TO PREVENT DECAY

Wood Preserver Used by Uncle Sam's on Yamhill River Work.

Merits of Avenarius Carbolium Recognized by National, State and Municipal Governments.

The fame of Avenarius Carbolium has steadily extended as the only bona fide preserver of wood, since its discovery in Germany thirty years ago. It has stood all tests of climate soil and water and steadily lived down all pretended rivals. To day it is not only employed in all countries for the preservation of wood used for household articles articles such as houses, barns, fences etc. but the national government, both of Europe and America, have recognized its value in saving public constructions from decay. Following their example cities and counties have also adopted Avenarius Carbolium for bridges pavements etc. and the leading ship builders and railroad companies have shown their faith in its merits by treating ship timbers, cars, telegraph poles and ties with the same never failing preventative against climatic decay and reparous wood boring vermin both of land and water.

Great bodies move slowly and act after mature deliberation. It may therefore be safely stated that governments and corporations did not employ Avenarius Carbolium until fully convinced of its money saving as well as wood preserving qualities. Private individuals desirous of lengthening the life of wood work and at the same time curtailing expense, need not fear to follow the precedents established.

Recent local examples proving the truth of the above statements are not wanting. The reconstructed Madison street bridge in Portland has been treated with Avenarius Carbolium, as has also the pavement at the intersection of Third street in that city where the heaviest street car and wagon traffic converge. The latter used of the compound was made at the earnest solicitation of street car managers who confidently took for gratifying results. The gentleman in charge of the United States engineer department for the Oregon are now applying Avenarius Carbolium to the dams and lock work on the Yamhill river a flattering tribute to its merits which was certainly not extended until searching investigation satisfied the authorities that it was a measure of practical economy.

With such examples before them it would appear that the individual is foolish and the official almost culpable who does not protect his own or the taxpayer's pockets by using this compound thus saving from decay, and lengthening the life of all frame structures for which he is individually or officially responsible.

Eastern City Elections

Kansas City Elects a Democratic Mayor

As Does also Chicago, St. Louis—Byan Congratulates Harrison

Recent elections, in the eastern states indicate substantial democratic gains.

In St. Louis the entire democratic ticket was elected, Rola Wells the democratic nominee for Mayor winning in that hitherto republican city by 10,000 over the present republican incumbent.

Golden Rule Jones was again elected Mayor of Toledo Ohio.

The democrats also carried the following Ohio towns, Norwalk by a majority of 740. Hamilton, by 600. McLeeta by a good margin. Cleveland rolled up a 5000 plurality for the democrats. Canton, McKinley's own home, gave a democratic council.

Columbus, O. elected a democratic mayor by a small plurality.

Kansas City for the first time in nearly 20 years elects a democratic mayor by a small plurality and Jackson Michigan records a sweeping democratic victory.

In Chicago Carter H Harrison was reelected, and the city council is apparently about evenly divided. Harrison has received a number of congratulatory telegrams among which is the following from Lincoln Neb:

"Robert E Burke, Chicago.--Tender to Carter H Harrison my sincere congratulations. I hope the entire ticket is elected." W J Bryan.

ROYAL Baking Powder. Highest of all in leavening strength.—U. S. Government Report.

The second annual report of the Oregon Historical Society has been received. It is a pamphlet 6 1/2 x 9 1/4 inches and contains 124 pages. It shows that the society had 627 members on Nov. 30, 1900, distributed in 23 counties in Oregon and 4 in Washington. The material collected during the year in documents consist mainly of letters and other written matter relating to the early social and business life of the country, and the relics are such as were used while crossing the plains with teams or in the early industries of the country. Visitors at the rooms in the city hall, Portland, average 1500 a month, and all who visit that city are cordially invited to call.

Parents and young people should remember that it frequently occurs that "Music is father and mother sweetheart and fame, and sometimes bread." Mrs L D Beck.

The bond question was discussed at some length and from the ticket nominated the indications are that the bonds will be snowed under.

Notice to Creditors. All persons knowing themselves indebted to the undersigned are hereby notified to call and settle at once as I have sold out my business and must have all money due me. S R Piper.

Look out for the old fashioned singing "skewl" by home talent in the near future. It promises to be quite the thing in the line of entertainments.

What Do Your Children Drink?

Don't give them tea or coffee. Have you tried the new food drink called GRAIN-O? It is delicious and nourishing and takes the place of coffee. The more Grain-O you give the children the more health you distribute through their systems. Grain-O is made of pure grains, and when properly prepared tastes like the choice grades of coffee but costs about 1/4 as much. All grocers sell it. 15c. and 25c.

Over 100 Million Dollars For Dividends

READ THE PROOFS:

United States official Report MADE TO

commissioner of the United States, General Land Office, Washington D C.

by a Geologist and Mining Expert of world-wide reputation, Professor Benjamin Silliman who spent several months there then being connected with the United States Surveying Corps and in his official report says:

"HERE ARE COUNTLESS MILLIONS OF TONS OF RICH GOLD Quartz reduced by the great forces of nature to a condition ready for the application of the hydraulic process while the entire bed of the Rio Grande for 40 miles is a sluice on the bars of which the gold, derived from the wearing away of the gravel banks has been accumulating for countless ages and now lies ready for extraction by the most approved methods of river mining. THE THICKNESS OF THE RIO GRANDE GOLD GRAVEL EXCEEDS IN MANY PLACES 600 FEET OR NEARLY THREE TIMES THAT OF THE LIKE BEDS IN CALIFORNIA WHILE THE AVERAGE VALUE PER CUBIC YARD IS BELIEVED TO BE GREATER IN THE NEW MEXICO BEDS THAN IN ANY OTHER SUCH ACCUMULATIONS YET DISCOVERED."

I have made a reconnaissance of the whole of this gravel along the Rio Grande and have examined with all the care possible in the time at my command the character of the gravel and its contents of gold. NOTHING I AM PERSUADED SINCE THE DISCOVERY OF CALIFORNIA AND AUSTRALIA, IS COMPARABLE FOR ITS MEASURABLE RESOURCES OF GOLD AVAILABLE BY THE HYDRAULIC PROCESS to the deep placers of the Rio Grande."

Other reports from eminent mining experts of national reputation pronounce the property of this Company the richest and most extensive known.
