Nursery "Don'ts"

Don't treat children's troubles lightly; their trials are as big to them as those of grown-up people. Don't fall to instill a deep sense of kindness to dumb animals—a cruel boy generally makes a cruel man. Don't neglect an untruth or dishonorable action—teach your children to face these out and it will make them courageous. Don't encourage whining or tale-telling. Don't lose your children's confidence—try to live close to their hearts.

What Ailed It.

"I wish you would tell me what the trouble is with this watch," said the customer, handing it to the jeweler.

"The trouble," said the jeweler, looking at the number of the timepiece and referring to his ledger, "is that I haven't been paid yet for the cleaning I gave it two years ago."

Had Figured It Out.

"If you get strictly fresh eggs," the city man was saying, "you've got to pay for them."

"That's so," remarked the suburbanite. "Mine have cost me \$2.87 1/2 a dozen this winter."

"Impossible!"

"Not at all impossible. I keep half a dozen hens."

New York's First Ferry.

Cornelius Dirksen was the first official ferryman on the Island of Manhattan. The mooring place on the Manhattan side was about where Water street crosses the present Peck slip. He started the system in 1637. Passengers who wanted to be rowed over blew a horn for the skipper if he chanced to be absent when they arrived. From Dirksen's skill grew the present ferry system of the city.

PREVENTION THE BEST SAFEGUARD

If for any cause the horse or other domestic animal exhibits a lack of energy, proper relish for food, or an appearance of general debility, timely action should be taken for the restoration of its health. In the natural food of our domestic animals Nature provides certain peculiar medicinal herbs, leaves, barks and roots which seem necessary for their health. **Pacific Stock Food** in greatly condensed form is intended to supply the essential virtues of those health-giving natural remedies and is prepared expressly for those animals deprived by man of their natural food. It is an alternative tonic which stimulates the various organs of the body, promotes the secretions, tones up the general system and restores the disordered conditions to a normal state. It stimulates the appetite, improves the digestion and assimilation of food, purifies the blood and insures a good, healthy condition. Booklet free.

Many Women who are Splendid Cooks

dread having to prepare an elaborate dinner because they are not sufficiently strong to stand over an intensely hot coal range. This is especially true in summer. Every woman takes pride in the table she sets, but often it is done at tremendous cost to her own vitality through the weakening effect of cooking on a coal range in a hot kitchen.

It is no longer necessary to wear yourself out preparing a fine dinner. Even in the heat of summer you can cook a large dinner without being worn out.

New Perfection
WICK BLUE FLAME
Oil Cook-stove

Gives no outside heat, no smell, no smoke. It will cook the biggest dinner without heating the kitchen or the cook. It is immediately lighted and immediately extinguished. It can be changed from a slow to a quick fire by turning a handle. There's no drudgery connected with it, no coal to carry, no wood to chop. You don't have to wait fifteen or twenty minutes till its fire gets going. Apply a light and it's ready. By simply turning the wick up or down you get a slow or an intense heat on the bottom of the pot, pan, kettle or oven, and nowhere else. It has a Cabinet Top with shelf for keeping plates and food hot, drop shelves for coffee, teapot or saucepan, and even a rack for towels. It saves time, worry, health and temper. It does all a woman needs and more than she expects. Made with 1, 2, and 3 burners; the 2 and 3-burner sizes can be had with or without Cabinet.

FACTS IN TABLOID FORM.

London has 2,151 miles of streets and 390 miles of tramways.

The harpy eagle of Brazil feeds exclusively on monkeys.

The eggs of wild birds are smaller than those of the same species of birds when domesticated.

No fewer than 60,407 articles found in public carriages were last year taken to Scotland Yard, London.

Of all places of importance, Sydney, New South Wales, is farthest from London as the crow flies—10,120 miles.

St. Louis has a concrete building fifty-seven feet high, which is entirely without windows. The illumination is by means of skylights in the roof.

An Irish woman, Miss Lillian E. Bland, has designed and built for herself a biplane glider twenty-eight feet wide. Several satisfactory flights have been accomplished with the machine controlled from the ground by ropes. The engine and propellers will be fitted later.

Use of tobacco is universal in the orient, and the word cheroot and its use come from Madras. The first cigars seen by Columbus were wrapped with corn shucks. Some Himalaya tribes take the leaf of the palmas and, with a cunning twist of the wrist, make the bowl and long, narrow stem of a pipe in the most perfect way.

Miss Helen V. Carson of Bedford, Ia., has entered upon her second year as superintendent of the high schools of Exira, Ia. She was recommended by the Governor of Colorado for the place and was just twenty-two, when she was elected. She is said to do the work just as well as her masculine predecessor and to receive the same salary.

It is estimated that there are 250,000 hives or colonies of bees in Switzerland, each of which produces forty pounds of honey during the season, a total of ten million pounds a year. The average price of Swiss honey for the year 1909 was 25 cents a pound, giving the year's product a total value of \$2,500,000, which is mostly profit, nature providing the raw material in an abundance of flowers.

Hookah, the hubble-bubble or Turkish water pipe, is always being smoked by Burmese women, partly because they like it, but mainly to supply the men with nicotine water. This hubble-bubble nicotine water habit is, in fact, a lazy form of tobacco chewing. A mouthful of the nasty beverage is held in the mouth as long as possible. They carry about gourds full of it, and claim it preserves their teeth, and it may.—New York Press.

In our army machine guns have been supplied from time to time, but only experimentally and not as an intrinsic part of the army organization. The question has been studied, no doubt, by the general staff, but the definite organization and supply of this new arm has been postponed to make way for other more pressing considerations and also to profit by the experience of European nations before adopting any definite organization or tactics for this new but highly important arm of the service.

Some English seem to think all meats coming in should be marked either "foreign" or "colonial" to show the buyer that he was not getting English meat. Every one of the chief joints would have to be stamped, and the exporter would have to do the stamping. Further, the butcher dealing in "foreign" as well as English meat must announce the fact on his shop front, so that his customers may know he deals in both foreign and English meats. Some of the farmers complain that much foreign meat is passed off as English to bring down their prices.

"Mob" is the only one of the abbreviated words protested against by Dean Swift which has conquered even the purists of speech. "Inco" is still short of respectability, and "phiz" (physiognomy) very far so. However, other abbreviated forms have won. A cabriole is a "cab" to everybody now, though to Dickens' Mr. Riddle it was still a "cabriole." "Miss" for "mistress," "piano" for "pianoforte" and "sweets" for "sweetmeats" are universal. Nevertheless, many people still apologize for "bus" instead of "omnibus" and wage a losing fight against "phone" and against "photo."

Consul Thomas H. Norton, of Chemnitz, tells of the importance of the potato in the life of Germany. "The potato occupies a relatively more important position in Germany than in other European countries. It is not only employed largely for food for both man and beast, but also for conversion into starch and alcohol. The 1908 crop was estimated at 46,500,000 metric tons (51,256,950 short tons), 12,000,000 tons being used for human food and 19,000,000 tons for feeding domestic animals. Starch factories utilized 1,500,000 tons, distilleries 2,500,000 tons, while 5,500,000 tons were required for seed."

Miss Bessie M. G. Dare, of Bowshot farm, whose marriage has taken place at Wootton-Fitzpaine church, enjoys widespread fame as an expert in dairying. She has won over a hundred prizes, certificates and medals for her butter making, her fancy designing in butter gaining for her high distinction. She was champion silver medalist for milking at the Bath and southern counties' show in a competition open to farmers' wives and daughters throughout the kingdom. Out of one hundred competitors in each contest she won the two champion certificates at the British dairy farmers' show at the agricultural hall.—London Standard.

The proposed home for indigent southern women in New York has met with such generous support on the part of northern women that the plans have been changed and widened. Instead of building the home in Virginia, as was at first proposed, it has now been determined to erect it near New York and to open it to both northern and southern women. It is planned to conduct it along the lines of the Louise home in Washington, where President Tyler's daughter spent her last days. The only restriction will be that the inmates shall be of gentle birth and respectable. Mrs. Le Roy Brown is at the head of the committee which is raising the necessary funds.

FASHION HINTS

This amethyst linen suit was charming with its simply shirred waist, and the embroidery of amethyst and white. The shirred sleeves were of very sheer batiste.

The jaunty black and white hat had an owl's head as the only trimming.

SINGULAR JEWELRY.

The esthetic and decorative uses to which barbarians will turn objects which to civilized races are things of the humblest utility are amusingly illustrated by this "fashion note" from West Africa, taken from an Italian newspaper:

For some time the officials of the German colony in Southwest Africa noticed that the telegraph wires and other accessories of the electrical plant disappeared as by magic immediately after they had been put up. The most diligent inquiries remained fruitless.

From other parts of the German possessions came reports of strange predilections for articles of German commerce, as, for example, rubber heels, garters, buckles and so forth, things which the natives of those countries do not generally use.

The governor of the colony gave an entertainment one year in honor of the emperor's birthday, and invited the chiefs of the different tribes to it. What was his surprise when he saw these native gentlemen appear with his stolen telegraph wires twisted round their illustrious necks. The higher the dignity the more rings of the wire were round the neck.

Inquiries were soon started in the outlying villages, and it came to light that the white china insulators of the telegraph poles had become ear rings. A young lady of the highest distinction in native society wore a rubber heel hanging from her nose, and a young man who was a well known dandy wore dangling from his ears a pair of beautiful pink silk garters.

A Substitute for Alcohol.

The tendency of people to contract some sort of another habit is shown by the common use in various countries of tobacco, tea, coffee, opium and the like. In Abyssinia and parts of Arabian Turkey the place of alcohol is taken by the kat plant, which the natives almost universally chew. In parts of Abyssinia certain tribes chew the leaves of the kat plant commonly when they are compelled to exert special or long-continued effort, the immediate effect of which is to produce an agreeable sleeplessness and stimulation. The freshly-cut leaves have a rather pleasant taste, and produce a kind of intoxication of long duration, with none of the disagreeable features of ordinary inebriety. Messengers and soldiers are enabled, by chewing the leaves, to go without food for a number of days.

In parts of Arabian Turkey there are cafes for the consumption of the kat plant which correspond to the cafes in Europe and America where coffee and alcohol are used.

Ready to Exchange.

"I was ready to-day about the cat exchange they have in Paris."

"I wish we had one here. I've got a cat at home that I'd exchange for a bogus check on a busted bank and throw in the car fare to boot."—Cleveland Plain Dealer.

In trying to gather the news, reporters are greatly annoyed by the jolly jokers; so many men want things printed as "jokes" on others.

An Auto Tragedy.

Voice from within the taxicab— "Shay, choofer, how much do I owe yo'?"

"Seven dollars and 50 cents, sir."

"Well, shay, back up till ye come to 30 cents. That's all I got."—Life.

The Important Problem

confronting anyone in need of a laxative is not a question of a single action only, but of permanently beneficial effects, which will follow proper efforts to live in a healthful way, with the assistance of Syrup of Figs and Elixir of Senna, whenever it is required, as it cleanses the system gently yet promptly, without irritation and will therefore always have the preference of all who wish the best of family laxatives.

The combination has the approval of physicians because it is known to be truly beneficial, and because it has given satisfaction to the millions of well-informed families who have used it for many years past.

To get its beneficial effects, always buy the genuine manufactured by the California Fig Syrup Co. only.
