

# My Hair Ran Away

Don't have a falling out with your hair. It might leave you! Then what? That would mean thin, scraggly, uneven, rough hair. Keep your hair at home! Fasten it tightly to your scalp! You can easily do it with Ayer's Hair Vigor. It is something more than a simple hair dressing. It is a hair medicine, a hair tonic, a hair food.

The best kind of a testimonial—  
"Sold for over thirty years."

Made by J. C. Ayer & Co., Lowell, Mass.  
Solely manufactured by  
**Ayer's**  
PILLS,  
CHERRY PECTORAL.

**Seized Her Opportunity.**  
He was not a very rapid wooer, and she was getting a bit anxious.

Again he called, and they sat together in the parlor, "just those two."  
A loud rap came at the front door.  
"Oh, bother!" she said. "Who can be calling?"

"Say you're out," said the deliver.  
"Oh, no; that would be untrue," murmured the ingenious one.  
"Then say you're engaged," he urged.  
"Oh, may I, Charlie?" she cried, as she threw herself in his arms.  
And the man kept on knocking at the front door.—Illustrated Bits.

**Classifying Him.**  
The pimply faced youth had thrown a pop bottle at the umpire.

A policeman grabbed him by the collar, jerked him to his feet, and removed his hat.  
Then he took a tape line from his pocket and measured the fellow's head.  
"Size 6," he said. "That lets you off this time, young man. But don't do it again, or back you go to the ' asylum for the feeble minded!'"

No more pop bottles were thrown from that particular section of the bleachers during that particular game.—Chicago Tribune.

**Botted Down.**  
"Tired of hearing my 'sugary words,' are you, Pulsatilla Corkins!" howled the indignant Orlando. "Perhaps you will be kind enough to tell me, Miss Corkins, what a sugary word is! What is it made of?"

"It is made, Mr. Spoonamora," answered the fair Pulsatilla, "of verbum sap."  
Without another word of any description Orlando Spoonamora grabbed his hat and groped his way out into the darkness of the night. The blow had crushed him.—Chicago Tribune.

## One of the Essentials

of the happy homes of today is a vast fund of information as to the best methods of promoting health and happiness and right living and knowledge of the world's best products.

Products of actual excellence and reasonable claims truthfully presented and which have attained to world-wide acceptance through the approval of the Well-Informed of the World; not of individuals only, but of the many who have the happy faculty of selecting and obtaining the best of the world affords.

One of the products of that class, of known component parts, an ethical remedy, approved by physicians and commended by the Well-Informed of the World as a valuable and wholesome family laxative is the well-known Syrup of Figs and Elixir of Senna. To get its beneficial effects always buy the genuine, manufactured by the California Fig Syrup Co., only, and for sale by all leading druggists.

## Libby's Food Products

### Libby's Veal Loaf

is made of the best selected meat, scientifically prepared and evenly baked by damp heat in Libby's Great White Kitchen. The natural flavor is all retained. When removed from the tin it's ready to serve.

It can be quickly prepared in a variety of styles and nothing makes a better summer meal.

In the home, at the camp, and for the picnic Libby's Veal Loaf is a satisfying dish, full of food value that brings contentment.

Libby, McNeill & Libby, Chicago.

# FARMS AND FARM

## Cabbage Worms.

When the first appearance of the worm is made the plants should be dusted with the paris green and flour mixture. When the heads are forming use one pound of pyrethrum powder to four pounds of flour to dust the plants. This is harmless to man. After the head begins forming paris green should not be used. Those who are afraid to use paris green are generally successful by beginning early to use the pyrethrum powder and spraying often.

Cabbage and other plant lice are best controlled by spraying with kerosene emulsion, using the 15 per cent solution of kerosene. If the lice are on trees, flowers or rose bushes, tobacco decoction may be used with good results. The tobacco decoction is made by taking three pounds of tobacco stems and five gallons of water and boiling for two hours. It is used without diluting, but must not be applied too hot, or it may scald the plants.

If treatment is begun in time plant lice can be controlled. It must be done before the leaves are curled so the spray can reach the pests. There should be several sprayings, four or five days apart, as one spraying will not completely do the work. Clean culture is important in fighting these insects, as with many others.

## Wasted Road Money.

In a recent speech at Peoria, H. H. Gross, secretary of the Farmers' Good Road League and special agent for the National Department of Agriculture to study the question of highways, made the following statement: "In forty years enough money has been thrown away and squandered on the dirt roads of Illinois to pay for graveling or macadamizing every foot of highway in the State." He went on further to state that as good, hard roads could be built on the black land in the corn belt of Illinois as in Massachusetts, or in any other State, and at a moderate annual expense to the landowners of the State, possibly not exceeding their present annual tax for road and bridge purposes.

## Automatic Dump Wagon.

The ease with which modern dump carts and wagons can be unloaded is illustrated in the automatic dump wagon shown in the accompanying illustration, the invention of a Connecticut man. The wagon box is pivoted on the

OPERATING THE DUMP WAGON.

axle, the greater portion of the load being in back of the pivot point. The forward end of the box is normally held in position by a lever directly behind the driver's seat. When ready to dump the load the driver turns in his seat, releases the lever and the load automatically turns over. The driver is thus not compelled to leave his seat, saving considerable time.

## Smoothing Drag.

To break down clods and give a fine surface the field drag serves a useful purpose. It may be used in connection with the spring tooth harrow or even with the disk. The six inch pieces are 6 to 10 feet in length and are laid edgewise, being bound together by cross pieces made of 1 1/2 x 6 inch stuff.

## The Pacing Horse.

We have known of many animals that have acquired the habit of pacing because of becoming sore forward. The fore feet and legs do not assist in the efforts of propulsion, their office is simply to hold up or support the fore and heaviest part of the animal, and as it must keep these fore feet out of the way of the hind ones, a horse will endeavor to do so in the most awkward of ways at times, for when sore forward it takes to any sort of a gait that to its mind appears to lessen the pain of action. It quite frequently adopts the single foot action, gradually progressing into that of pacing. It was this soreness forward—and he was actually lame—that caused the great Jay Eye See to pace.—Field and Farm.

## Ruta-Bagas.

Prof. Rane of the New Hampshire Experiment Station recommends the American purple-top ruta-baga for the reason that it is a fine market sort, often selling in the markets for double the price of the early white turnip. It is also a splendid keeper, and is usually free from sponginess. While it can not be planted as late as the early turnips, it can be used as a follow crop after early peas, provided the seed is sown not later than July 10.

## Treatment for Loco.

The results of the loco weed when eaten by stock are unpleasantly familiar to the stockman of the plains east of the Rocky mountains. It has been estimated that the losses from this source in Colorado alone have reached the sum of a million dollars per annum. The national bureau of plant industry has been taking a turn at the loco problem, and C. D. Marsh, expert in poison plants, reports that it has been found that locoed cattle can in most cases be cured by a course of treatment with strychnine, while locoed horses can generally be cured by a course of treatment with Fowler's solution. The animal under treatment must not be allowed to eat the loco weed and should be given not only nutritious food, but so far as possible, food with laxative properties. To this end magnesium sulphate was administered to correct the constipation which is almost universal among locoed animals. It should be noted, too, that magnesium sulphate may serve to some extent as an antidote to the poison.

It may be added in regard to the question of immunity that loco poisoning comes on in a slow and cumulative manner, so that there is no possibility of animals becoming immune.

## Southport Globe Onions.

Connecticut's famous Southport Globe onions stand unsurpassed among popular American varieties of the onion. They are in high favor in some of the finest commercial onion growing districts of Ohio and New York and during a few years past have made a steady advance in standing everywhere as a highly bred, perfect onion. Eastern onion growers use the red and white Southport Globes to produce the exceptionally large, solid, beautifully formed bulbs that bring top prices in the New York City markets. Besides the two varieties named, there is a yellow Southport Globe that resembles the others in shape and general character, but is of a rich yellow color.

The white is one of those beautifully white, perfectly globe shaped onions that take the eye and bring highest price in any market. Its skin is thin and paperlike, the flesh fine grained, crisp and mild flavored. Add to this that it is a tremendous cropper, and it represents almost an ideal product in its line.

WHITE GLOBE ONION.

**Disk Plows.**  
The twenty-four-inch size disk plow can safely be recommended as being superior to any other size. The smaller size pulls easier, but it does not pulverize the soil so well. The disk plow is capable of handling ground that has become too dry and hard for the moldboard plow. It is of somewhat lighter draft, does not require sharpening so often, cuts through trash better and does not clog so easily. Do not try to cut a furrow wider than eight or ten inches with a disk. The wider the furrow the deeper will corrugations be and the poorer will be the work. It is better to use two twenty-four-inch plows, each cutting eight inches in width, than to use a single twenty-eight or thirty-inch plow cutting sixteen inches.

## Tuberculosis.

Recently at the Iowa Experiment Station twenty pigs were fed for a time on tuberculosis cows' milk that had not been pasteurized, and twenty others were fed on tuberculosis milk that had been pasteurized. The twenty pigs fed on the raw tuberculosis milk all died of tuberculosis, and two of the other pigs died with the same disease. That showed that pasteurizing the milk gave 80 per cent of protection.

## Wants a New Wheat.

Prof. Herbert F. Roberts of the Kansas State Agricultural College and Experiment Station will visit Europe during the summer. He is commissioned from the Kansas Experiment Station to inspect the wheat regions of Central and Southern Europe in search of superior sorts of hard wheats for introduction into Kansas.

## Farm News Notes.

In New Zealand the best demand is for Shorthorn bulls of the milking strain.  
Kangaroo rats are destroying the vineyards near Santa Cruz, Cal. They have appeared in thousands and are feeding on the young buds and vines.  
Secretary Wilson says we ought to have bumper crops throughout the country this season. All conditions are favorable for record-breaking yields of all sorts.  
A Connecticut farmer is reported to use the incubator system in starting his potato crop. The seed potatoes are placed in a warm room in a rack, where they sprout, and are then transplanted in the field.  
A story comes from Washington, Pa., that a farmer has a sheep-killing horse. The animal was seen to rush into the flock, trample a sheep to death, pick it up in its teeth and carry it out. The performance was repeated until the farmer interfered.  
While attending a mule on a farm in Morgan County, W. Va., Frank Culp, a farm boy, was attacked by the animal and had his leg nearly chewed off.  
Texas raises one-fifth of all the cattle in the United States, but they are at all finished in that State. A few days ago 10,000 Panhandle steers sold for \$250,000.  
While one class of stock may pay better than another, do not lose sight of the fact that the average farm needs a few head of every sort in order to make the best and closest use of all the products.

## GRANGE DECLARES ITSELF.

Outlines Plan of Action on Irrigation Question.

Resolutions unanimously adopted by the Oregon State Grange at Eugene, May 14, 1908, upon the following motion: Moved that the resolutions be adopted as read and referred to the committee on legislation, with power to prepare a bill as outlined therein, submitting the same to the next session of the legislature for adoption, and further, that the chairman of the legislative committee be authorized to invite such state or national experts on water legislation who can be secured to assist the committee in preparing such bill, also one representative from each state organization which may hereafter adopt substantially similar resolutions.

## Resolutions.

Whereas, Titles to water are of equal importance with titles to land, and it appears that a water right should be as easily ascertained, as clearly defined, as secure and in all respects as definite as a perfect title to land; and, Whereas, It is apparent that without a definite system of water right titles, and adequate protection by the state, our water users are burdened with costly, and apparently unending litigation; our present constructed works are depreciated in value, and the United States hesitates to construct irrigation systems; private capital declines to invest; home-seekers go to other states and countries, where the purchase of an irrigated farm does not mean the purchase of a lawsuit, and thus our development is seriously retarded; and,

Whereas, Our present water laws cannot be found by a study of the statutes alone, but must be sought for in a long series of decisions by our supreme court, and apparently are so conflicting that our ablest lawyers differ in opinion on the most fundamental points. This law is incomplete and inadequate, and has been, and is, in a state of flux. Disputes are decided by the logic of judges, rather than by statutes of the legislature. Few know what the law is today, none know what it may be tomorrow; now, therefore, be it

Resolved, That it is the sense of the Oregon State Grange that it is the duty of the state of Oregon, at the earliest possible time, to codify and enact a complete, concise, and definite water law, leaving to the courts only the mere interpretation of this law on such occasions as might be brought into dispute; and be it further

Resolved, That such water law should be based upon the best experience of other states and countries, such as Wyoming, Idaho and Canada, and should include the following fundamental principles:

1. That no water right should become vested except by direct grant from the state.
2. To provide a system whereby the priority and limitations of every existing right to the use of water can eventually be ascertained.
3. To provide a reliable record in some central office of all water rights as determined, and of new rights as initiated.
4. That actual measurements of ditches and streams be made as a basis for the adjudication of existing rights and the initiation of new rights to the surplus water, if any.
5. To provide a definite procedure whereby rights in such surplus water may be acquired.
6. That beneficial use should be the basis of all rights to the use of water, and that water for irrigation purposes should be made appurtenant to the land irrigated.
7. All rights to the use of water for power development should be limited to a period of twenty-five years, subject to renewal under certain restrictions.
8. To provide an efficient administrative system with proper officers, for the distribution of the water supply among those entitled to its use.

## QUERIES BY FARMERS.

### Experiment Station Called Upon for Advice on Various Subjects.

From the Washington State College, Pullman.  
A correspondent at Cheney writes the following letter to the station: "I am interested in the subject of bacteria as an agricultural agency, and would like to know if anything is being done by the government along the lines of bacteria research. I have a number of bacteria cultures likely to prove an important factor in the agriculture of the inland Empire? To what extent are fertilizers used in the Northwest, and with what efficiency? Please give me some information concerning the new theory of 'soil poisoning' by successive crops?"  
Following is the reply given to this letter: "At this station we have tested several different cultures, some of which were successful, while others failed. We have found that in the laboratory and greenhouses, where conditions could be controlled fairly well, the cultures possessed values. We are not sure that their use will become general, for most of the commercial product does not show up very uniformly. We have depended more largely on the use of innocuous soil from old alfalfa fields, in getting a stand of alfalfa, than on the bacteria. "Fertilizers have not been very thoroughly tested in eastern Washington, but we are learning that many of our soils may be vastly improved by certain treatments. The indications are that fertilizers will be used in the near future, more as a corrective agency, than to increase fertility. The theory of 'soil-poisoning' is based on the fact that where a soil is overcharged with some element the excess of this element becomes injurious to vegetation. It is necessary to counteract this by the use of some chemical fertilizer."

### A Look Ahead.

The safe and sane Fourth of July had come.  
"But how are the boys observing the day?" asked the foreigner, who had just landed. "I don't see any about."  
"The boys?" said the native. "The last of 'em, sir, were all killed off one year ago to-day, and the new crop hasn't come on yet."  
Marvelling at the change times had brought about, the stranger followed the crowd to the ball park, where the real celebration was in progress.

### A Disappointment.

"Have you done anything to popularize yourself?"  
"Yes," answered the youthful politician, "but in vain. I can't get the public to call me by my first name or make fun of my fancy waistcoat."—Washington Star.

### Not Only Let Night.

"I understand she refused to marry you last night."  
"Worse than that."  
"Worse?"  
"Yes, she refused to marry me at all."—Houston Post.

## FACTS IN TABLOID FORM.

The railways of Siam have a total length of 485 miles.

Romania is said to hold the prize for illiteracy. Two-thirds of the population can neither read nor write.

The Church of England Waifs and Strays Society has taken care of 13,476 children in the twenty-six years that it has been in operation.

Yuan Shi Kai is urging the Chinese throne to establish a government department to deal with missionary affairs, something that all mission workers will welcome.

The Protestant, Catholic and Jewish denominations of Oakland, Cal., have organized under one constitution a society of the pastors to help along the church work of the city.

About forty different kinds of whales and dolphins are known, and although they live in the open sea and look like fish they are not fish at all, but are true mammals, breathing air and feeding their young on milk, like cows and horses.

The Belgians are the greatest drinkers of French champagne, 71,000,000 liters being exported there last year. The British showed a fondness for Bordeaux wine, importing 58,000 hectoliters, against 14,000 sent to the United States and 13,000 to Germany.

France was in 1907 the world's chief wine producer as well as consumer. The total crop for the year was 146,000,000 hectoliters. Of this France grew 66,000,000 hectoliters, Italy was represented by 33,000,000, Spain by 17,000,000, Portugal by 4,000,000, Austria by 3,000,000 and Germany by 2,000,000.

Changes on the moon's surface, especially near the crater Linnæus, are now recognized by Pickering, Barnard and others. It is concluded that the dimming of a white patch must be a melting of hoar frost at sunrise and that the deposition and melting of frost must be taking place in other parts of the moon.

One one occasion when in Congress Gen. Benjamin Butler arose in his place and intimated that the member who occupied the floor was transgressing the limits of debate. "Why, general," said the member reproachfully, "you divided your time with me." "I know I did," rejoined Butler, grimly, "but I didn't divide eternity with you."

To the long list of London clubs there must now be added the Poets' Club, which has been formed for the purpose of revivifying the neglected art of verse making. Henry Simpson is the first president and the members already elected include Mr. and Mrs. Walter Crane, Horace Wymdham, Mr. Atterbury, Miss Helen Taylor and Frederick Moore.

At an election meeting Dr. Macnamara, of the British Parliament, was tackled by a woman, who inquired: "Are you in favor of repealing the blasphemy laws?" "Madam," replied the doctor, "I am a golfer!" "Would you give every woman a vote?" asked another. "Every woman should have either a vote or a voter," said Dr. Macnamara. "Which do you prefer?"

French people have decided views regarding the responsibility of men in power. A butcher has been sent to jail for a year for supplying the army with bad meat. The damages assessed by a Paris court following a recent automobile accident cost the owners \$25,000. When the Opera Comique burned in 1887 the managing director was fined \$10,000 and sent to prison for three months.

The sum of \$417 an hour and no interference by trades unions, seems a fair wage, even for those in the first rank of the bullfighting profession. Whether the remuneration is adequate in view of the risks incurred may be open to discussion; certain it is, an expert in the Madrid Epoca tells us, that bullfighting is such an eminent, healthy occupation that its followers, if they retire unhurt, invariably reach a green old age.

The question as to whether turned up trousers had gone out of style was referred to the editor of the Sartorial Art Journal, who said that men who have to walk in wet weather will turn up their trousers as they always have done and the fools who turn up their trousers here in fair weather because "it's raining in London" will continue to do so until their mental condition changes. "But," he said, "the turned up trousers for dress never were in style."

A story of a plot to kidnap Queen Victoria and turn England into a republic is told in Peter Latouche's book, "Anarchy: Its Methods and Exponents," just published. This coup d'etat was planned to take place in 1888, the year of the great dock strike in London, but was frustrated by the success of the strikers and the unexpected sympathy and help shown them by the moneyed classes. This did much to conciliate the masses, on whose help the revolutionists relied.

A new race peril is brought to notice by Prof. Karl Pearson from his investigations in England on the inheritance of tuberculosis. He finds that the first one or two children born are more likely than others to be tubercular and to inherit defects of the parents, and the modern tendency to limit families to one or two children, therefore, not only makes no allowance for the inevitable waste of child life, but also must increase the proportion of weak and diseased individuals in the community.

### Babies' Club.

A Paris Journalist has founded a babies' club. It is a spacious and pleasant building, with a garden, and a club house, where games of all kinds are provided. There is a Punch and Judy show, with a cafe, where sweets, cakes, tea, milk and various kinds of lemonade are sold to members and their parents, while there are also toy shops and a theater.

There isn't anyone in the world who is true to somebody else in every thought.

# S.S.S. SKIN DISEASES

When the blood is pure and healthy, the skin will be soft, smooth, and free from all blemishes and eruptions; but when some acid humor takes root in the circulation, its presence is quickly manifested by some form of skin disease. The skin receives its necessary nourishment and strength from the blood. When, however, this vital fluid becomes a humor-laden stream, it can no longer preserve the healthy, natural appearance of the skin, but by its acrid, impure nature continually irritates and inflames the delicate tissues and fibres and keeps the cuticle in a diseased and disfigured condition. External applications cannot reach the blood, and therefore are beneficial only for their ability to reduce inflammation, and assist in keeping the parts clean. To cure any skin trouble the blood must be purified of the humors that are causing the trouble. S. S. S. drives out the humors from the blood so that the skin, instead of being irritated and diseased, is nourished by a healthy, cooling stream. S. S. S. goes down into the circulation and removes every particle of impure matter, all acids and humors, and restores the blood to its normal, pure condition, thereby curing every form of skin disease or affection. Book on skin diseases and any medical advice free to all who write.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

# MULE TEAM BORAX

A heaping teaspoonful to a gallon of hot water will cleanse your china plates, cups, earthenware, cutlery and kitchen utensils from dirt and grease leaving neither taste nor smell. All dealers. Sample free. Booklet and Dealers for Large Territories. Stamped ready to work, 10c.

**Hard to Please.**  
Eminent Statesman—What are the latest newspapers saying about me now, Chicksey?  
Private Secretary—They haven't mentioned your name for a month, Senator.  
Eminent Statesman—Blank dash the newspapers!

**Logical Inference.**  
Scapgrace Nephew—Uncle Henry, ever since I've known Miss Hope I've been a different man.  
Indulgent Uncle—Then you must have improved a little, my dear boy!

Mothers will find Mr. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

**Logical Supposition.**  
Little Lloyd—Papa, was George Washington married to England?  
Papa—Of course not, my son. Why do you ask such a silly question?  
Little Lloyd—This book says England is our mother country, and as George Washington was the father of his country I supposed they were married.—Chicago News.

**St. Vitus' Dance and All Nervous Diseases** permanently cured by Dr. King's Great Nerve Restorer. Send for FREE trial bottle and treatise. Dr. J. C. King, 101 Arch St., Philadelphia.

**Within Her Rights.**  
"Madam, what is your age?" asked the lawyer.  
"I decline to answer," responded the witness.  
"On what ground?"  
"On the ground that it would convict me of lying. I've always answered that question when not under oath."—Washington Herald.

**You Can Get Allen's Foot-Ease FREE.**  
Write Allen S. Olmsted, Le Roy, N. Y., for a free sample of Allen's Foot-Ease. It cures sweating, hot swollen, itching feet. It makes new or tight shoes comfortable. Cures corns, ingrowing nails and bunions. All drug stores sell it. 25c. Don't accept any substitute.

**Relative Submergence.**  
"My poor man, you look as if you might have been better days."  
"You are right, ma'am. I have."  
"And now, I presume, you are among what we call the submerged tenth."  
"Worse than that, ma'am. I am an infinitesimal fraction of the submerged thousandth of the submerged tenth. My present occupation is stoking on an ocean steamer."

**How's This?**  
We offer One Hundred Dollars Reward for any man of Color who can be cured by Dr. J. C. Moore's Catarrh Cure. We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all his business transactions and financially able to carry out any obligation made by him.  
WALTON, KINNAMAN & MARVIN, Wholesale Druggists, Toledo, O.  
Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all Druggists. Take Hall's Family Pills for Constipation.

**A SURE CURE**  
Just Received from Peking, China—Safe, Sure, and Reliable.
