Insect Exterminator

(PATENT APPLIED FOR)

An inexpensive and simple little device designed, tested and found most effective in the destruction of the flea beetle and general plant insects. Patented and thoroughly tested by George O. Walker and found most practical in his large tomato field last season.

A TESTIMONIAL

Among many other testimonials Mr. Walker submits the following from Harry K. Metcalf, proprietor of the Sunnyside Greenhouses, Cottage Grove:

"I have seen your insect catcher and I believe it to be a very complete and effective trap for tomato fleas, beetles, etc., and it certainly cannot injure the most tender plant as the spray cure often does."
