone are appalling, over 100,000 a year, starting as kidney troubles, have at last yielded to medical science. The pamphlet is free. Write to the John J. Fulton Co., 180 Washington street, San Francisco, Cal.

When to suspect Bright's Disease—Puffy ankles or hands; weakness without apparent cause; kidney trouble after third month; frequent urination; may show heat or cloudiness on standing; falling vision; day drowsiness—one or more of these.
