In Baking Powders "Royal" Leads.

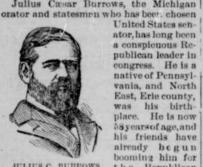

As the result of my tests, I find the ROYAL BAKING POWDER superior to all the others in every respect. It is entirely free from all adulteration and unwholesome impurity, and in baking it gives off a greater volume of leavening gas than any other powder. It is therefore not only the purest, but also the strongest powder with which I am acquainted.

Suggestions and Facts That Tend to Profit.

The Great Northern Railway Has the Work Under Preparation and is Desirous of Obtaining all Information

A communication has been received

from St. Paul from F. I. Whitney, general passenger and ticket agent of the Great Northern railway, on the subject of small and diversified farming. The railway officials recognize the fact that there is far more business for a road from a region thickly populated and pro- er a day on the shore. ducing many kinds of crops than from a tion by the cutting up of the large farms into small tracts and their cultivation in such a manner that each small area shall support a family. This matter of immigration is an important one and affects the entire Northwest. The efforts of the railroads to induce the right kind eral encouragement and aid. The information asked for in the letter should be supplied by the intelligent farmers, journalists and hopgrowers who have it their command. Mr. Whitney's letter is as follows:

"We are desirous of securing a series of letters from practical men of your the boatmen left off rowing. They put State devoted to the discussion of intendown their oars, and one of them began sive farming. In our various publications, which we freely distribute about derstand what he said. 'What's to be the East, we have made the broad claim done? said one of the young men to my that ten acres properly cultivated to vegetables or fruits will make a good living for a family. This we have done on account of the many instances of success attending the tillage of small areas, an acre, more or less, which have come men paid no attention, shrugging their to us from nearly every part of the Pacific Northwest. There is more waste land from an agricultural standpoint in your States than in the Mississippi Val-ley. All the land capable of cultivation in your country should be in small holdings and made to produce to the limit. Small farming means much. It means better goads, better schools, nearer neighbors and better markets. It means such as I had never seen him in before sociability, companionship and touch with the world; but I need not enlarge in loud and impatient English, 'D upon the importance of increased popu-

lation and well-managed acres.
"Your climate invites out-door life; it invites people from more rigorous sections to come and prolong their lives and usefulness. Your varied resources invite capital, industry and development. New men will uncover new avenues to wealth and happiness. We be-lieve in building for the future, in laying sure and firm foundations; but while doing it we should share some of its benefits. Let us ourselves partake of
