THE GOVERNMENT TO INVESTIGATE

WASHINGTON, March 11.—The rivers and harbors bill, as presented by the House committee, authorizes the Secretary of War to ascertain through a board of engineers whether the acquisition of the present canal and locks at Willamette Falls, or the construction of a canal and locks by the Government and their operation for the exclusive benefit of the navigation of the Willamette River would, by withdrawing the waters of this river from its customary channels, materially injure the manufacturing enterprises now in operation or contemplated at the falls also to ascertain through the Department of Justice whether the Portland General Electric Company, by view of its ownership of property at Willamette Falls, has legal right against the United States for the full, free and continued use of the waters of the Willamette for the use of the manufacturing enterprises now located on its property; whether the water is needed for navigation, and if so, what method would be necessary on the part of the Government to acquire title to such water for navigation purposes, and the measure of damages it must pay the company.

GENERAL METHUEN TAKEN PRISONER

LONDON, March 10.—It was announced today that General Lord Methuen and four guns had been captured by the Boers commanded by General Delarey. The news came like a thunderbolt to London. The extra editions of the evening papers giving an account of the disaster were eagerly bought up. Their readers hurried through the streets with anxious faces and bitter remarks were passed on the subject of the Government's declaration that the war in South Africa was over.

The news was received in the House of Commons amid great excitement. The reading of Lord Kitchener's telegram by Mr Brodrick, the War Secretary, was listened to in deep silence, which was broken by loud Irish cheers. Instantly, there were cries of "shame," "shame," from the government benches. Then the Irish member seemed to think better of their outbreak and suddenly subsided. The subsequent eulogistic references to General Methuen were received with cheers.

In brief Lord Kitchener announced that when General Methuen was captured, wounded, with four guns three British officers and 38 men were killed, and that five officers and 75 men were wounded. In addition one officer and 200 men were reported missing.

The text of Lord Kitchener's dispatch announcing the capture of General Methuen is as follows:

"Pretoria March, 8.—I greatly regret to have to have to send you bad news of Methuen. He was moving with 900 mounted men under Major Paris, and 300 infantry four guns and a pom-pom from Wynburg to Lichtenburg, and was to meet Grenfell, with 300 mounted men, at Rovinaesfontein today. Yesterday morning early he was attacked by Delarey's force between Twebosch and Palmietenill. The Boers charged on three sides. "Five hundred and fifty men have come in at Maribogs and Kraaipan. They were pursued by the Boers four miles from the scene of action. They report that Methuen and Paris, with the guns, baggage etc., were captured by the Boers. Methuen when last seen was a prisoner. I have no details of the casualties, and suggest delaying publication until I can send definite news. I think this sudden revival of activity on the part of Delarey is draw off the troops passing Dewit."

A Severe Cold For Three Months

The following letter from A J Nusbaum, of Batesville, Ind, tells its own story. "I suffered for three months with a severe cold. A druggist prepared me some medicine, and a physician prescribed for me, yet I did not improve. I then tried Foley's Honey and Tar and eight doses cured me." Refuse substitutes. Sold by The New Era Drug Store.

Assayer Herbert Leigh, of Eugene was in town Saturday on his return from Bohemia. While gone Mr Leigh, located a very valuable water right on Frank Brice Creek from the mouth of Champion creek down stream for a distance of two miles. In this distance there are several splendid waterfalls and a fall of a full 300 feet, giving a splendid power for mills which are to be created in that vicinity. Two mill-sites were also located, one for himself and the other for Alf Walker.

Mr Leigh says that a big company is figuring on putting in a large reduction plant along the line of his proposed ditch and the power for its operation will be obtained from the water of the ditch.

"Something New Under The Sun"

All Doctors have tried to cure CATARRH by the use of powder, acid gases, inhalers and drugs in paste form. Their powders dry up the mucous membranes causing them to crack open and bleed. The powerful acids used in the inhalers have eaten away the same membranes that their makers have aimed to cure, while pastes and ointments cannot reach the disease. An old and experienced practitioner who has for many years made a close study and specialty of the treatment of CATARRH, has at last perfected a treatment which when faithfully used not only relieves a once, but permanently cures CATARRH by removing the cause, stopping the discharges, and curing all inflammation.
