Preserved Cherries.
Stone the cherries, preserving every drop of juice. Weigh the fruit, allowing pound for pound for sugar. Put a layer of fruit for one of sugar until all is used up; pour over the juice and boil gently until the syrup begins to thicken. The short-stemmed cherries or the Morellas are the best for preserves. Sweet cherries will not do.

WORTH TIME AND TROUBLE.
Salad Rolls Call for Care in the Making, but the Result Repays All the Outlay.

Sold one cup milk, add three tablespoons butter, one and a half tablespoons sugar and half a teaspoonful of salt. When lukewarm add one yeastcake, dissolved in one-quarter cupful lukewarm water and one and a half cupfuls flour. Cover and let rise, then add white of one egg beaten stiff, and four to knead. Again let rise, shape in small biscuits, place in rows on floured board, cover with cloth and let it rise until light and well puffed. Flour handle of wooden spoon, and make a deep crease in middle of each biscuit, take up and press edges together. Place closely in buttered pan, cover, let rise, brush over with one egg slightly beaten and diluted with one tablespoonful milk and bake 12 or 15 minutes in a hot oven. This may seem quite a process to go through, but when done and ready to be eaten one feels really repaid. They are the best I ever ate.

Premium Fruit Cake.
Sugar, three cups; butter, one and one-half cups; six eggs; sour cream one and one-half cups; saleratus or soda, two teaspoonfuls; currants, one half pound; raisins, three-fourths pound; citron, one-fourth pound; one nutmeg, flour. Directions, beat the eggs thoroughly, then add sugar and butter and beat till smooth; dissolve the saleratus in a little warm water and put in the cream and make the cake quite thin with flour to prevent the fruit from settling to the bottom. Do not chop the raisins, but cut them in halves and remove the seeds; else use seedless raisins. Then scald a few moments to soften, drain and flour (dredge); then before putting into the cake cut the citron in thin slices, and as you fill in a layer of cake put the citron over evenly, then more of the cake mixture and another layer of the citron and so on until the citron is evenly divided through the whole.

Frightened by Meteor's Fall.
The flash of a ten-ton meteor, its fall seemingly hundreds of yards long, lightened up the Alleghany Valley for three miles, the other day, just above Pittsburgh, as it fell. Residents of nearby hamlets ran from their homes in fright. The next day the mass of substance was smoking hot and incandescent in places.

How Life is Made Interesting.
Life, to be interesting, must be a series of contrasts. There may be discord today, but harmony tomorrow. The balance of power comes through not being too overwhelmed by sorrow, nor too intoxicated by joy.

Apt alliteration's artful phrase asserts its potency in the utterances of one of the newly enfranchised western women thus: "Petrified, putrefied, preadaceous, partisan politics."

Love is never lost. If not reciprocated, it will flow back and soften and purify the heart.—Washington Irving.

CATARRHAL COUGH
Is Caused by Catarrh of the Throat and Bronchial Tubes.
Some coughs are produced by a grave organic disease of the lungs. Other coughs are produced by heart disease. An irritable stomach will produce a cough. Stomach coughs are more common than is generally supposed. Catarrh will also produce a cough. Catarrh of the bronchial tubes. Catarrh of the larynx. Catarrh of the pharynx.
In a catarrhal cough the amount of expectoration is limited. It is not so easy to raise as in cases of organic diseases of the lungs. It may be frothy or stringy mucus, difficult to expectorate. People will go on for months with this sort of a cough and give it no attention.
Ordinary cough medicines that are intended to lull the sensitive nerves that are irritated by the catarrh will do no good. In fact, they do harm. What is needed is Peruna, which strikes at once at the cause of such a cough. Peruna is a catarrh remedy. As soon as the catarrh is removed from the throat and bronchial tubes the cough disappears.
Usually the directions on the bottle are sufficient. In some cases where the cough is very continuous and annoying a tablespoonful every hour is a better way to take it. But a multitude of people who are suffering with this sort of cough and yet going about their usual business need only take the Peruna according to the directions on the bottle.

SOME ANIMALS CAN REASON
Raccoon Reaches Plate of Food With Hind Legs When Unable to Connect With Forepaws.
A contributor to the Youth's Companion tells the following story, which certainly supports the theory by some people that animals can reason:
"We were on a stage journey from Lewiston, Idaho, to Grangeville, Idaho, a distance of 70 miles. The stage stopped for noon at the Fountain house, half-way between the two towns. A large raccoon was chained by the collar to a post in the front yard. After luncheon the driver of the stage gathered up a plate of food from the table and carried it out to where the animal was chained. He set the plate just out of reach of the raccoon's front paws. The animal strained and reached, but could not cover the distance.
"One of the passengers said, 'Why do you not place it within his reach?'
"He can reach it,' the driver replied.
"He can't, unless you move the plate nearer."
"Wait and see," said the driver.
"The raccoon had by this time given up trying to reach the food, and sat whining. He seemed to ponder over the problem for a few moments, then stretched his chain to its fullest extent, turned round, reached out with his hind foot, dragged the plate toward him, reversed the process, grasped it in his front paws, and proceeded to enjoy his dinner, much to the amusement of the onlookers and the discomfiture of the man who was sure he could not accomplish the task."

Subtle Flattery.
"Your boy seems to be stronger on athletics than he is on the classics."
"Yes," replied the candid parent.
"He explained that to me. He says he knows I am much more likely to understand and appreciate what he is doing in athletics."
Mischievous Disposition.
"Does your boy play football?"
"Not much," replied Mr. Growcher.
"I think that what he enjoys is putting on the uniform and frightening his mother."

CORNER FOR THE JUNIORS

WHERE WRINKLES COME FROM
Contrary to General Impression, Most of Them Come From Laughter—Some Peculiarities.

The general impression about wrinkles is that they are caused by worry, but the truth is that most of them come from laughing.
To know how to laugh is just as important as to know when to do it. If you laugh with the sides of your face the skin will work loose in time and wrinkles will form in exact accordance with the kind of laugh you have.
The man who always wears a smirk will have a series of semicircular wrinkles covering his cheeks.
A gambler, who is accustomed to suppressing his feelings, generally has a deep line running from each side of his nose to the upper corner of his mouth, which in time extends to the chin, forming the shape of a half moon.
A cadaverous person is usually marked with two wrinkles, one on the jaw and the other under the eye, meeting at right angles at the cheek bones.
The scholar's wrinkle forms on his brow, while a schemer's wrinkles come around his eyes and look like spokes of a wheel.

MOTOR SKATE QUITE UNIQUE
One Equipped With 1/4 Horse Power Motor, While Other Runs Behind as Sort of Trailer.
A pair of ingenious roller skates, one skate of which is driven by a 1/4 horse power engine, fed from a tank or case strapped to the back of the user, is shown in the accompanying illustration, says the Popular Mechanics. The foot to which the motor-equipped skate is attached is set slightly ahead of the other foot, which rests on the non-powered skate. The latter skate might be designated as a trailer.

HOW I MADE MY HAIR GROW
Woman With Marvelously Beautiful Hair Gives Simple Home Prescription Which She Used With Most Remarkable Results.
I was greatly troubled with dandruff and falling hair. I tried many advertised hair preparations and various prescriptions, but they all signally failed; many of them made my hair greasy so it was impossible to comb it or do it up properly. I think that many of the things I tried were positively injurious and from my own experience I cannot too strongly caution you against using preparations containing wood alcohol and other poisonous substances. I believe they injure the roots of the hair. After my long list of failures, I finally found a simple prescription which I can unhesitatingly state is beyond doubt the most wonderful thing for the hair I have ever seen. Many of my friends have also used it, and obtained wonderful effects therefrom. It not only is a powerful stimulant to the growth of the hair but restores gray hair to its natural color, but it is equally good for removing dandruff, giving the hair life and brilliancy, etc., and for the purpose of keeping the scalp in first-class condition. It also makes the hair easier to comb and arrange in nice form. I have a friend who used it two months and during that time it has not only stopped the falling of his hair and wonderfully increased its growth, but it practically restored all of his hair to its natural color. You can obtain the ingredients for making this wonderful preparation from almost any druggist. The prescription is as follows:
Bay Rum, 4 oz.; Menthol Crystals, 1/2 drachm; Lavona de Composee, 2 oz. If you like it perfumed add a few drops of To-Kalon Perfume, which mixes perfectly with the other ingredients. This, however, is not necessary.
Apply night and morning; rub thoroughly into the scalp.
Go to your druggist and ask for an eight ounce bottle containing six ounces of Bay Rum; also one-half drachm of Menthol Crystals, and a two-ounce bottle of Lavona de Composee. Mix the ingredients yourself at your own home. Add the Menthol Crystals to the Bay Rum and then pour in the Lavona de Composee and add the To-Kalon Perfume. Let it stand one-half hour and it is ready for use.

Spread Dread Plague.
In the days of King Charles II news traveled slowly in England and before the people of Cornwall knew about the terrible plague in London there came to Bodmin itinerant traders with pack mules laden with silk and satin gowns, rich robes, plumed hats and expensive laces, which were offered for sale at ridiculous prices. The countryside rushed to purchase, and the merchants, having disposed of all their stock, departed. Then within a day or two the purchasers were attacked by a strange sickness, and died by scores. The gaudy clothes had been stripped from the bodies of those who had died of plague in London.

Kingly Life.
And so the kingly life is a life in quest of big things. Everyone is painfully familiar with the temptation to fritter away life in interests that are small and mean. There are those who spend their strength in seeking money. The concentrated purpose of their days is a quest for gold. They are zealous for artificial gems and they miss the goodly pearls.—J. H. Lowett, D.D.

To Polish Piano.
If the polish of your piano is dull, wet it over sparingly with paraffin oil and let it remain for two hours. Then polish with linen and camomils skin.—Mother's Magazine.
Riches in Poverty.
How slight a thing is poverty; what riches, may treasures untold, a man may possess in the midst of it, if he does but seek them aright.—Coleridge.

For the Shopping Bag.

Banana Pie.
Line a deep plate with rich crust and bake a delicate brown. Filling: Take a scant cup of sugar in your sauce pan and cream into a generous teaspoon of butter (not melted), beat in the yolks of two eggs and two tablespoons of flour and a cup of boiling water and cook, stirring constantly until thick. Add a little vanilla after this cream is cool. Slice into the crust a layer of bananas alternated with a layer of cream. There should be two layers of each. Frost with the whites of two eggs, beaten stiff, with two teaspoons of sugar. Brown in oven. Serve cold.

Queen Victoria Detested Tobacco.
The number of smoking rooms now distributed over Windsor castle would considerably astonish Queen Victoria could she but see them. Her late majesty could never bring herself to do more than tolerate the weed in any form, and the smoking room was always relegated to a very distant part of her various residences. Nor were the guests permitted to solace themselves with a quiet smoke in their own apartments, as on their arrival they were specially warned not to do so.

Step to Your Own Drum.
Why should we be in such desperate haste to succeed, and in such desperate enterprises? If a man does not keep pace with his companions, perhaps it is because he hears a different drummer. Let him step to the music which he hears, however measured or far away. It is not important that he should mature as soon as an apple tree or an oak. Shall he turn his spring into summer?—Theodore.

Still, As Servants Go, Old.
Mrs. Heath sniffed audibly when her sister happened to mention, with considerable awe, a certain neighbor. "Daisy!" the married woman exclaimed. "Why Daisy should speak of her help as 'old family servants' I can't imagine!" "But why shouldn't she, if she wants to?" inquired the sister. "Because the one she's had longest is her cook, and so far, she's stayed six months!"—Youth's Companion.
Alas, Yes!
"Oh, Mr. Titewadd, do you know, I passed by a candy store yesterday, and actually didn't go in." "How unlike you—I thought you said once you invariably turned in?" "Why, don't you remember? You were with me."
FILES CURED IN 6 TO 14 DAYS

CARE AND USE OF CASSEROLE.
Excellent Servant of the Cook Must Have Proper Treatment, and This Advice is Good.

Before using a casserole for the first time, it is well to temper it; this is best done by covering it with cold water. Then letting the water come to the boiling point, remove from the fire, and let the casserole remain in the water until it is cold.
Under no circumstances let the casserole be put on the stove without water or fat in it; if this is done the dish will crack.
Avoid sudden changes of temperature with the casserole; that is, do not take it from the hot stove or oven and place it in cold water or in a wet sink; this will prove disastrous to the dish.
Casserole cooking requires only moderate heat; if something is being cooked in the casserole at the same time that intense heat is required for something else, take the precaution of setting the casserole in a pan of water.
In cooking anything in a casserole it is well to allow twice the time for cooking that would be required were the stew or vegetables or fruit cooked in the ordinary way.

Lemonade Ginger Punch.
Five lemons, one cupful of sugar, one cupful of boiling water, ginger ale, fresh mint, cold water, one-half heaping teaspoonful of gelatin. Wash the lemons and slice them; then sprinkle over the sugar. Let stand for 30 minutes, and then add one quart of cold water. Dissolve the gelatin in the boiling water and add it to the lemon mixture. Pour the whole into a punch bowl and add the ginger ale, allowing one quart of ginger ale for each quart of the other liquid. Half an hour before serving add a few stems of fresh mint.

How Paris Helps Poor.
The fact that the receipts of Paris theaters have more than doubled in the last twenty years is a good thing for the Paris poor, since every buyer of a theater ticket in Paris has to pay a ten per cent tax for the poor, the total amount of which for the last year was \$1,300,000.
