Cottage Grove Echo-Leader.

PUBLISHED EVERY SATURDAY.
E. P. THORP, - - EDITOR.

SATURDAY, AUG. 17, - - 1895.

A blooming bloomer sailing along on a bicycle at a dizzy gait, is a pretty good side show itself.

It is an old truism that a tattler can do more damage in a minute than a wise man can straighten out in a month.

S. F. Call: The 200,000 cans of apricots which a single canner of Santa Clara is sending to London show that the finding of a market for California products is merely a matter of looking for it.

Over 5000 horses from the United States the first four months of this year against 2000 for the same period last year, were shipped abroad, which indicates that our trade in horses with Europe is increasing.

East Oregonian: Hogs are in greater demand than for sometime. A high as four cents a pound has been paid for them in this market. The new packing house at Tacoma appears to have stiffened prices.

East Oregonian: California has also a board of railroad commissioners drawing pay from the people and doing nothing for it. The San Francisco Call is after them with a "sharp stick"—an editorial pencil vigorously shoved.

Tacoma Union: Tacoma has a large packing house in operation and will soon have another. Californians have also decided that a packing establishment is a necessity. Eastern Oregon farmers ship their hogs to Chicago, but they have a horse abattoir over there that is doing a thriving business.

East Oregonian: The Northern Pacific announces a great reduction in the price of its lands to actual settlers. This is a gratifying announcement. Less that labor has to pay for access to land, better the times are and more general is prosperity among the people. Labor goes to work when access to land is easy, and stops work and becomes idle as soon as access to land becomes difficult and expensive. Here is the exact difference between "good times" and "hard times."

We publish a valuable article taken from the New London (Wis.) Tribune, in the ECHO-LEADER this week. This with other very interesting information from the Bohemia gold district, makes the ECHO-LEADER of this week a valuable paper which friends of their own interests here should purchase and send away as many copies as possible. It costs the publisher considerable to make such a paper as the ECHO-LEADER, and property owners should be lending a helping hand to a good cause. The publisher is doing many times more than his patronage justifies, and those whose interests are being advanced all the time should lighten his burden with a few dollars occasionally to help pay expenses.

Western Mining World: There is no country in the world in which the operations of mining and the reduction of ores have been carried to such a degree of perfection as in the United States. We are justly proud of our mining and timbering, the square sets, etc., being prepared on the surface and lowered ready for adjustment; of our steam and compressed air drills, our cage system with double floors for hoisting, our surface and wire tramways and nearly perfect mills and smelting works; yet this pride, coupled with self sufficiency, has often led to serious errors.

Western Mining World: The copper market has steadily increased in strength throughout the past week and prices have advanced considerably. The great factors of supply and demand are the governing and impelling forces now in operation, and they are so favorably adjusted as to fully warrant and encourage confidence in the permanent character of the advance in prices. The market has wonderful backbone and a bouyancy not witnessed before for some years. The demand has been surprisingly active for the midsummer season, with liberal sales of Lake, electrolytic and casting. The entire course of the market forcibly illustrates the presence of those indispensible elements of subsurface strength which have given vigor and tone. The fact that in a usual quiet period the market has kept steadily on the upward trend is proof of the solid basis upon which it rests. Copper is going into consumption in immense quantities in this country, and a large increase in consumption over present rate is expected. Producers have much less necessity to look to foreign countries for a market, as they have no surplus stock on hand to worry over.

ROYAL Baking Powder.
Highest of all in leavening strength.—U. S. Government Report.

BOHEMIA GOLD MINES.

The ECHO-LEADER desires to give all the information about the Bohemia gold district that can benefit the camp or the public, and the publisher is always glad to secure any reliable information from those who are identified with the camp. Among the large numbers of valuable claims in Bohemia, the Broadway Mining Company's mine is exceedingly promising. The Broadway joins the Champion on the west, and as far as development work has gone, is pronounced by expert miners to carry very rich gold quartz. They have three large rich ledges running parallel below them on the Diamond claim and one on the Frank Brass claim. They have also plenty of water, and the company's claims are covered with good mining timber which makes their property one of the most valuable in that district. They also have one of the finest mill sights in Bohemia, and on the prospect wagon road. Plenty of water to run a ten stamp mill and an abundance of good timber for building purposes, is a valuable combination. The members of the Company are quiet and unobtrusive, yet they are steadily working to improve their property and are bringing it up in value all the time. They have a tunnel on the Broadway 169 feet and have drifted on the ledge 35 feet. On the Diamond claim they have a tunnel 30 feet, and have cut one rich ledge five feet thick and are within twenty feet of another large one. They also have a tunnel 96 feet on the Frank Brass mining claim but have not cut this ledge yet. In three years, we see by figures that they have tunneled 250 feet, besides making other improvements. The extent of the tunnels alone makes a good showing. At a cost of at least $10 a foot the tunnels would net $2500. Capitalists from California have been looking over the property of the company and are awaiting another call, with a view of investing and putting in a ten stamp mill. The boys however, desire to complete the cutting of all their leads and to more fully develop the evident phenomenal richness of their claims, before considering the proposition of the California capitalists.

HOMESTEAD ENTRY.—S. F. Call: E. B. Gardener, Douglas County, Or. Henry N. Copp of Washington, D. C., one of the best authorities on land laws of the United States, says in The American Settlers' Guide:

As the law allows but one homestead privilege, a settler relinquishing or abandoning his claim cannot thereafter make a second entry, but where an entry is canceled as invalid for some reason other than abandonment, and not the willful act of the party, he is not thereby debarred from entering again, if in other respects entitled. No credit is now allowed (1894) for fees and commissions already paid, on a new homestead entry.—S. F. Call.

Diarrhœa should be stopped promptly. It soon becomes chronic. DeWitt's Colic & Cholera Cure is effective, safe and certain. Hundreds of testimonials bear witness to the virtue of this great medicine It can always be depended upon, its use saves time and money. J. P. Currin.

A holdup has again occurred on the Roseburg Coos Bay stage near the last place and undoubtedly by the same man. Dan Cardwell and Barney Mathews, of Roseburg, were on the seat with the driver, and Maj Pond, the lighthouse inspector and Miss Myrtle Bryan were inside, the men on the seat were discussing the previous robbery at the time. Cardwell said "Would it not be a joke if a robber should appear from behind that tree on this side of the road," and immeniately the robber appeared with two revolvers. Cardwell had over $200 but he only gave up $4, and Mathews with several hundred dollars gave up $2.50. Major Pond contributed $1.50, and the young lady with $134 in her pocket was not disturbed. The robber left saying he wonld see them again in a day or two.

Severe griping pains of the stomach and bowels instantly and effectually stopped by DeWitt's Colic and Cholera Cure. J. P. Currin.

STAGE STOOD UP.—These stand ups are becomming seriously near. Yesterday one occurred in the lower part of the valley, the second stand up for the same stage. Two masked robbers stopped the Oregon City and Wilhoit Springs stage. Words pasced between the driver and robbers, and one of the latter fired, just missing the drivers head. They secured about $10 and swore they would kill the driver if they did not get more next time. There was three passengers on board, Bert Alisky and C. A. Towne, two well-known Portland men, and a lady, who offered her watch which was refused by the robbers.—Albany Democrat.

Children, especially infants are soon run down with Cholera Infantum or "Summer Complaint." Don't wait to determine, but give De Witt's Colic & Cholera Cure promptly, you can rely on it. Use no other. J. P. Currin.

The World's Fair Tests showed no baking powder so pure or so great in leavening power as the Royal.

SOME REQUIREMENTS NECESSARY TO CONFORM WITH THE STATUTES.

Some Information of Interest to Donation Land Claimants—Possession Alone not Sufficient to Hold Land.

[Roseburg Review.]

(The following article is the fifth of a series, beginning in the issue of May 20th, and dealing with the subject of our homestead and land laws. The information given may be relied upon as absolutely correct, and from official sources. Those interested in land matters, should file away Monday's Review, as long as this series of articles is continued.)

The notice now being published in The Review relative to donation claims is a matter of great importance, and every owner of an old donation claim should see to it at once that a patent has been issued therefor.

There are hundreds of old donation claims in Roseburg land district on which final proof has never been made, and the incomplete papers are now in the local land office.

In many instances the present owners think they are secure, and that their title is good because they have a warranty deed from some one. Never having had an abstract of the land, they are entirely unaware of the fact that they have no title.

There are instances where as many as a dozen transfers of an old donation claim have been made by warranty deed, and as a matter of fact, no patent has ever been issued and the title is still in the United States. In order to clear the records of the land offices, an act was passed as per the notice now being published, and if the proofs are not completed prior to January 1, 1896, the donation claims will be canceled, the land revert to the government and be subject to entry.

Time does not run against the United States, and ten years possession gives the settler no claim. It is therefore, very important that every person now living on, or owning, as he supposes, an old donation claim, should at once ascertain if patent has been issued.

Full information may be had by calling on or addressing the local U. S. land office at this place.

A great many persons living on government lands are of the impression that possesiion will hold the land against all comers. In this they are mistaken.

The law provides that a settler on surveyed lands has 90 days preference right, from date of settlement, in which to make entry of said land, at the local land office; and on unsurveyed lands, 90 days from the date of the filling of the approved plat of survey.

A pre-emption filling on unoffered lands expires in 33 months after date of settlement, or if on unsurveyed lands, 33 months after the date of filing the approved plat of survey; a homestead entry is canceled 8 years after the date of entry.

Throughout this land district are a large number of persons who filed pre emptions prior to the repeal of the pre-emption law, who have failed to make proof, and payment therefor, or who have failed to transmute the same to homesteads, which they may do under the law, even though they had made and completed one homestead entry, but who nevertheless, are still living on their pre-emptions, placing valuable improvements thereon, intending to obtain title when they feel able, and feeling secure by reason of possession. Persons in this condition have no protection. A case in this district, just decided by the General land Office, is directly in point. It is as follows: Thomas Day made a pre-emption entry in 1889, and the 33 months elapsed, and he failed to make proof and payment or to transmute to a home entry. In April, 1894, James R. Poe made homestead entry of the tract covered by Day's entry and built a house thereon, after being forbidden by Day. Day then appeared at the local office and made an affidavit that he was at the time and had been from date of his entry in 1989 to the present time, living on his said entry, and improving same as best he could; that because of sickness he had been unable to earn money enough to provide any more than the necessaries of life; that he intended to transmute his filing to a homestead as soon as he was able, and that the improvements thereon were valued at $300, that Poe knew his condition and was endeavoring to defraud him of his rights and asked that a hearing be had.

A hearing was had and the local office decided in favor of Day. An appeal was taken, and the Commissioner of the General Land Office has just reversed the decision of the local office, holding that while the reasons given for not complying with the law, namely, poverty, are such as call for sympathy and might have some weight as between the government and the pre-emptor, they are, nevertheless, beyond the reach of the Department to relieve, for the law makes no provisions that such excuses may be beneficially interposed in the face of an adverse claim. And the decision of the local office is reversed, "notwithstanding the manifest hardshlp resulting to the pre-emptor."

All those in a similar condition should sleep on their rights no longer.

MR. EDITOR—Dear Sir—Will you kindly allow me space in your paper to say a few words in justice to my self, and I hope a benefit to a certain individual living in this vicinity. I do not know who he is, but he is anything but a gentleman. In regard to the arrest of John Gray this fellow told a friend of mine, that I hand-cuffed Mr. Gray, which is a lie. he also told this friend that he met me in the road and talked with me, which is lie No. 2. He told other things to this friend that are not necessary to mention here, that were lies. Now Mr. Editor I do not claim to be perfect. I make mistakes as do other men, but if I had put cuffs on Mr. Gray t would not have been any of this fellow's business. Further, I would advise him to mend his ways or he might be called on some day to hold up his hands, and then the cuffs might be used in fact. I will say that if he still continues to busy himself with my business I will take the trouble to find out who he is and see if I can't make a contract with him whereby he can get something for his lies. Now Mr. Editor I am not gone on this fellow nor none of his kind, but I want to let the honest straightforward people of the coummunity know that in in this case I have been lied on.

J. C. WALLACE,
Constable.

SULPHUR SPRINGS.

There is a place, the preacher's tell,
And always designate as hell;
They say its walls are strong and high
All coated o'er with sulphur dry,
While rolling, whirling clouds of smoke
Darken air, and spirits choke;
And liquid flames ascend on high,
And mountain brimstones liquify.
And thus the fact is quite dedueible
The thing is one tremendous crucible—
In which the souls of some are placed
When bodies are in tombs encased.
They seethe and boil and bubble round
At every wave's remorseless bound—
Now down below, 'mid cinders hot,
Sizzling, choking, none know what.
Tongues protruding, eyeballs set
Tumbling, rolling, roasting yet.
Now up around the brim, they whirl,
While lapping flames around them curl.
Thus these damned spirits sensitive,
Forever and forever live,
While imps and ghouls and devils yel
Within this good God Christian's Hell.
In capering squads, a horrid lot
Squirm in and out this boiling pot,
And with their redhot, forked gales
Stir up this mess of boiling souls.
See there a demon black as night
Thrust in his pole with all his might,
And brings a writhing, tangled mass,
Up through the molton fire and gass.
See there a little infant child,
See there a mother wan and wild,
See there the spirit of a thief,
See there a priest; past all belief,
See there a warrior, brave and bold,
See there a man four score years old.
Hear the infant's piercing shriek,
Hear the mother's groan so weak,
Hear the thief lament in vain,
Hear the priest's still wilder strain,
Hear the warrior's awful scream,
'Mid rolling flames a constant stream.
And thus they drop off, one by one,
Back into hell, for devils fun.
Now this they say is all because
Our parents broke God's holy laws,
And with the devil once did grapple
In Eden for a big ripe apple.

Mr. A. A. Snyder, Supt. Poor farm, Winnesheik Co., Ia., says:—Last winter Mr. Robert Leach used two boxes of De Witt's Witch Hazel Salve and cured a large running sore on his leg. Had been under care of a physician for months without obtaining relief. Sure Cure for Piles. J. P. Currin.

Bohemia Gold Fields.

Splendid Prospects For The Yellow Metal.

NEW LONDON CAPITALISTS INTERESTED.

A Few Facts in Regard to a Mining District in Which New London People are Interested.

COTTAGE GROVE, OR., Aug. 1, '95.
[New London Tribune.]

Friend Barnum:—It is some little time since you have heard from me and knowing the deep interest you feel in my welfare, will tell you of my latest trip among the gold fields of Oregon. Geo. Spurr and myself, accompanied by an expert by the name of Jennings, from the northern Michigan iron range and gold hill Colorado gold fields, made a trip up to the mines of the Bohemia district lately.

The Bohemia gold fields are located about 150 miles southeast of Portland, Ore., at the head of that great and fertile Willamette Valley. At the Champion mine we found they had run in sight of an ore pay shoot, estimated at the smallest figure, to be worth $80,000, and also have $10,000 worth of ore on the dump, enough to warrant the owners of the Champion the purchase of a ten stamp mill.

Mr. Jennings has an international reputation as a geologist and mining expert, and his judgement regarding the mineral resources of this region will command respect. He pronounces the ore veins of exceptional richness and extent and after several days of personal observation advances the belief that the mineral covers a wide area and that the remarkable rich gold deposits recently uncovered, will be found to extend down across the line into Nevada and California, reaching the great Comstock mine. This same opinion is generally shared by mining men and prospectors familiar with the country. Mr. Jennings regards the Bohemia district as one of the most interesting geological studies in America.

The ore bodies, the formation and the ore itself, are distinctive. This fact operated for several years to retard the development of the mines of this section. Expert after expert inspected the camp and condemned it, and upon their reports bond after bond was relinquished. But the experts were wrong and their theories were false and the camp has prospered in spite of their croakings.

Gold is where you find it, and when it is found in paying quantities, the adverse reports of experts must eventually give way to the cold logic of profitable shipments and rich dividends. Geologically the Bohemian district is a new formation. The country rock is digonte, and it is believed that the formation has been little disturbed by subformative movements as few faults are encountered and the ore is still frozen to the walls. The mineral veins are covered with a thin coping of iron, but as it is almost always the case, the free pay ore comes full to the surface.

Bohemia has developed many surprises within a year and is destined to develop many more with the years to come. To-day it has two of the most noted experts in America, where two years ago mining men would hardly look at it, and the day is not far distant when the mining world will scarcely look for any other district. Beyond question it makes a better showing for the development than any other camp on the Pacific coast.

Since the Anna, Champion and Music mines have demonstrated their depth and the richness of their veins, and the surface conditions are the same as scores of other properties but slightly developed or not developed at all, there is much to warrant the belief of enthusiasts who are predicting that Bohemia will soon prove itself the peer of the Comstock or any other mining district on the coast.

There are two 10-stamp mills going up in the Bohemia country this fall, one on the Star and one on the Champion. The Music mine is taking out $5,000 per month with its 250 feet lead of free gold. The indications that the Bohemia district is the most promising gold field on the Pacific coast to-day is proven by the fact that the ore ledges are very large, from 6 to 20 feet wide and very rich on top. With many well wishes for my old friends, will close ere I tire you and your readers.

Yours very truly,
HOMER B. MILLERD.

There some people who never wear dark glasses and yet they never see anything bright; it's the people who are dyspeptic and soured. Everything is out of joint with such people. "I suffered many years with Dyspepsia and liver troubles but have been relieved since taking Simmons Liver Regulator. I know others who have been greatly benefited by its use."—James Nowland, Carrollton, Mo.

The South Douglas Fruit Growers' Association will meet at Riddle on Saturday, August 17th, at 2 p. m.

SHERIFF'S SALE.

By virtue of a warrant issued out of the County Court for the County of Lane, State of Oregon, to me directed. June 22nd, 1895 commanding me to levy on the goods and chattels of the delinquent tax payers named on the Delinquent Tax Roll for said County for the year of 1894, and if none be found then upon the real property as set forth and described in the said Delinquent Tax Roll or so much thereof as shall satisfy the amount of taxes charged therein together with costs and expenses. I have duly levied having been unable to find any goods or chattels belonging to the respective delinquents hereinafter named, upon the following described pieces or parcels of land as set forth in said Tax List, lying and being in said Lane County, State of Oregon, described and assessed as follows:

Bowerman, M. G.—Lot 4 Blk 6 Long & Landess' add to E Cottage Grove $1.28.

Cardwell, Josephine, lot 6 blk 13 Mulligan's don to Eugene, $23.50.

LIGHT-RUNNING **PLANO** BINDERS MOWERS HEADERS

PLANO STORED POWER Furnished by the "Plano" Fly Wheel, is the greatest improvement ever made in Self-Binding Harvesters...

THE PLANO LEADS Because IT IS THE BEST!

THE FLY WHEEL Gives it steady motion in tangled grain, and on rough, uneven ground; causes it to run lightly over soft places, makes it run one horse lighter draft and bind a bundle after the team stops.

More Jones Steel Headers Sold in '94 than all others combined.

You should see the JONES CHAIN MOWER before you buy. Simplest, longest lived and lightest draft mower in the world. Never out of repair. No gears to wear out, no friction, no noise, nothing to make the farmer "cuss." Chain Power runs the great Ferris wheel. This proves its strength. Bicycles are Chain Drive. Why? Light draft!
