Eggs of late have been scarce, and several carloads have been sent from the East, but none of them have come here so far as known. With eggs at 25 cents a dozen in Portland and 16 cents per dozen in Chicago, there is a good margin for importers. After harvest the output of eggs always increases, and it is said that there will be more chickens engaged in laying eggs in this section this Fall than ever before. It is highly desirable that Oregon should produce enough eggs and butter for home consumption, at least.

To THE PUBLIC.—Having just completed a course of instructions in the Prof Rogers system of tinting, we are prepared to do the most beautiful work known to our profession. This work is excellent. Call and see our samples. F J TAYLOR.

Crop Bulletin.

Good rains fell in all parts of the State on the 21st and 22nd. In the Willamette Valley and Coast districts averaged about 2.00 inches in depth, while in the eastern portions of the state they amounted to less than an inch.

Hops were nearly all picked before the rain began. In last week's report it was stated that the hop yield was below expectations and that it would not be more than one-fourth as much as last year. The returns received this week led to the belief that the Oregon hop yield will be a little less than three-fourths of as large a crop as that gathered last year.

Corn and potatoes are being harvested and the yields are light. The third crop of alfalfa has been cut and housed. Pastures have been much improved by the rains and stock is gaining flesh.

Prune picking is well advanced and a large portion of the crop was secured before the rains began. A fair crop of apples, pears and peaches are being marketed.

United States official Report

MADE TO commissioner of the United States, General Land Office, Washington D.C.

by a Geologist and Mining Expert of world-wide reputation, Professor Benjamin Silliman who spent several months there being connected with the United States Surveying Corps and in his official report says:

"HERE ARE COUNTLESS MILLIONS OF TONS OF RICH GOLD QUARTZ reduced by the great forces of nature to a condition ready for the application of the hydraulic process while the entire bed of the Rio Grande for 14 miles is a sluice on the bars of which the gold derived from the wearing away of the gravel banks has been accumulating for countless ages and now lies ready for extraction by the most approved methods of river mining. THE THICKNESS OF THE RIO GRANDE GOLD GRAVEL EXCEEDS IN MANY PLACES 300 FEET OR NEARLY THREE TIMES THAT OF THE LIKE BEDS IN CALIFORNIA WHILE THE AVERAGE VALUE PER CUBIC YARD IS BELIEVED TO BE GREATER IN THE NEW MEXICO BEDS THAN IN ANY OTHER SUCH ACCUMULATIONS YET DISCOVERED I have made a reconnaissance of the whole of this gravel along the Rio Grande and have examined with all the care possible in the time at my command the character of the gravel and its contents of gold. NOTHING I AM PERSUASSED SINCE THE DISCOVERY OF CALIFORNIA AND AUSTRALIA, IS COMPARABLE FOR ITS MEASURABLE RESOURCES OF GOLD AVAILABLE by the hydraulic process to the deep placers of the Rio Grande."

Other reports from eminent mining experts of national reputation pronounce the property of this Company the richest and most extensive known.
