Big New Saw Mill.

SPRINGFIELD.—June 18.—For the past two or three days, the Booth-Kelly Lumber Co has had surveyors at work locating a site for a large new sawmill at this place.

The new mill will be located just south of the S P depot, and will have a capacity greater than the Wendling mill which is 150,000 feet every 10 hours. The new one will probably have a capacity of 200,000 feet.

It is stated that the mill will be rushed to completion. The old mill here is now sawing out timbers for the new plant.

The erection of this mill means that there is now no doubt of the railroad bridge and connecting branth being built this year.
