DIRT A CRIME.

Dirt is our universal sin. Not only health, but morals likewise, suffer in its presence. Civic pride for a dirty city is the worst form of false pride. A reform of habits tending toward a lack of cleanliness is a crying need of most municipalities. Careless and dirty habits of citizens call for unnecessary expenditure of public funds, make for higher tax rates and therefore for higher rents. Give this matter a thought. Citizens themselves, not the city authorities, are responsible for street litter. A street can be littered by a few careless people much faster than it can be cleaned.

The proper treatment for offenders of this type is for an officer of the law to take the offender in hand and compel him or her to pick up the litter and deposit it in one of the receptacles provided for such waste.

Another class of persons who persistently violate the law are storekeepers who sweep their wastes into the streets. Such offenders should be promptly arrested and heavily fined. A few such examples will have the desired effect.

We can have really clean streets only when we have really clean people. Will you not contribute your quota toward making your streets clean?—Dr. Arthur L. Murray.

TRAMWAYS AS CIVILIZERS.

Farreaching Effects of Street Cars in the Old World.

If the steam railway brings civilization into savage countries, street cars or tramways certainly bring a measure of cleanliness into dirty towns.

The workers, who for countless generations have huddled together in filthy dens cooped up within the walls of an old town (for no man, in the days when banditti roamed everywhere outside arrow shot from the towers of a medieval town, dared to be outside its gates at night), now, by the aid of tramways, can live in the country in houses the rent of which is cheap and can go in to their work in the early morning by the tramcars. What the bicycle has done for English and French workmen the tramcar is doing for the near east and far east, where the roads are not good enough for cycling. In India, in China, in Africa and in South America the tramways are great civilizing influences as well as money making undertakings.

Four tramway routes are to be laid down all starting from the Jaffa gate of Jerusalem. One of the lines is to run through the great business quarter outside Jerusalem, another line is to run through the new Jewish quarter beyond the walls, and the other two tram lines will be the tourist lines. One of them is to run the six miles out to Bethlehem and will pass many of the holy places which lie outside the city—wells and tombs and convents—and the fourth is to circle the old city, with halting places at Gordon's Calvary, which is held by many scholars to have been the scene of the crucifixion; the Tomb of the Kings, the Valley of Jehoshaphat and the Mount of Olives. The existence of these tramways will make Jerusalem a far cheaper place for sightseeing than it has been heretofore.

Commercial Organizations.

In 1912 the bureau of foreign and domestic commerce issued a monograph entitled "Commercial Organizations" (Special Agents Series No. 60), covering general features of commercial organization work. This is now supplemented by a second publication under the same title (Special Agents Series No. 79, obtainable for 10 cents from the government printing office, Washington), in which the salient features of individual commercial organizations of twenty-five southern and western cities are covered. The data given are valuable not only as conveying information regarding the activities of the particular organizations mentioned, but notably as offering suggestions to those wishing to glean ideas on how to conduct commercial work in general. Intimate details are given as to the main objects of the organization, accomplishments achieved, under way or contemplated, methods of financing, etc. Among the larger cities whose commercial organizations are studied at length are Houston, New Orleans, Atlanta, San Antonio, Spokane, Seattle, Portland, San Francisco, Los Angeles, Minneapolis and St. Paul. State wide consolidated bodies, such as the California development board and the associated chambers of commerce of the Pacific coast, are also included.

Cleveland's Clean Up.

Recent efforts put forth by Cleveland residents, the first in the official clean-up and brighten up campaign, transformed the city into a Vesuvius that belched forth ashes and rubbish enough to have almost buried another Pompeii. More than 100 wagons, manned by 1,000 drivers, helpers and cleaners, gathered 226,800 cubic feet of ashes, rubbish and street refuse during the clean-up week. If placed in one spot this could have been made into a pile of the same dimensions as the twelve story tower of the Guardian Savings and Trust company's building. This tower, which rears its top above the neighboring buildings on Euclid avenue, is 150 feet high, with a thirty foot front and a depth of sixty feet.

This amount of refuse and ashes would have filled 184 gondola freight cars, which would have made a train one mile and a quarter long.
