Fred Fisk For Sheriff.

The Springfield News has the following concerning Fred Fisk, nominee for sheriff:

In Fred Fisk, candidate for reelection to the office of Sheriff of Lane County, the people have an economical and competent official and during his career as sheriff he has given satisfaction in every detail of the work coming under his care. The vast amount of business passing through the sheriff's office requires a man of ability and judgment. Fred Fisk as sheriff is thoroughly competent, accommodating and trustworthy. If a man has a hired man who gives entire satisfaction, who does his work well and with ability to do all work required it is not good policy to change him for a man unknown, untried and whose ability is seriously doubted. If a horse works well and gives satisfaction and is a horse to the owners liking is it a good policy to exchange for a horse unknown, untried, not halter broke and whose actions indicate that he would not and could not pull in harness? Fred Fisk was elected to the office of sheriff for the first time two years ago, after finishing out the unexpired term of Sheriff Withers. He has been a good and faithful servant of the people, serving all, irrespective of politics, with fairness and justice and the people will again re-elect him to the sheriff's office.

A Trout Hatchery.

The Fish and Game Protective Association of Portland at a recent meeting reported on a bill which it proposed to bring before the legislature asking for a license fee to be collected from all fishermen over 18 years of age, for the purpose of establishing a fund to be used in the building of a large trout hatchery in the Willamette Valley. At the present time there is no trout hatchery in the state, all the funds received from fines, and fees for salmon fishing go to salmon hatcheries, and the fines received from other fishing are small and go to

the general State fund. Fish Warden Van Dusen has had in mind for years the establishing of trout hatcheries, along with the salmon hatcheries, when some fund for such work shall be raised. If a yearly fee of \$1 were charged, enough money would be collected to build at least one hatchery for trout, in the course of several years and in time would mean several hatcheries. If the Willamette Valley had one it would mean consideration for fishermen in that section. The trout in all our streams are not as plentiful as they might be and it is an easy means of getting a fund for their increase.
