Road and Bridge Building.

Road supervisor, Scott Chrisman has a crew of workmen grading and filling the new road from the Currin bridge to the site of the proposed new steel bridge across Row river at the Spray place, a distance of approximately two miles, and when it is finished it will be one of the best pieces of road in this neighborhood. The Penn Bridge company will begin the construction of the \$8,600 steel bridge within a short time, and will rush the work as rapidly as possible. This new highway will prove advantageous to many residents of the Row river valley, as it lessens the distance to Cottage Grove over a road of modern construction.

AN ANNOUNCEMENT AND A REQUEST.

We desire to say to our patrons, that in order to complete the improvements begun some time ago and give you the best possible service, we are compelled to install a new boiler. To do this we must remove one of our old ones. This will make it necessary to carry the entire load with one boiler while the work is being done. With the help of our new water heater, just installed, and your hearty co-operation we can do it without inconvenience to any one. Therefore we ask that all use their lights as economically as possible from 8 to 10 p. m. as this is the only time we will have any difficulty in doing the work. We will pull the fire Saturday night the 28th, and crowd the work to the limit 'till finished. We ask you further to not call up the power house during this time. If there is any trouble call the office, Mr. Shiun or Mr. Kem.

Thanking you in advance for your co-operation, we are yours for better lights.

Expert Piano Tuning.

Harry S. Webber, a well known and highly esteemed citizen of this community, has recently completed a several months course in piano tuning and repairing, completing the series of instructions with a standing of 100 in every department of the work. Mr. Webber is a natural musician, with an ear trained to music and is a retired locomotive engineer, hence thoroughly mechanical. It is therefore assured that this make-up of a man can but become a most proficient operator in his recently chosen line of work. His specialties are piano tuning, voicing, action regulating, French polishing and repair work of all kinds on piano, reed and pipe organs. His work is guaranteed and his prices are very reasonable. Keep your money at home by patronizing a home specialist when you have any work in Mr. Webber's line. A piano is a delicate and valuable instrument, and its care should be entrusted only to an expert. Piano tuning well done lengthens the life of a piano while poor tuning ruins it. Mr. Webber holds a diploma from the largest and best school of piano tuning in the world, and he guarantees perfect finished work in every case. A post card mailed in this city will reach Mr. Webber promptly. We learn that Mrs. Webber, who is a splendid pianist is also an expert piano tuner having taken this course along with her husband.

An Explanation.

The general surprise that the Memorial service of last Sunday was not a union service calls for a word of explanation. Recently the decision was handed down that union Memorial services are not, nor have they ever been, customary in Cottage Grove. Those who have faint and far away recollections of a union Memorial service at the Presbyterian church last year, and of a like service the year before at the Methodist church, are advised to brush and oil their mental mechanism, for their "recollections" have surely slipped a cog. The above explanation may disabuse the minds of those who have the erroneous impression that religious partisanship, with its usual narrowness, has been in evidence in this matter. W. A. ELKINS.

A merry crowd of twenty-two young people greatly enjoyed a hay rack ride to Ernest Sears farm and return Saturday evening. Games were played and ice cream and cake was served.
