The Good Time Coming.
There's a good time coming, boys,
A good time coming;
We may not live to see the day,
But earth shall glisten in the ray
Of the good time coming.
Cannon balls may aid the truth,
But thought's a weapon stronger;
We'll win our battle by its aid—
Wait a little longer.

There's a good time coming, boys,
A good time coming;
War in all men's eyes shall be
A monster of iniquity
In the good time coming.
Nations shall not quarrel then,
To prove which is the stronger;
Nor slaughter men for glory's sake—
Wait a little longer.

There's a good time coming, boys,
A good time coming;
Hateful rivalries of creed
Shall not make their martyrs bleed
In the good time coming.
Religion shall be shorn of pride,
And flourish all the stronger;
And Charity shall trim her lamp—
Wait a little longer.

There's a good time coming, boys,
A good time coming;
The people shall be temperate,
And shall love instead of hate,
In the good time coming.
They shall use, and not abuse,
And make all virtues stronger—
The reformation has begun—
Wait a little longer.

GUNS THAT MAKE NO NOISE.
May Make Assassination a Much Safer Crime to Engage In.
With the modern high-powered rifle great battles not only can be, but have been fought without the two armies engaged getting more than occasional glimpses of each other. Now comes Hiram Percy Maxim and patents a "muffler" for the high-powered rifle. It will, he says, make the gun "comparatively noiseless," and he generally describes how easy it will be for skirmishers armed with such weapons to work along an enemy's outposts and shoot the pickets without alarming the main force or revealing their own position, says the New York Times.

War has already ceased to be a spectacle, and hereafter, apparently, it is to become as dull for the ear as for the eye. A silent gun, however, is a rather alarming thing to contemplate. Not since bows and arrows went out of fashion use elsewhere than at an occasional lawn party has there been an engine that would kill at a distance without attracting the attention of everybody in the neighborhood, and while this fact has not prevented all homicide by any means, it yet has had a decidedly restraining influence on the less formal kinds, and in the days when murder was fairly certain to be punished by death the noise made in committing his crime brought many a murderer to the gallows.

One can easily imagine the interest with which the accounts of Mr. Maxim's invention will be read in Breath-it County, Kentucky. There the reportless gun, using smokeless powder, will make assassination as safe as it is popular. There will be many other demands for the new weapon, but none of them that we can think of at the moment entirely innocent.

Wasp's Jaws Make Colony's Nest.
Wasps readily succumb before the increasing cold of autumn. The few that escape the merciless scourge of mortality are the queens of next season. They pass the winter in some warm cranny, and when the spring arrives each comes forth from its hiding place and seeks a suitable place for the nest that is to be. This found, the queen repairs to a fence or tree trunk and with her jaws rasps off a bundle of wood fiber which when moistened with saliva and kneaded forms the papery substance of which the nest is entirely constructed.

Just as bees have invented a peculiar nest building material in wax, so wasps have prepared a special durable paper for the same purpose. The queen mother lays the foundations of the city with her own jaws. She attaches a sort of stalk of wood paper to a chosen support. This may be the branch of a tree, a root in a cavity below ground or a beam in a garden shed. The stalk prepared, the queen builds a few shallow cells, in each of which she lays an egg. As these mature, hatch and develop into worker wasps, the labor of the little colony is turned over to them, and thus a vast nest with thousands of cells is evolved.—Chicago Tribune.

LESE MAJESTE IN ENGLAND

Using Stamp Upside Down is Punishable.
Many people blissfully imagine that lese majeste—that is, insulting royalty—is a crime peculiar to foreign countries and unknown in free and happy Britain. That, however, is where they make a mistake, says Pearson's Weekly.

There are all sorts of pains and penalties on the statute book relative to peculiar British forms of lese majeste. Many of them have fallen into oblivion or abeyance owing to one cause or another, but they could still be enforced if those in high places claimed all they are strictly entitled to do.

It is, for instance, technically a punishable offense to stick a penny stamp on a letter upside down. Doing so is to insult the King through his effigy, and a few centuries ago—supposing penny stamps to have been then invented—might easily have landed the offender in prison on a charge of seeking to bring ridicule on the sovereign, or to express contempt for it as authority by causing his picture to stand on its head.

Also it is a punishable offense to deface a coin of the realm bearing the royal image and then deliberately put it into circulation again.

Any private individual who audaciously hoisted the royal standard over his dwelling would get into serious trouble. He would be peremptorily ordered to take it down and abjectly apologize, and if he escaped a heavy fine would have to thank his majesty's forbearance for his good luck. The royal standard is the emblem of the King's regal authority, to be displayed only where he is personally present, and for a subject to hoist it is nominally equivalent to high treason. The union jack, as the flag of the nation, is a different thing altogether, and can be displayed by anybody.

It is popularly supposed that in this country a man can get up and say whatever he likes about the sovereign with impunity. This is true only within strictly defined limits. A Socialist orator can publicly denounce the theoretical evils of monarchical institutions and announce a decided preference for a republic, and nobody can touch him. But if he once began to speak insultingly or slightly of the King personally he would be at once "run in" or at least effectually suppressed by the nearest policeman.

To strike the King would, according to the strict letter of the law, render the assailant liable to the death penalty no matter how trifling the blow was in reality.

Lieut. Pape, who is usually reckoned among those who attempted the life of the late Queen Victoria, could not have actually contemplated murder. He had no lethal weapon in his possession at the time of the outrage, but he struck her majesty across the face with his walking stick. This was sufficient to bring him within the shadow of the scaffold. He was condemned to death and would have been hanged had his sentence not been commuted.

Apart from direct methods of committing lese majeste in England—and the foregoing does not by any means exhaust the list—the unwary subjects can be guilty of the offense in a more roundabout way.

It is lese majeste to bring the King's uniform into contempt. Members of theatrical companies who have appeared on the stage as comic characters attired in discarded military or naval uniforms have occasionally been unpleasantly reminded of this fact. Careful stage managers put themselves on the safe side by seeing that no uniform, whether to be worn by the hero, villain or low comedian of the piece, is an exact copy of the real uniform of any branch of his majesty's forces.

GRASSES / ND CLOVER.

Possibilities of Its Successful Growth in Northern Idaho.
By H. T. French, Director Idaho Experiment Station, Moscow.

Much interest is being manifested in the possibility of growing grasses and clovers in the section about Moscow and other portions of Northern Idaho. This matter is of special interest at this time, for many new settlers are coming into this state from the older states, where these crops constitute a very important part of farm production.

Our experience extends over several seasons and we thought it might be of profit to learn to know what is being done in this direction on the experiment station farm.

We have undertaken to establish a seeding of clovers and grasses on a portion of the farm and herewith give a brief account of the results of our work during the past season.

Last April we plowed up ten acres of land on which wheat was grown the year before, and fitted it for the seed by harrowing twice with a fine toothed smoothing harrow. We then sowed broadcast the following mixture, covering six acres, leaving the balance until later, on account of the ground being in a lower portion of the field and too wet to work.

40 pounds common red clover,
6 pounds Alsike clover,
25 pounds orchard grass,
8 pounds timothy,
5 pounds English ryegrass,
10 pounds timothy,
4 pounds tall meadow cut grass.

This made 16 pounds of the mixture per acre. The balance of the field was sown to the same combination, at the same rate per acre, except eight pounds of alfalfa seed was added to the mixture in place of the alsike clover and timothy seed.

No nurse crop was sown with the grass mixture. And here is where many farmers make a mistake, by sowing wheat, oats or barley with the grass or clover. It is the experience of the best farmers now that it is not wise to sow a crop of grain with the seeding. The more rapidly growing grain crop takes the moisture away from the tender grass, and clover plants, and when the grain is out the hot sun burns these tender plants up.

The wild oat which is so abundant in the soil of this locality is quite enough of a nurse crop, and its attention should be given to cutting this out of the way when it reaches the proper stage. We cut two crops of wild oats from our field. The first crop made a fair yield of hay. In cutting the wild oats the mowing machine should be set high enough so that it will not cut the clover or young grass.

The last of November, when the yield was last examined, there was a fine stand of clover and of all the grasses sown, so far as we were able to detect them. Much of the clover headed out last season making a growth one foot high or more.

We Trust Doctors

If you are suffering from impure blood, thin blood, debility, nervousness, exhaustion, you should begin at once with Ayer's Sarsaparilla, the Sarsaparilla you have known all your life. Your doctor knows it, too. Ask him about it.

Use for Old Tin.
Old tin is put to a variety of uses. For instance cheap trunks are covered with tin from discarded tin cans and other utensils, the tin having been first cut to desired size and straightened and smoothed out. There are also countries in different parts of the country which make a business of removing the tin coating from old tin cans and scrap tin.

For the Housewife.
Some active women who pride themselves in housekeeping seem to forget that the object of keeping house is that human beings may be accommodated to it. Their sole idea seems to be that the house may be kept in a certain form and order; and to the performance of the form and order they sacrifice the comfort the house was established to secure.

Woman Railway Workers.
In the South of France one may see, at the little wayside stations, women attending to the signals of the half dozen daily trains; while the companies regularly economize at the level crossings by employing female labor. The husband can be seen at work at his vines upon the hillside, while the wife waves the green flag and keeps the children quiet.—Detroit News-Tribune.

Entirely Superfluous.
"A word to the wise is sufficient," remarked the man with the quotation habit.
"Wrong again," rejoined the contrary person. "A word to the wise is unnecessary."

In the Long Ago.
Cardinal Wolsey had fallen.
"I was trying to dodge an automobile," he explained, "and a roller skater ran into me."
The historians, however, with singular obtuseness, have persisted in placing the blame on Henry VIII.—Chicago Tribune.

\$100 Reward, \$500.
The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving it a permanent strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.
Address F. J. CHENEY & CO., Toledo, O.
Solely by all druggists.
Take Hall's Family Pills for constipation.

When Mrs. Carrie she became she didn't get her low, sweet voice along, and has it even yet.
But if hubby's just a little slow to answer to her call
She can jar him with a voice that cracks the paper on the wall.
—Chicago Tribune.

CASTORIA
For Infants and Children.
The Kind You Have Always Bought
Bears the Signature of *Wm. D. Fitcher*

General Debility

Day in and day out there is that feeling of weakness that makes a burden of itself. Food does not strengthen. Sleep does not refresh. It is hard to do, hard to bear, what should be easy—vitality is on the ebb, and the whole system suffers.

Hood's Sarsaparilla
It vitalizes the blood and gives vigor and tone to all the organs and functions.
In usual liquid form or in chocolate tablets known as Sarsatabs, 100 doses \$1.

Telephone Girl's Romance.
Conscientious Carrie always tried to do her best;
Never lost her temper—she was different from the rest;
Carrie was a "central," with a voice of sweetest tone,
And that is why Miss Carrie has a cottage of her own.
—Portland Oregonian.

Out of the Dim Past.
Samuel Woodworth had just written "The Old Oak Tree."
"Nothing in it," he muttered as he read it over and reflected upon the probable price it would bring.
But posterity evidently found something in it.

The proposed Henry Hudson memorial bridge will be the largest span of concrete or stone in the world. It will be 703 feet in the clear. There are some larger spans of metal.

Uncle Allen.
"Some men," muttered Uncle Allen Sparks after the tiresome speaker had sat down, "remind me of an old water mill that's running with empty hoppers. Their wheels keep on going, but they don't turn out any grain."

Lightning in South Africa.
In South Africa, where thunderstorms are terrific, lightning often strikes the beds of ironstone, and blue flames, sometimes firing buildings, are alleged to play about such ironstone outcroppings two or three hours after a storm.

FIT'S St. Vitus' Dance and all Nervous Diseases
Sufferers from St. Vitus' Dance, Hysteria, Nervousness, Headache, etc., should get FIT'S St. Vitus' Dance, 50¢ per bottle and 10¢ per box.

HAD CATARRH THIRTY YEARS.

Congressman Meekison Gives Praise To Peru-na For His Relief From Catarrh.
"I have used several bottles of Peru-na and I feel greatly benefited thereby from my catarrh of the head. I feel encouraged to believe that if I use it a short time longer I will be fully able to eradicate the disease of thirty years' standing."—David Meekison.

OTHER REMARKABLE CURES
Mr. Jacob L. Davis, Galena, Stone county, Mo., writes: "I have been in bad health for thirty seven years, and after taking twelve bottles of your Peru-na I am cured." Mr. C. N. Peterson, 132 South Main St., Council Bluffs, Iowa, writes: "I cannot tell you how much good Peru-na has done me. Constant confinement in my store began to tell on my health, and I felt that I was gradually breaking down. I tried several remedies, but obtained no permanent relief until I took Peru-na. I felt better immediately, and five bottles restored me to complete health."
A SINCERE RECOMMENDATION.
Mr. D. C. Prosser, Bravo, Allegan Co., Mich., writes: "Two years ago I was badly afflicted with catarrh of the stomach. I had had a run of typhoid fever, was very depleted. I could find nothing I could eat without causing distress and sour stomach. Finally I came to the conclusion that I had catarrh of the stomach, and seeing Peru-na advertised, began to take it. It helped me soon, and after taking three or four bottles I was entirely cured of stomach trouble, and can now eat anything."
Manufactured by the Peru-na Drug Manufacturing Company, Columbus, Ohio.

W. L. DOUGLAS SHOES
\$3.00 SHOES AT ALL PRICES FOR EVERY MEMBER OF THE FAMILY
MEN, BOYS, WOMEN, GIRLS AND CHILDREN.
W. L. Douglas makes and sells more men's \$2.50, \$3.00 and \$3.50 shoes than any other manufacturer in the world, because they hold their shape, fit better, wear longer, and are of greater value than any other shoes in the world to-day.
W. L. Douglas \$4 and \$5 Gilt Edge Shoes Cannot be Equalled At Any Price.
Beware of cheap imitations. W. L. Douglas name and price is stamped on bottom. Take No Substitute. Sold by the best shoe dealers everywhere. Stock made from factory to every part of the world. W. L. DOUGLAS, Brockton, Mass.

Juvenile Ignorance.
"Paw, why do we have to pay for the water we use? We don't have to buy our water."
"That only shows, my son, that you have never had to pay a gas bill."
"It's a mystery to me," said Uncle Allen Sparks, "that Senator La Follette, when he was counting up the men that control the money of the country, forgot to include Mrs. Hettie Green."

S.S.S. FOR BAD BLOOD

The most important part of the human system is the blood. Every muscle, nerve, tissue, bone and sinew is dependent on this vital fluid for nourishment and strength necessary to maintain them in health and enable each to perform the different duties nature requires. Even the heart, the very "engine" of life, receives its vigor and motive power from the blood. Since so much is dependent on this vital fluid it can very readily be seen how necessary it is to have it pure and uncontaminated if we would enjoy the blessing of good health. Bad blood is responsible for most of the ailments of mankind; when from any cause it becomes infected with impurities, humors or poisons, disease in some form is sure to follow. Muddy, sallow complexion, eruptions, pimples, etc., show that the blood is infected with unhealthy humors which have changed it from a pure, fresh stream to a sour, acid fluid, which forces out its impurities through the pores and glands of the skin. A very common evidence of bad blood is sores or ulcers, which break out on the flesh, often from a very insignificant bruise or even scratch or abrasion. If the blood was pure and healthy the place would heal at once, but being loaded with impurities, they are discharged into the wound, irritation and inflammation are set up and the sore continues. Bad blood is also responsible for Anemia, Boils, Malaria, etc.; the weak, polluted circulation cannot furnish the nourishment and strength required to sustain the body, and a general run-down condition of health results. S. S. S. is nature's blood purifier and tonic; made entirely of healing, cleansing roots and herbs. It goes down into the circulation and removes every particle of impurity, humor or poison that may be there, restores lost vitality, and steadily tones up the entire system. It adds to the blood the healthful properties it is in need of, and in every way assists in the cure of disease. S. S. S. neutralizes any excess of acid in the blood, making it fresh and pure, and permanently cures Eczema, Acne, Tetter, and all other skin diseases and eruptions. S. S. S. cures Rheumatism, Catarrh, Sores and Ulcers, Malaria, and all other diseases or disorders arising from bad blood. Book on the blood and any medical advice desired free to all who write.

There is Only One "Bromo Quinine"
That is **Laxative Bromo Quinine**
USED THE WORLD OVER TO CURE A COLIC IN ONE DAY.
Always remember the full name. Look for this signature on every box. 25c.

PUTNAM FADELESS DYES
Color more goods brighter and faster colors than any other dye. One 10c package colors silk, wool and cotton equally well and is guaranteed to give perfect results. Ask dealer, or we will send post paid at 10c. MONROE DRUG COMPANY, Quincy, Kansas.

STIFF, YES? WET AND DAMP CAUSE COLD IN THE JOINTS
ST. JACOBS OIL
TAKES OUT THE PAIN AT ONCE, REMOVES THE STIFFNESS, PREVENTS ITS RETURN, TOO. FINE FOR BRUISES, SPRAINS AND SORENESS.
Price 25c and 50c.
