HERBINE

The Great Liver Tonic and Regulator That Has Done So Much for the Working People.

It is a marvelous remedy. Its stimulating effect on a Torpid Liver is little less than miraculous. It acts instantly. The first dose brings improvement, a few days' use cures the most obstinate case. Tired, weak, disheartened victims of a Torpid Liver are restored almost in a day. Herbine is a fine cleansing tonic for the Stomach, Liver and Bowels. It puts the system in perfect order, revives the Torpid Liver, strengthens digestion, clears the bowels of constipated conditions and re-establishes regular bowel movements.

Every home should have a bottle of this great regulating medicine. It stands for health for the whole family. All who are constipated, bilious or dyspeptic need its cleansing and renovating influence. It fortifies the body against Pneumonia, Malaria (Chills), Bright's Disease, Typhoid Fever, Yellow Fever or any other deadly disease that may be about.

Price 50c per Bottle.

Thirty Years Together.

Thirty years of association—think of it. How the merit of a good thing stands out in that time—or the worthlessness of a bad one. So there's no guesswork in this evidence of Thos. Ariss, Concord, Mich., who writes: "I have used Dr. King's New Discovery for 30 years, and its the best cough and cold cure I ever used." Once it finds entrance in a home you can't pry it out. Many families have used it forty years. It's the most infallible throat and lung medicine on earth. Unequaled for laryngitis, asthma, hay fever, croup, quinsy or sore lungs. Price 50c, \$1.00. Trial bottle free. Guaranteed by all druggists.

Death of E. C. Hoxie.

Edward C. Hoxie, father of our townsman C. L. Hoxie, passed away quietly at the home of his son on Main street, Aug. 8th, 1911. Grandpa Hoxie, as he was known by everyone, had made his home with his son for the last three years. He was born in Cayuague county, New York, Aug. 27th, 1826, and at ten years of age moved to Michigan with his parents in which state he made his home for thirty years. During this period he married and three children was the result of the union, all of whom are living.

From Michigan he moved to Kansas and made that state his home for 38 years. During these pioneer days in Kansas Mr. Hoxie went through some trying ordeals. He followed the life of a farmer and until about two months ago, never knew what sickness was; dropsy was the immediate cause of his death.

One daughter, Mrs. Helen C. Fields, resides in Kansas; B. P. Hoxie, of Bandon, Oregon, and C. L. Hoxie, of this city, survive him.

The funeral service took place from the Undertaker's Chapel Thursday afternoon at 2:30, Rev. Mason conducting the service.

The following Odd Fellows acted as pall bearers: G. F. Garoutte, Geo. M. Hall, Van Pierce, Geo. Knowles, Jno. Stoneburg and L. A. Ralston.

Attack Like Tigers.

In fighting to keep the blood pure the white corpuscles attack disease germs like tigers. But often germs multiply so fast the little fighters are overcome. Then see pimples, boils, eczema, salt-rheum and sores multiply and strength and appetite fail. This condition demands Electric Bitters to regulate stomach, liver and kidneys and to expel poisons from the blood. "They are the best blood purifier," writes C. T. Badahn, of Tracy, Calif. "I have ever found." They make rich, red blood, strong nerves and build up your health. Try them. 50c at all druggists.

REASONS FOR USING HOPS IN BEVERAGES

Taste and Aroma as Well as Preservative Quality Are Desired.

Some American growers claim that, inasmuch as American hops in many cases are just as rich in the soft resins as the best European hops, their brewing value ought to be equal to that of the Europeans. They have not, however, been able to convince American brewers of the accuracy of this view. They will try to do so at the barley and hop exhibition in Chicago in October, 1911. The principal trouble, however, with American hops as they reach the market is that they are picked carelessly. The only part that is of value to the consumer is the cone, and everything in the shape of stems and leaves that is mixed with the grains not only diminishes the amount of available material, but introduces a decidedly injurious element, the leaves and cones being rich in tannic acid, which imparts a stringent and harsh taste.

In the international barley and hop exhibition, which will be held in Chicago in October, 1911, the item of

HEAD OF CHEVALIER BARLEY. Clean picking will cut an important figure in the valuation of the hops that will be entered for prize competition.

The great importance of this exhibition will lie in the fact that it will tend to put the valuation of hops upon a substantial basis of facts rather than of individual preferences.

All exhibits at this exposition will be in the names of growers, no dealers being admitted to the competitive exhibition. The exhibition is in charge of the committee on awards, 1508 Republic building, Chicago.

RELATIVE MERIT OF BREWING BARLEYS.

It Is Expressed In the Percentage of Points It Receives.

Barleys will be valued according to the standards herewith given at the international barley and hop prize exhibition in Chicago, Oct. 12-22, 1911.

The relative merit of a brewing barley is expressed in the percentage of points it receives.

The total number of points is determined by deducting from the average of the sum of the credits the sum of the penalties corrected for percentage.

The barleys will be valued on the basis of maturity, viability (germinat-

BRANCH OF FEMALE HOP FLOWERS. Vigor, ability, berry weight, uniformity, albumen (or nitrogen) content. These five divisions standing as credits, while penalties are provided for excessive amount of moisture, for trimmings (screenings, etc.), for inseparable admixtures, damage indicated by off color, off odor or by general impression and irregularity of growth.

Barley is disqualified if in any credit division it receives below eighty points and contains more than 25 per cent of screenings or more than 5 per cent of inseparable admixtures; more than 15 per cent of moisture; if color, odor or general impression indicates heavy damage.

Four and six rowed barley should contain approximately for each middle of straight furrowed kernel two lateral or twisted kernels.

The viability (germinating ability) will be determined after proper artificial drying of the specimen.
