CHRISTMAS GREETING.

The term "Christmas" has a world of meaning for all mankind in almost every clime on the inhabited globe, even among the heathens in faraway Africa and China, but especially so in every land of civilization where Christianity is the abiding faith of all intelligence.

Just nineteen hundred and three years ago was born to humble parents a child whose birth had been predicted and looked forward to with great interest by the old world. So strong was the faith of some that undisputed history hands down the remarkable journey of the three great and wise men of the East who traveled days and nights over deserts and plains to be present to witness and to welcome this child which was expect -d to and proved to be the Saviour ofmankind, and they were not disappointed, for, at the time and place as expected, Christ was ushered into the world in a manger, the child of Mary and Joseph, but in reality the messenger of God, who sent His only begotten Son, that the world might be saved. Every day of this child's history is full of interest, but that which attracts most is from the time he entered upon his ministry. With this child was born a new era in Christiandom and the influence which his few years of life left has been rolling down the centuries and gathering strength with each succeeding epoch in the world's Creek and Steamboat Creek, tribuhistory, until today his teachings are accepted the world over as the best and truest that humanity can find. H s'entire ministry was fraught with personal hardships, yet his patient endurance and forbearance with those that persecuted him and at last crucified this same Jesus on the cross, was enough to make the world weep when his life and work were better understood. No-person, good or bad, appealed to him in vain and his goodness and charity was an example which has alone made the world better. The meek and lowly Jesus was despised by certain people in those days and when they were carried so far in their prejudices and hates that they would murder this man who had in all his life returned good for evil, and who had never attempted other than to do good to mankind, he said : "Father, forgive them, for they know not what they do," and this too, when he was on the cross willingly giving up his life that the example might be felt for good for all time to come.

Then, as a celebration of the birth

Well Preserved Copy Presented to this Office by I, H. Ventch of Creswell. The first copy of the first news-

THE FIRST LEADER.

paper ever issued from a printing press in Cottage Grove was present-ed to the LEADER office Monday morning by I. H. Veatch, formerly of this city but now of Creswell. of this city but now of Creswell. Mr. Veatch happened to be present on June 15, 1889, when F. W. Chausse started up his little "Army" hand press on the first issue of the LEADER which was then styled the "Cottage Grove LEADER." The first unmher of the paper full to Mr. number of the paper fell to Mr. Veatch who has carefully preserved it to this day, and from the fact that the LEADER's early files unfortunate-

ly became destroyed this is proably the only copy of the first edition in existence, and is therefore highly prized. The initial number of the LEADER was a seven column four paged paper all home print and started out with a liberal advertising patronage considering the size of the town at that time, which the first LEADER says "contains 400 inhabitants and ranks as the second town in wealth in Lane county, Eugene with a population of 3000 ranking first." As far as growth and ad-vancement is concerned Cottage Grove has since that time kept pace with Eugene and has grown from a town of 400 inhabitants in 1889 to a city of 2000 at the present time while Eugene shows a similar gain. Refering to the Bohemia mines the first copy of the Leader said: "Forty miles due east of Cottage Grove is the Bohemia Mining district which is reached by 20 miles of wagon road and 20 miles of pack trail, There are several mining locations there, the old Knot mine, with two shafts, one 55 and the other 57 feet. It produces gold bearing quartz averaging from \$12 to \$40 per ton. Six miles southwest is the Pierson

Brothers Claim, free milling gold, running as high as \$260 per ton. Two miles west of the Pierson is Geo. Brockerhoff's silver mine. One half mile from Pierson's is Sharps Silver Star mine, which claims a yield of as high as \$140 per ton. The Old Knot Mine has a five stamp mill the only one in the district. Good tary to Bohemia."

Never did the writer of the above imagine that within the comparatively short period of 14 years the shrill whistle of the railway locomotive would resound through the crags and peaks of old Bohemia and that the little 5-stamp mill of the district would be replaced with electric power plants, driving 30stamp mills, air compressors, great Leyner drills, motor lines, tram cars and saw mills, but that day is actually at hand in the Bohemia Mining district. The old pack trail has given way to fine graded wagon roads and a modern wide-guage railroad and numerous large modern mining plants have been, or are being installed to work out the preci-ous metals hidden in the depths of old Bohemia and what great advancement is in store for this rich mining district within the next dozen years no one can foretell.

Equally as great advancement has been made in the same period of Then, as a celebration of the birth of this Jesus Christ, why should not dustry of this section of the county, a time of rejoicing in every heart able to appreciate the life and good work of this man who came into the world this city.—The Pacific Timber Co., the Long & Bingham Co., the Bootafour large milling companies now Kelly Co., The Lorena Lumber company besides Wheeler & Owens, Mrs. M. T. K. Richardson, the local music dealer and a prominent member of the Improved Mineral Smelter Co., spent Saturday and Sunday in this city looking after his business inter-ests here which are under the able supervision of F. S. Day. Mr. Richardson informed the LEADER that the demand for territorial rights and the construction of this new smelter by corporations and individual mine owners, was becoming great.

J H. Booth May Be Retained.

It is learned from a private dispatch to a prominent citizen that the president has not yet decided whether he will retain J. H. Booth for receiver of the Roseburg land office, the Oregonian to the contrary notwithstanding.—Eugene Register.
