TRANS-PACIFIC CABLE

It Will Be Built by Some British Capitalists.

MID-OCEAN STATION SELECTED

Its Length Will Be Nearly 7,000 Miles.

San Francisco, July 4. - Hugh Craig, vice president of the chamber of commerce, says that from a thorough investigation of the subject he is convinced that the Pacific cable, which has been talked about for years on this side of the United States, is to be built by British capitalists.

Those who have been interested in the case here have learned little from the messenger reports of Judge Ross' decision, but it seems that his chief reason for setting the claim aside is that the personal liberty clause in the California constitution was not adopted until after the Hawaiian islands had entered into their contract with the builders of the road.

Attorney-General Harmon has just received from San Francisco copies of the government decisions in the case, and he is preparing to take up the matter. It is not doubted that the case will be carried to the supreme court. This will add another year or two to the time already occupied by the proceedings.

THE DEATH OF PEIXOTO.

It Was Entirely Unexpected and Has Caused Much Excitement.

Buenos Ayres, July 3. - The report of the death of President Peixoto, of Brazil, reached Rio de Janeiro Saturday night. It has been impossible to get details before this owing to the distance from Rio de Janeiro to Peixoto's home.

The ex-president expected to leave his home for Rio de Janeiro when he was attacked with a fatal disease, a combination of beriberi fever and an abscess of the liver. He was comatose until his death. Physicians were at once summoned from Rio de Janeiro to embalm the body. When it arrived at Rio Janeiro, however, it was in a bad condition.

There was great excitement in the latter city, and groups of friends of Peixoto and the late Admiral Saldanha da Gama gathered in force in the streets showing a decidedly angry spirit. These groups were finally dispersed by the police.

All the clubs and theaters are closed, and all flags are placed at half-mast. It has been decreed that the funeral shall be public and military in character.

One of the leading papers in Rio de Janeiro deeply laments the death of Peixoto. Others content themselves with notices of the death, adding that it will certainly end the spirit of opposition of President Moraes, as there is now no leader in the party of which Peixoto was the head.

A Famous Railroad Tax Case.

Ashland, Ky., July 3. - In a stranger case of the appearance of strangers who acknowledge their mission to be to collect the famous railroad tax, which has been in dispute for forty years. This tax grows out of the bond issues of \$75,000 to the Elizabethtown & Lexington & Big Sandy railroad from Lexington to Cattlesburg. The company, after securing the bonds, abandoned the project, selling the bonds at a liberal discount to David Hinton, a millionaire at Cincinnati. Through a mistake of the county attorney in drawing up the contract, the road escaped the liability for construction. All of the bondholders, save a single resident of Carter county, are dead, and 2,500 of the next generation have organized to resist the collection. Numerous attempts have failed, and it is now regarded as worth your life to attempt the collection. Two months ago a deputy collector, after making a levy upon the farmer's property, escaped being lynched by 500 people only by slipping off in the night. The men are determined that no collection shall be made, and openly announce it. All that holds the matter from a crisis now is a doubt of the sincerity of the collector and his allies.

Satisfied to Be a Woman.

Washington, Del., July 4. - Miss Hettie Dickey, the pretty young blonde who returned to her father's house in Stanton yesterday, is cured of all desire to be a man. She left her home in that little village three months ago dressed in a man's garb. Miss Dickey explained tonight that she had for years wished she were a man. The impulse to see the world as a man gave upon her to such an extent that she finally decided to leave home. She selected a suit of her brother's clothes, and on March 24 she slipped quietly into the shed and put on the masculine attire. She walked calmly out of the yard in front of her home to the road leading to Kilmerski station, on the Baltimore & Ohio. She followed the track for three miles without meeting anyone. Then two men came in sight, and for fear of detection she turned aside into a field and made her way to Newark, whether she took the train for Baltimore or whether her experiences have taken away all desire to be a man.

THE KING OF THE LIVER

Reader, did you ever take SIMMONS' LIVER REGULATOR, the "KING OF THE LIVER REMEDIES?"

Every package has the Red Z Stamp on the wrapper. J. H. Zeilm & Co., Philadelphia.

AGAINST THE STANFORD ESTATE

The Case of the Government Will Soon Be Appointed.

San Francisco, July 3. - L. D. McKisick, special counsel for the government in the suit to recover \$15,000,000 from the Stanford estate, says the case will, at once be appealed to the United States court of appeals, and from there to the United States supreme court if necessary.

Much Interest Shown in Washington.

New York, July 3. - The Herald's Washington special says the decision of Judge Ross in San Francisco, in regard to the claim of the government against the stockholders of the Central Pacific, has been received here with much interest.

Those who have been interested in the case here have learned little from the messenger reports of Judge Ross' decision, but it seems that his chief reason for setting the claim aside is that the personal liberty clause in the California constitution was not adopted until after the Hawaiian islands had entered into their contract with the builders of the road.

Attorney-General Harmon has just received from San Francisco copies of the government decisions in the case, and he is preparing to take up the matter. It is not doubted that the case will be carried to the supreme court. This will add another year or two to the time already occupied by the proceedings.

THE POLITICAL HONORS.

Some of Those Restored by Queen Victoria of England.

London, July 2. - In addition to conferring knighthood on Joseph Remals, lord mayor of London, the political honors include the following:

Baron Houghton, the retiring lord lieutenant of Ireland, and Baron Carrington, the retiring lord chamberlain, were made earls; Sir Henry Brougham Loch, Sir Robert George Wyndham Herbert and the Right Hon. Herbert Constable Gardner, president of the board of agriculture, are made barons.

The Right Hon. Henry Hartley Fowler, the retiring secretary of state for India, has had conferred upon him the grand cross of the Star of India. The Hon. Henry Campbell-Bannerman, retiring secretary of war, secures the grand cross of Bath. Robert Griffin, the statistician, and Colonel Vivian Berington Majendie, the expert on explosives and chief inspector of explosives, and Captain Frederick E. Lugard, are made companions of the Bath.

Numerous supporters of the liberal party have various honors conferred upon them. These include a baronetcy for Mr. Naylor-Leland, who recently resigned the unionist party; and Sir George H. Carter, the newly appointed under-secretary of foreign affairs at Southport in the liberal interest.

The Times says that Sir Graham Bower has been appointed governor of Finland.

London, July 2. - The Times this morning, in an editorial commenting upon the baronetcy conferred upon Mr. Naylor-Leland, declares it is gross abuse of the crown prerogative that such an apostate should be singled out for honor by the queen's responsible advisers.

Mr. Naylor-Leland's wife was Miss Jennie Chamberlain, daughter of S. S. Chamberlain, of Cleveland, Ohio.

THE FOREIGN MARKETS.

Change in the Government Had a Good Effect on Speculative Stocks.

London, July 2. - The change of government with the certainty that the elections are near have had a good effect on the stock market, stimulating speculation and investment. All the principal sources of sugar supply are the refineries situated in the different parts of the United States; but a very large portion of the stock is manufactured by these refineries in Germany, the Sandwich islands and the West Indies.

Another point of importance for refined sugars is China, but the sugars from that country are only used in any quantity on the Pacific coast. Not less than \$1,500,000 was sent to China for sugar consumed on the Pacific coast during the year 1894, and the business threatens to increase.

Now there are two very important factors to the development of this Western country. The first is to produce those articles that are in demand, and which can take the place of imported products for which our money has to be sent abroad. The second is to encourage the population in our immediate section to consume those articles that are produced as far as possible on the coast.

There are several sugar factories in California, doing a large business. In 1894 they spent for labor alone \$500,000. While there is room for sugar here, there is plenty of sugar here to supply the demand; and the importation of China sugars has been carried out to the limit. The second is to encourage the population in our immediate section to consume those articles that are produced as far as possible on the coast.

Quite a Scandal in Duluth.

Duluth, July 2. - Miss Nettie Dean, a society girl, and daughter of John Dean, one of the wealthiest men in the city, has eloped with Alfred Berkland, her father's hired man. Berkland, who is a good-looking but ignorant fellow, was employed by Dean some months ago. The girl is 17 years old. She was removed several times from talking with Berkland, and it made her angry. A few days ago she packed her clothing, but as she said she was going to visit friends, no attention was paid to the matter. Yesterday she disappeared, and Berkland left last night. Miss Dean is an only child, but her father will disinherit her.

An Effort to Reinstale Him.

Washington, July 1. - A determined effort will be made to secure the restoration to office of Professor George Davidson. The news that he had been dropped from the list of created a commotion among federal officers, shippers, steamboat men, scientists, and many other circles where Professor Davidson has friends. Senators Perkins, White and Allen have telegraphed protests against his removal.

A Denial From Depew.

New York, July 1. - Chauncey M. Depew, who, it is rumored, is about to marry again, met some reporters this evening and made the following statement:

"The story is made out of whole cloth. I do not know of any young lady worth \$80,000, who would have me. No less than four times recently have rumors had me engaged to marry, and the most estimable young ladies mentioned would no doubt have conferred a great honor on me had the rumors been true. They were not, however, and I do not think any such rumor at any time will be substantiated."

The Japanese Force Is Advancing.

Hong Kong, July 2. - The British admiral has withdrawn the guard from the island of Formosa, and has offered to take foreigners aboard the ships. The German admiral has made a similar offer to the Germans. It is believed the reason for this action is that it is inexpedient to retain the guard with the Japanese forces advancing, and firing prohibitory.

Again Minister of Agriculture.

Paris, July 2. - M. Gadaud, who resigned his position as minister of agriculture for the purpose to fight a duel with M. Mirman, the socialist deputy, as was stated in the press dispatches yesterday, has resumed the ministry of agriculture.

THE DANGER IN SUGAR

Some Interesting Facts Not Known at Home.

UNCLEAN AND GERM-LADENED

Chinese Wares Being Largely Consumed in Oregon and Washington That Are Utterly for Use.

Portland, Or., June 26. - The steamship Tacoma arrived at Victoria recently from Hong Kong, China, with the latest Oriental advices and reports the plague in that unfortunate country again raging violently. It is said by natives from Amoy that this awful pestilence has suddenly broken out in the Tungun district, China, with terrible violence, 40 per cent of the inhabitants actually dying of the disease and few escaping the sickness. Those who are able to leave doing so only to carry the plague elsewhere.

Referring to the report a well-known business man stated to the press representatives tonight that the Tungun district is one of the sources of supply for raw sugar for the Hong Kong sugar refineries and as large quantities of these sugars were shipped to the Dominion of Canada and the United States that the people hardly appreciate the frightful results that might follow if general interest and production below. After some general remarks on household economy this stated:

In view of all this a recent article published in a leading coast paper which dealt extensively with the subject of general interest and production below. After some general remarks on household economy this stated:

They contain great numbers of disgusting insects, which produce disgusting disease. Their shape is very accurately shown in the accompanying cut, which is magnified 200 diameters. Figure 1 is the under side and figure 2 the upper. The professor's description is as follows:

"The insect (the acarus sacchari) is a formidably organized, exceedingly lively and decidedly ugly animal."

Probably enough has been said here to awaken some interest in this subject, and it is hoped readers of this article will stipulate when they order sugar that it is produced on the Pacific coast, and show that they want sugars made by home refineries, which employ white labor only.

Statistics show that this country has sent abroad in a single year \$116,000,000 for sugar alone, or a per capita consumption of 67 pounds. Of this immense consumption only 600,000 bags were foreign sugars, and yet it has been asserted by one of the most prominent men connected with this business that California alone, if the interest were properly developed, would produce enough raw beet sugar to supply the demand of the entire United States. What a boon it would be to Oregon if we could locate in the central portion of our territory a refinery for making beet-sugar.

The Olympia's Trial Trip.

San Francisco, July 1. - The Olympia went to sea today, and demonstrated that she is one of the worthiest of her class in the fleet of white fighters comprising the United States navy. An official trial was called for by the government. Such is the case always with a new vessel, just entering the navy. The trial was conducted exclusively by government officials, and was to comprise a thorough test of everything pertaining to the workings of a modern war cruiser, from the firing of the immense howdahs down to cutting turns within a limited space in mid ocean. Every caper the handsome flyer essayed she accomplished with surprising grace. Her guns worked to perfection, and during her fourteen-hour run over a measured course she averaged within a minute fraction of twenty knots an hour, under natural draught. The object of the trial was to ascertain whether or not the cruiser was in perfect trim for actual war, and was simply preliminary to assigning her to her regular line among the regular line of fighters.

The Olympia's officers and crew were delighted with the showing she made, and could not say too many nice things about her. Another thing which caused them ease of mind was the fact that although every bolt and block connected with the vessel was put to the severest strain, not an accident occurred throughout the trip.

NOT AN ACT OF PROVIDENCE

Powder Works Responsible for the Results of an Explosion.

San Francisco, July 1. - The supreme court has decided that a powder explosion is not an act of providence and that the owners of such powder are responsible for any damage that may result from an explosion. The estate of Egbert Judson sued the Giant powder works for damages done to its property by an explosion of powder in the works of the powder company. The supreme court awarded the Judson estate \$41,000, and the case was appealed to the supreme court. The only defense on a plea of fatalism, it being maintained that powder explosions cannot be prevented. The supreme court in upholding the decision of the lower court, says:

"An explosion does not occur in such a manner that it is an act of providence. The causes of the explosion being unexplained, it is probable that it was occasioned by lack of proper care."

Quite a Scandal in Duluth.

Duluth, July 2. - Miss Nettie Dean, a society girl, and daughter of John Dean, one of the wealthiest men in the city, has eloped with Alfred Berkland, her father's hired man. Berkland, who is a good-looking but ignorant fellow, was employed by Dean some months ago. The girl is 17 years old. She was removed several times from talking with Berkland, and it made her angry.
