

**McClure's Alleged Picture of Christian Science Leader.**

Alfred Farlow, manager of the committee on Publication for the Christian Science Church, today gave out the following statement: "McClure's magazine, in the December issue, published a picture which is represented as a photograph of Mrs. Eddy taken in 1882. It is not a picture of Mrs. Eddy, but is a likeness of Mrs. Sarah C. Chevallier, who formerly lived in Boston and who died in California two years ago. This fact is incontrovertibly established by the affidavit of Mrs. Chevallier's son, which appears in this article. We have in our possession the picture of Mrs.

Genuine picture of Mrs. Eddy taken in 1886.

Chevallier, which we have just received from her son and which is an exact duplicate of the one used by McClure's.

"In connection with this portrait, McClure's publishes an editorial announcement of a story relating to the Rev. Mary Baker G. Eddy, the Discoverer and Founder of Christian Science. It is stated that as a result of a careful investigation their story is probably as near absolute accuracy as history ever gets. Indeed the introduction in question lays great stress upon the accuracy of its proposed history. Again it is said, 'Practically no assistance can be obtained from Christian Scientists themselves; that she (Mrs. Eddy) refuses to be consulted personally on the main facts of her own life.' It should be stated that according to the custom, McClure's representative, who applied to Mrs. Eddy for an interview, was referred to the committee on publication, who is specially appointed for the purpose of rendering any assistance in his power to the representatives of the

public press who may be gathering data on the subject of Christian Science and its leader.

"In a conversation with members of McClure's staff, several months ago, I informed them that if they would submit their data to me I would be pleased to assist them in their verification, giving them as my reason that there were documents in circulation and papers afloat that were not genuine. They have not availed themselves of my offer.

"Notwithstanding the facts which we have stated, we find in this editorial announcement a picture of another woman which is represented by McClure's as a portrait of Mrs. Mary G. Baker Eddy, taken in Boston in 1882. The picture does not in any point resemble Mrs. Eddy.

"On November 9th and before the December number of McClure's was placed on the news stands, I wrote to the Managing Editor of McClure's, apprising him of this error, but received no reply. My letter follows:

"I have just been looking at the advertisement which you have in Ridgeway's of the 17th inst. In the centre of the page is a picture which I assume is represented as a portrait of Mrs. Eddy. I hasten to inform you that this is not a picture of Mrs. Eddy; there is nothing about it that would remind me of her. I have seen Mrs. Eddy frequently during the past twenty-two years and know her face well enough to draw a likeness of it if I were an artist.—therefore I speak from positive knowledge.

"It was my fear that you might be imposed upon by just such counterfeits that impelled me to suggest that your manuscript relating to Mrs. Eddy be submitted to someone thoroughly posted concerning the events of her life."

"Directly underneath the McClure portrait is a modern signature of Mrs. Eddy, which might give the impression that it had been written on this photograph by Mrs. Eddy. This of course could not possibly be true since the portrait is not a likeness of Mrs. Eddy and never was in her hands.

"When asked upon to produce the photograph from which the picture was made, and to the name of the photographer, the editor of McClure's declined, saying he would give what information he could a few days later.

"I then went to work to obtain evidence, by which I could disprove McClure's allegation and show the public that another face had been substituted for that of Mrs. Eddy.

"The following affidavits and photographs are the results of my investigation:

**AFFIDAVIT OF CHAS. F. CHEVALLIER.**

Marshall, Texas, Nov. 27, 1906. Mr. Alfred Farlow, Boston, Mass.

Dear Sir—The photograph enclosed herewith, taken by the Norman Photograph Company, 3 Park Street, and 184 Boylston Street, Mass., is a portrait of my mother Mrs. Sarah C. Chevallier. By a comparison, any one can easily see that the portrait published on page 212 of McClure's Magazine for December, 1906, is the picture of my mother, and to the best of my knowledge and belief is an exact copy of the photograph enclosed. (Signed) CHAS. F. CHEVALLIER, The State of Texas } County of Harrison }

Before me, Marion Tutney, a notary public in and for Harrison County, Texas, on this day personally appeared Charles F. Chevallier to me well known to be the person whose name is subscribed to the foregoing letter, who, after being duly sworn by me on oath says that the statement, made in the foregoing letter, are true, and that the photograph therein enclosed is a portrait of his mother, Mrs. Sarah C. Chevallier.

Given under my hand and seal of office this November 27, 1906. (Signed) MARION TUTNEY, Notary Public in and for Harrison County, Texas.

Carpets and Curtains at Veatch & Lawsons.

Special Reduced Rate to Kansas City and Return.

"Mississippi Commercial Congress", Kansas City, Mo. Nov. 20-23 '06' Round trip tickets for this occasion will be on sale at this office Nov. 14 and 15. Round trip (both ways through Portland) \$64.40. Round trip (one way through Portland and one way through Calif., \$73.60.

J. M. ISHAM, Agent.

**ON THE RANGE.**

**Fat Sheep and Good Prices Reward the Grower.**

Nature has been in beneficent mood over the whole range country this year. Never before has there been such a wealth of feed. Both cattle and sheep have been marketed fat, and financial results have exceeded all expectation.

Recently a drove of native bred Wyoming Hereford steers, approximating an average of 1,400 pounds, sold at \$5.80 per hundredweight. This merely suggests what the range country can do.

Of course Wyoming cattle to make \$5.80 are not scrub bred, neither can they be subjected to vicissitude from calfhood. On the other hand, it is not necessary to winter feed to secure similar results. Good winter pasture will suffice. There is no practical difference between a winter pasture with plenty of grass and a haystack.

Having produced a better article than the cattlemen, the range sheep grower is enjoying a just reward. He has sent no trash to the shambles this year. Quality of the 1906 lamb crop has been superb, and abundance of grass has sent an unusually large proportion direct to the killer. At this juncture the western sheep grower is several laps ahead of the cattlemen in the race toward the perfection stage. That the cattlemen has equal opportunity is amply demonstrated when by adopting the same tactics as the sheep grower he has put his product in the same category as natives. Both grass and hay fed beef is able to hold its own in the stockyards when it carries the necessary quality, says Breeder's Gazette, Chicago.

**IN THE PIGGERY.**

**Movable Partitions That Protect Feeding Troughs.**

An authority on such matters is quoted by an exchange as follows in giving a plan for swinging partitions in the pen: "This is no new invention, for the device, with many modifications, is used in numerous farmers' piggeries. The only wonder is that it is not more universally used. The top of this swinging partition consists of a two by four from which the three foot partition made of inch boards swing by hinges. This partition is held in place at all times by a half inch iron rod which slips up and down in staples, being received at the bottom in holes bored in a hardwood cleat nailed across the center of the trough. This fastening prevents the pigs from moving the partition at any time. If the pens are over ten feet in width the swinging partitions are too cumbersome to work well. They should not be made to swing into the pen past the edge of the trough when fastened, or the pigs will soon gnaw the edge of the bottom board off. These partitions are made to swing back until they stand straight up overhead, resting at the ends between the posts. This permits pigs to be driven out or in or the cleaning of the pens from the alley. In this case doors connecting the alley and pens were purposely omitted. The troughs were made of two inch hemlock, constructed in a V shape, one side being

**BARBED WIRE.**

**A Carrier That is Convenient for Holding the Spool.**

A convenient device for holding barbed wire when making a fence is described by a writer in Farm and Home. The following, together with the illustration, explains it:

Having metal wire to stretch, I arranged a sled, as shown in the cut, for holding a spool of wire while the same was unrolled along the line of fence. The runners (A) should be two by six or eight inches and six to eight feet long. The upright post (B) should be of the same dimensions two and one-half feet high. The braces (C) may be of one by four inch stuff. Bore holes at top of (B) in which to insert the iron bar (D), as shown, for holding spool to be unwound. By fastening the end of wire to post and driving off along line of fence, wire is easily laid ready for stretching.

**Care of Bees.**

Modern hives with good brood chambers equal to the laying capacity of the queen are considered best for wintering; the stores are usually sufficient. When all breeding is over for the season the central combs are often deficient in stores. Here a good, practical feeder comes into requisition, one that can be used during the cold nights of October and that will work successfully with thick strap. Nothing is gained by compelling the bees to evaporate a large amount of water so early in the season. For late feeding use about one quart of water to every fourteen pounds of the best granulated sugar. When early feeding is practiced this strap may be used, but for late feeding we need the strap very thick, just this much so the bees can work it nicely.—American Agriculturist.

**Age of Cement Posts.**

Where live stock has access to the fence we would not advise putting them in too soon after they are made. The man who makes his own posts need have little fear if he puts them in the ground when they are a month or six weeks old. A line post four inches square at the bottom and three inches at the top is considered plenty strong enough for all practical purposes, provided it is properly strengthened by the use of an iron rod or wire. For corner posts of course much more material must be used.—Iowa Homestead.

**The Shying Horse.**

Shying is a dangerous habit. It can not properly be termed a vice, as it is generally the result of defective vision. Gentle treatment, soothing words and patient persistence in accustoming the animal to the dreaded object will often effect a cure. To lash a horse because it shies or is frightened only aggravates the evil. The punishment is associated with the frightful object, and the horse will fear it more and more each time the object is encountered, and therefore this is the worst way shying can be treated.—Denver Field and Farm.

**Irrigation Ditches.**

Among the weeds, cat tail (Typha latifolia), often called tule, has been found to almost completely clog and choke a lateral in two years. One method of clearing channels in such a condition is to stop the flow, and while the ditch bottom is still wet dig the cat tails out with sharp shovels.

**INTERESTING FOWLS.**

**Birds That Are Money Makers For Farmer or Fancier.**

The Buff Plymouth Rocks, like their kinfolk of the Rock family, are a hardy, useful fowl, good for any locality and a money maker for the farmer or fancier. They are about the same size as the Barred Rocks, the males weighing from nine to ten pounds and

**BUFF PLYMOUTH ROCKS.**

The females from seven to eight pounds. They dress nicely for market, and their yellow skin shows but little trace of plumpness.

They are good layers and good mothers and, taken all together, are ideal fowls for the American home, being even superior to the Barred variety, since they are more easily bred true to color.

We see no reason why the Buff Plymouth Rocks should not become one of our favorite breeds.—Home and Farm.

**Jerry Makes 'Em Laugh.**

The farce comedy, "Jerry from Jerry," was presented to a large and enthusiastic audience Friday evening at the Opera House and the amusing antics of the Irish comedians kept the crowded house in a roar from the rise of the curtain until the grand finale. The hero of the play was the Rory O'Moore type and his rollicking fun caught the humor of the audience from the start and laughs were continuous until the curtain went down on the last act.

During all the acts songs and dances enlivened the comedy and all the company made good on the advance agent's promises.

**Boys Were There All Right.**

Cottage Grove's Basket ball team composed of younger boys got in some good work at Eugene last Friday night as is attested by the following note from the Register.

Eugene has a boy's club that bears the high-sounding title of Cyclops club. The boys of Cottage Grove have no other name than that of their town, but they can play basketball. They put up first-class article at the armory pavilion last night. The first half the Cyclops got their wind and favor of Cottage Grove. In the last half the Cyclops got their mind and gave their smaller opponents the worst of it. The final score was Cyclops, 23; Cottage Grove 17. Both clubs put up a good game of ball but the boys of the Grove altho smaller, seemed to be able to hit the basket more accurately.

Open the bowels and get the cold out of your system. Kennedy's Laxative Cough Syrup opens the bowels and at the same time allays the inflammation of the mucous membrane. Contains honey and tar. Drives out the cold and stops the cough. Absolutely free from any opiates. Conforms to the National Pure Food and Drug Law. Pleasant to take. Sold by Benson's Pharmacy.

**Roseland Star, Roseland, B. C.**

A first class show.—Jerry from Jerry company was greeted with a large audience last evening that were more than pleased, and it was remarked by several that they never laughed so before in the life. Taken altogether, the performance was one of the best ever presented here, and it is safe that if they ever return they will be greeted with a packed house.

A man with a sprained ankle will use a crutch, rest the ankle and let it get well. A man or woman with an overworked stomach can't use a crutch, but the stomach must have rest just the same. It can be rested too without starvation. Kodol will do it. Kodol performs the digestive work of the liver, stomach and connects the digestive apparatus. Kodol fully conforms to the provisions of the National Pure Food and Drug Laws. Recommended and sold by Benson's Pharmacy.

**60 YEARS' EXPERIENCE PATENTS**

Trade Marks, Designs, Copyrights &c. Anyone sending a sketch and description may quickly ascertain our opinion free whether an invention is probably patentable. Communications should be strictly confidential. No charge for our service, except when we secure patents. Patents taken through Munn & Co. receive special notice, without charge, in the Scientific American.

A handsomely illustrated weekly. Largest circulation of any scientific journal. Terms, \$3 a year in advance. Single copies, 10 cents. For more information, send for our free circular. Munn & Co., 361 Broadway, New York. Branch Office, 66 F St., Washington, D. C.

**INDIGESTION.**

No appetite, loss of strength, nervousness, headache, constipation, bad breath, general debility, sour risings, and catarrh of the stomach are all due to indigestion. Kodol Dyspepsia Cure cures indigestion. This new discovery represents the natural juices of digestion as they exist in a healthy stomach, combined with the greatest known tonic and reconstructive properties. Kodol Dyspepsia Cure does not only cure indigestion and dyspepsia, but the famous remedy cures all stomach troubles by cleansing, purifying, sweetening and strengthening the mucous membranes lining the stomach.

Kodol Dyspepsia Cure after meals is not only thoroughly reliable digestant, but it contains great tonic and reconstructive properties as well. This famous remedy enables the stomach and digestive organs to thoroughly digest, assimilate and contribute to the tissues all of the nourishment that is contained in such food as may be eaten.

Kodol Dyspepsia Cure clears the way and makes sure the journey from sickness to health and weakness to strength. If the stomach is disordered Kodol will cure it.

Kodol Dyspepsia Cure lays the foundation for health, and the upbuilding of strength by cleansing, purifying and sweetening the glands and membranes of the stomach, and by supplying natural juices necessary to perfect indigestion, assimilation and nutrition. Kodol does what you eat, prevents colic, cholera, diarrhoea, flux, dysentery and summer complaints generally, and its use will cure indigestion and chronic dyspepsia permanently. Kodol is good alike for young and old. Your druggist sells it.

**Subscribe for the Leader.**

Mr. Lunan, father of Mrs. Henry Fischer, and his family were expected to arrive here from Menominee Michigan Friday.

**Doan's Early Risers**  
The famous little pills.

Here is our condensed opinion of the Original Laxative Cough Syrup: "Nearly all other cough syrups are constipating especially those containing opiates. Kennedy's Laxative (containing) Honey and Tar moves the bowels. Contains no opiates. Conforms to the National Pure Food and Drug Law. Sold by Benson's Pharmacy.

**NOTICE FOR PUBLICATION.**

Department of the Interior, Land Office at Roseburg, Ore. October 22nd 1906. Notice is hereby given that George W. Holland of Crow, Oregon, has filed notice of his intention to make final five-year proof in support of his claim, viz: Homestead Entry No. 9642 made Nov. 21, 1899, for the NE 1/4 Section 32, Township 13 S., Range 6 W., and that said proof will be made before W. W. Calkins, U. S. Commissioner, at his office at Eugene, Oregon on January 5, 1907. He names the following witnesses to prove his continuous residence upon and cultivation of the land viz: Frank Crenshaw of Panther Ore, Church Stephens of Crow, Oregon; Scott Gillespie of Panther, Oregon; Frank Holland of Crow, Oregon. 27-22 BENJAMIN L. EDDY, Register.
