HALF THOUSAND KILLED.

Storm Much Worse Than First Reported.

New Orleans, April 27,-Probably 500 lives lost, 100 or more persons fatally injured and many times this number fatally hurt, together with a property loss running up in the mil-lines, is the record so far of a tornade that originated in the west two days ago, sweeping Texas, Arkansas, Louisana, Tennessee and Georgia. It has left a path of death, desolation and want in its wake, seriously interrupted all communication between cities in the south, and brought about chaotic conditions in many smaller towns.

Mississippi, already a sufferer from more than one tornado this year, has again borne the brunt of the winds and those who lost their lives in that state place the death list between 150 and 175, with a thousand or more injured.

In Texas, Louisiana, Alabama and Georgia the death lists are also large, with serious loss of life in Arkansas and Tennessee. Authentic information is in many instances lacking, owing to the crippled facilities for communica-tion and the lack of time to form any-thing like an accurate estimate of the

damage done in many sections.

In half a dozen communities martial law has been declared, so terrible was

The tornado has lasted in all a period of nearly two days. It was Thursday night that damage by tornadoes traveling was first reported from points in Texas. This was followed during the next 24 hours by similar reports from Arkansas, Louisiana, Mississippi and Tennessee. Last night Alabama came within the flight of the storm and today reports of serious damage by the day reports of serious damage by the wind in Georgia have been recorded.

Utter misery of every sort was found today at Parvis, Miss., by relief parties. Despite the fact that of the 2500 inhabtants which this little town boasted yes-terday morning, there were only 900 to-day, still there were not sufficient accommodations in the wrecked village for even the wounded. Negro mammies and little black children lay wounded and selpless under the broiling Southern sun. Some had broken bones, some were part-ly crushed and others had been wound-ed by sticks and splinters. These unfor-

ed by sticks and splinters. These unfor-unates were lucky if they had a blanket or a wrecked couch to rest upon.

There was not enough shelter in the town to protect them from the sun and many of the walls which remained standing had no roofs, and by a queer freak of the tornado many of the trees which had not been presented had been which had not been uprooted had been snatched off a few feet above the ground. The grove of pines was muti-lated in such a manner that it appeared as if a gigantic seythe had swept through the grove about 25 feet above the ground.

Patrick Calhoun Also Declines to An swer Questions and Is Upheld by Court.

San Francisco, April 30 .- Patrick Calhoun and Abraham Ruef were again borne the brunt of the winds and called to the witness stand in the rains. Estimates of the number of portant national organizations, the wel-fare of which depends in greater or less degree upon natural resources, will be in attendance, and further, the pres-ident has invited five special guests, chosen for their superlative fitness, to act as "advisers at large" to the con-ference. After Calhoun was sworn he was asked by Assistant District Attorney
