Junction is becoming staid and stoical. At the last meeting of the city council down there, the following ordinances were passed: To prevent, suppress and punish the sale or giving away of any kind of intoxicating liquors. To prevent the sale of near beer, malt tea or any other similar compound. To prohibit minors from loitering or assembling at public buildings or on any streets or alleys. To prohibit expectorating on any sidewalks. To regulate the driving of wagons containing manure, gravel, dirt, straw or sawdust on paved streets. The latter ordinance is a good one for any town, as it would prevent the paved streets from being littered with rocks and dirt to a great extent.

A movement among the boys in Los Angeles, California, started for clean speech, clean sports and clean habits. It started with four boys, and at present time there is 8,000 in that crusade.

Great Majestic Range

A Perfect Baker

Aluminum Top Reservoir A Fuel Saver

It Makes Good Every Day In The Year

The perfect range is the one which fully meets every requirement of the average housewife. In addition to all its other good points, it must be a perfect baker, week in, week out—month in, month out—year in, year out, and it must be economical in consumption of fuel. The wise housewife will not buy the range, from which she expects a lifetime of perfect service, from any mere printed description in a catalog—but before deciding upon any range she will examine closely into all the superior points of merit of the Great Majestic—the range with a reputation—built upon honor of the best materials.

Won't Break Or Rust Like Steel—Outwears Three Ordinary Ranges

It is the only range made of malleable iron and charcoal iron. Charcoal iron won't rust like steel—malleable iron can't break, and while the first cost of a Great Majestic may be more than some other ranges, it outwears three ordinary ranges.

Saves Half Your Fuel

The Majestic is put together with rivets. The joints and seams will remain absolutely tight as neither expansion nor contraction can effect or open them. The oven is lined with pure asbestos board, covered with an iron grade—put there to stay—you can see it. No heat escapes or cold air gets into the oven, thus half the fuel used in other ranges, assuredly, always dependent upon the heat for perfect baking. No springs anywhere to weaken, or get out of order. All doors drop down and form perfect right angles. Malleable iron oven racks slide out automatically, holding everything they contain.

Application Made for Entry in the Post Office at Cottage Grove Oregon as Second Class Mail Matter.

THE CONVICT—HIS FAMILY—THE LAW.

It is urged that convicts must not be kept idle, that they must earn their living, that the people should not be taxed to feed and clothe an army of criminals, and so forth, and so forth.

Let us see how this works. The state arrests a young fellow, who, let us say, in a drunken quarrel has stabbed a companion. He is hurried away to prison. He is brought into court, tried and convicted. He is sent to prison for five years, or for ten years, or for life. All the while a young wife and a half dozen little children are left without their natural protector and support. They huddle in a corner of the court room. They hear the lawyers' wamp. They listen to the verdict. The case is closed. The young father is bundled off in one direction in chains. The young family is turned off in another in tears. The state takes the time, the earnings of the one to itself, leaving the other to starve. The mother dies of despair. The boys grow up thieves. The girls grow up harlots. The law is vindicated. The taxpayer is protected. The criminal classes are replenished. Is it not damnable? Does not the society which tolerates such monstrosities deserve all the evils it entails upon itself? The state has no right to take that man's labor from his wife and children and give them no equivalent. It should punish the guilty, not the innocent. Every dollar that is diverted in this way from the natural needs of the helpless to the uses of the public, is base blood money that should and does carry with it the curse of God.

Senator L. E. Bean of Eugene is quoted as saying recently: "Cottage Grove is certain to sometime be the county seat of Nesmith County, so it seems to me. With a fair division of territory I see no argument against the formation of the new county. Lane County, an empire unto itself, is too unwieldy. It must eventually be cut up for the convenience of its citizens. I was glad to support in our recent legislature your Cottage Grove bill when its provisions were made such that they seemed fair to all concerned."

There is a profitable industry which might well be introduced here and which has already proven eminently successful in other parts of western Oregon. We refer to bee keeping. There is always a good home market for this product and bees thrive here and do well without much care. Give the apiary a trial.

Several land buyers who visited our city last week, moved on, declaring land values here higher than at any other points visited in the Willamette Valley. We hardly believe this to be a fact, as there are many good ranch bargains about Cottage Grove.

One way to keep the boys on the farm is to install a motor to turn the grindstone.
