Room for You In Cottage Grove

Cottage Grove is in the Sunny South of the beautiful Willamette Valley and is at present the center of the largest body of standing timber in the world, of commercial value.

Cottage Grove offers more opportunities in every line of industry than any like area in the Pacific States. The geographical location makes this point the chief trading center for the thirty-one sawmills, logging camps, gold, silver, copper, lead and quick silver mines which lie within a radius of thirty miles.

This section is the home of the famous Comice Pear and every variety of American Grapes. Spitzenberg, Yellow Newton and Baldwin Apples here attain perfection and are eagerly sought for by the New York buyers. This can be wondered at by those who are not familiar with the fact, however, New York fruit raisers are coming here and purchasing land upon which to raise the above mentioned fruits.

This section is adapted to the raising of every known variety of fruit that will exist outside of the tropics, for with an elevation of 671 feet and no prevailing high winds or sudden climatic changes, the conditions as found here that conform to the requirements of all fruits.

If you are an energetic citizen, wanting to improve your condition physically or financially, do not grab at a straw, but investigate this section, for there is "Room for you in Cottage Grove."
