BATTLE OF RIVOLI.

NAPOLEON SAID THAT HIS LIFE REAL-LY BEGAN THERE.

The Short Campaign Was the Turning Point of the War and Shaped the History of Europe For Twenty Years-The Austrians Five Minutes Late.

Professor Sloane's "Life of Napoleon" in The Century describes the masterly Italian campaign, in which Napoleon's military genius first won worldwide recognition. Professor Sloane thus describes the battle of Rivoli:

At early dawn began the conflict which was to settle the fate of Mantua. The first fierce contest was between the Austrian left and the French right at St. Mark, but it quickly spread along the whole line as far as Caprino. For some time the Austrians had the advantage, and the result was in suspense, since the French left, at Caprino, yielded for an instant before the onslaught of the main Austrian army made in accordance with Alvinczy's first plan, and, as he supposed, upon an inferior force by one vastly superior in numbers. Berthier, who by his calm courage was fast rising high in his commander's favor, came to the rescue, and Massena. following with a judgment which has inseparably linked his name with that us spot, finally restored order to the French ranks. Every successive charge of the Austrians was repulsed with a violence which threw their right and center back toward Monte Baldo in ever growing confusion

The battle waged for nearly three hours before Alvinezy understood that it was not Joubert's division, but Bonaparte's army, which was above him. In his zeal he then pressed forward on the plateau beneath the height to bring more of his troops into action, and Jonbert somewhat rashly advanced to check the movement, leaving the road to St. Mark unprotected. The Austrians, prompt to take advantage of his blunder. charged up the hill, and seized the commanding position, but simultaneously there rushed from the opposite side three French battalions, clambering up to retrieve the mistake. Their physical them first to the top, and again the storming columns were thrown back in dresses. -Pittsburg Dispatch.

At that instant appeared in Bonaparte's rear an Austrian corps estimated by him as 4,000 strong, which, having come down the valley on the left bank. had now crossed the river to take the French right at Rivoli in its rear. Had they arrived but a minute sooner the hill of Rivoli would have been lost to the French. As it was, instead of making an attack, they had to await one. Bonaparte directed a galling artillery fire againt them, and thus gained time both to reform his ranks and hold the westward, cut them entirely off from word." the retreating columns of Alvinczy, and compelled them to lay down their arms.

Thus ended the worst defeat and most complete rout which the Austrian arms had so far sustained. Such was the utter demoralization of the flying and disintegrated columns that a young French officer named Rene, who was in command of 50 men at a hamlet on Lake Garda, successful y imitated Bonaparte's ruse at Lonato, and displayed such an imposing confidence to a flying troop of 1,500 Austrians that they surrendered to what they believed to be a force superior to their own. Next morning at dawn Murat, who had marched all night to gain the point, appeared on the slopes of Monte Baldo above the pass of Corona, and united with Massena and Joubert to drive the Austrians from their last foothold. The pursuit was continued as far as Trent. Thirteen thousand prisoners were captured in those two

This short campaign of Rivoli was the turning point of the war, and may | you don't pay for the trunk. be said to have shaped the history of Europe for 20 years. Chroniclers dwell upon those few moments at the hill above the plateau of Rivoli, and wonder what the result would have been if the last Austrian corps had arrived five minutes sooner. But an accurate and dispassionate criticism must decide that every step in Bonaparte's success was won by careful forethought and the most effective disposition of the forces had the slightest legal right on earth, at his command. So sure was he of sucat his command. So sure was he of success that even in the crises when Massena seemed to save the day on the left and when the Austrians seemed destined to wrest victory from defeat at the last moment on the right, he was self reliant and cheerful. The new system of field operations had a triumphant vindication at the hands of its author.

The conquering general meted out unstinted praise to his invincible squadrons and their leaders, but said nothing of himself, leaving the world to judge whether this was man or demon who, still a youth, and within a public career of but one season, had humiliated the proudest empire on the continent, had subdued Italy and on her soil had created states unknown before without the consent of any great power, not excepting his own. It is not wonderful that this personage should sometimes have said of himself, "Say that my life began at Rivoli," as at other times he dated his military career from Toulon.

"Yes," said the practical politician, "it is true that I have made \$200,000 in the last ten years, but I worked for

"Of course you did," replied the epigrammatical, if ungrammatical, lawyer, 'but the question the people are asking each other now is, 'Who did you work?' -Somerville (Mass.) Journal.

Evidence That the Royal Ladies of England Do Sometimes

WHO SETS THE FASHIONS?

The late Mr. Worth, the Parisian king of dressmakers, once said that it frequently took him as long as three years to educate the public up to one of his fashions, and to have it adopted. He of method is the modern idea of leading course has set a great many fashions in his time, but the dressmakers are not responsible for most of the changes that take place.

It is a simpler thing for a man like the Prince of Wales, who is generally admitted to be the best dressed gentleman in Europe, to change a fashion in men's clothing than it is for a lady in society to change the fashion of the time, or to bring in a new one. But any of the recognized fashion leaders, such as the Duchess of Sutherland, the Countess of Dudley, Lady Brooke, the Countess Grosvenor or Mrs. Cornwallis West, can, if they persist long enough, bring in a fashion which will soon become generally popular.

For instance, the Duchess of Portland, after her marriage, had a strong inclination for Malmaison carnations as buttonholes, and wore them on every possible occasion. Before that time they were not much sought after, but very soon all the florists in Bond street and Regent street had a great display of them in their windows.

uted to the list of riddles. The anagram, or transposition of the letters in words or sentences, was much in vogue in Greece in the olden times. The Cabalists, or Jewish doctors, thought that the anagram always pointed out a man's destiny, and if his name written backward or transposed in any way spelled a word with meaning they firmly believed it a revelation. The flatterers of James I of England proved his right to the British monarchy as the descendant of the mythical King Arthur from his name Charles James Stuart, which becomes "claims Arthur's seat." The best anagrams are those which have in the new order of letters some signification appropriate to that from which they are formed. When Pilate asked, "Quid est veritas?" (What is truth?), he probably had no idea that his questransposition made it, "Est vir qui adest" (It is the man who is here). Anagrams were written as early as 250 B. and their name borses from the Greek words ana, backward, and gramma, writing.—Philadelphia Press.

Secret of Living Long. The necessity of relative harmony throughout the entire physical system This oddity's bed, or rather the way it cannot be too strongly urged. Herein lies the chief secret of health and long a person were to walk suddenly into life. Menifest weakness, or even predominant strength, in any part opens the avenue for the invasion of disease and the appoach of death. What can be done for the realization and maintenance of structural and vital harmony? Space would fail us to give details adapted to varying conditions, but the underlying fundamental principle for its accomplishment may be imparted in few words. Strive to strengthen and develop those parts of the body which have been slighted by nature or weakened by disease or abuse; guard zealously such structures and see that they are never subjected to undue strain or too active exertion; neglect not the improvement of every part of the economy, but seek first to improve the weakest structures; look well to organs of vital importance—the heart, lungs, kidneys, etc.—and seek especially to advance their good. A fine physique is not to be ignored, but of far greater importance are a strong pair of lungs, a normal, well guarded heart, good digestive apparatus and functionally sound kidneys. The strengthening and developing of vital structures require more skill and perseverance than the training of the muscular system and should be conducted with much care and diligence.-Dietetic and Hygienic Gazette. Eat Fruits.

The warmth of summer tends to bilousness and fevers, and the free use of fruits counteracts this tendency. This is because the acids of the fruit help to cooling" is an expression often used. tite are impossible.

000 every time he gets the workmen into the house. As you go into the building you first notice a great oak Years ago the colonel was in Vienna. In some old building there he saw a staircase with painted panels and inlaid vexation at not being able to solve a tiles and scrolls and gimeracks of one gone mooning round and debating sort and another in it. He was entranced and determined to have a counterpart nights in the baronial hall and also in of it in his new hotel, which he would open for the World's fair year. When he came home, he hired workmen, and a part of them he put on the staircase. The men started to work with sandpaper and pumice stone to take off the old paint and varnish. The colonel stopped them. They must scrape it with glass, their way, but to no purpose. It would not do. It must be scraped with glass. He was paying for that staircase, and he was going to have it done his way. So the men got pieces of broken glass and began to scrape. From morning till night a half dozen men scraped and scratched away with bits of glass. They finished the work in time, but the sum which it cost the colonel was something prodigious.

Then he concluded that a furnace in a house was a poor idea, so he had that taken out and the registers stuffed up. tion answered itself. But it did. The He said when he opened his hotel he would furnish the guests with candles, and they could have stoves if they chose to pay for them. The cheapest room in the house was to be \$3 a day.

Personally Colonel Perkins does not like running water in a room. Therefore he has had it shut off in his room and a basin set in the stationary bowl. A pitcher of water sets on the floor. is placed, is the queerest imaginable. If this man's bedroom, he would rub his eves and wonder where he was. Suspended in the center of the room by chains from the ceiling is the colonel's bed. He reaches it by means of a small stepladder, which he had built for the purpose. The reason he assigns for having his bed placed in this singular position is that the air circulates better up there. How the circulation of air could have any bearing on the case is not easily seen, as the transom and every window in the room is nailed shut with big spikes.

The blankets on the bed are of the finest silk. These he sends to Boston to be cleaned, where he also sends his Druggists, Toledo, O.
Hall's Catarrh Cure is taken internally, One time during an annual campaign of repairs the colonel concluded the mattresses and pillows needed refilling and the chairs and sofas needed new upholstering. Instead of sending the things out to be fixed he had men come to the house. The mattresses, pillows and furniture were all ripped open, and the contents he had the men pile in one room. Half way to the ceiling was a heap of hav, corn husks, curled hair and excelsior, and there it remains to this day, or at least a part of it is in that room. A portion, through carelessly opened doors and windows, has been blown through the rest of the house. The frames of the furniture also had to be all scraped with glass, and the cost was something like three times what

new furniture would cost. Another innovation which the colonel says he will embody in his hotel is doors which sink into the floor. He proposes to have the doors fitted so that by pressing a button they will sink into grooves until the top is flush with the Pressure upon another button brings them up again. Whenever he intends to go on a trip

his trunks are packed and sent on exactly three days before he leaves. If by just one day. - Chicago Tribune

A Progressive Princess. Mrs. Weldon, the wife of Mr. Frank

Weldon of the editorial staff of the Atlanta Constitution, is in correspondence with the Princess Nazle of Cairo, Egypt, with a view to securing an exhibit of the work of the women of Egypt in the woman's exhibit at the Cotton States and International exposition. The Princess Nazle, though a Moslem, has abandoned the veil and enjoys more freedom than most Mohammedan women. She is regarded as the most enlightened and progressive woman in Egypt and has many friends and correspondents in America.
