Ira Conner left a white Belgian carrot in THE LEADER office Tuesday, that weighed nine pounds. He raised eleven large two horse wagon loads on one-fourth of an acre of land. They are a grand feed for horses and cows. Every man having a cow, if he only has a small piece of ground for garden he should plant a small strip or corner to either Belgian or Mastodon carrots. With enough to feed a cow once a day in winter, one will be surprised at the increase of rich milk and butter fat.

Editor Thorp has been chopping away at the head of his paper until now it is plain LEADER. However, the worthy and hyphenated head did not prevent it from being a rattling good paper and is always a welcome visitor at this office.—Junction City Times.

Thanks brother! The editor of THE LEADER is trying to do all he can to help develop the great resources of this wonderful part of Oregon.

The saddest thing that can befall a boy, says a exchange, is to have the liberty to keep late hours. It is when the curtain of night closes over nature that a great deal of mischief is planned and executed. The boys who are under lax government and who are permitted to roam the public streets at all hours of the night are the boys who bring sorrow upon their relatives and friends. All parties should bear this in mind.

The matter of subsoiling land is receiving some attention in the agricultural papers of the State and Editor Thorp, of Cottage Grove, is going to introduce it in his neighborhood. Nearly all farms in Oregon would be materially benefited by a good subsoiling and it is to be hoped that farmers will soon appreciate the fact that a subsoil plow will pay for itself in every acre plowed the first year. No farmer can afford to be without one.—The Three Sisters.

The South Oregon Monitor, a semi-weekly paper at Medford, Or., has just entered the second year of its existence. Brother C. E. Wolcott is a splendid newspaper publisher and a hustler. He is located in one of the very best towns in Oregon and we are glad he is meeting with the fine success which his live paper gives ample evidence.

In Pocahontas County, Virginia, a man for whom two five-grain capsules of medicine had been prescribed took two 32-caliber cartridges by mistake. He suffered no particular inconvenience. On the contrary, he got well, and the medical profession is in disgrace in his section. We presume the cartridge treatment is on the "kill or cure" plan.

A wagon load of supplies left Cottage Grove, and we learn that it was about all a two horse team could do to haul it to Mr. Sams' house, a few miles in the country. The hills were fairly alive with people carrying supplies on their backs and on their shoulders. Mr. Sams was needing help and appreciated the kindness of his friends.

The resources of many countries are just beginning to be developed. Speaking of one of these cases the Chronicle says that the discovery of gold in Argentine calls attention to the fact that the country with the name so strongly suggestive of mining has not of late years figured very extensively as a mining country. Argentine's chief dependence of late years has been agriculture.

If she adds the production of the precious metals to her present resources her prosperity will be considerably augmented.

ADAM'S NURSE.

A Sunday School superintendent at the close of an address on creation, which he was sure he had kept within the comprehension of the least intelligent of the scholars, smilingly invited questions. A tiny boy, with a white, eager face and large brow, at once held up his hand. "Please, sir, why was Adam never a baby?"

The superintendent coughed in some doubt as to what answer to give, but a little girl of nine, the eldest of several brothers and sisters, came promptly to his aid. "Please, sir," she said smartly, "there was nobody to nurse him?"

Let us watch the American farmer and see what characteristics rivalry might bring out in him to his unbounded credit. Our shrewd and wily agriculturists no longer find things running so much their own way as of years gone by, when foreign competition was almost unknown and it's effect entirely unfeared.

Countries that once come to our doors and begged for our bread, now are raising immense crops on their own soil and profiting by the American example, are transporting their grain to countries where before, our farmers furnished the sole supply. With their inland rivers, navigable for hundreds of miles, necessitating no freighting, and deduction of percentage almost unknown, while the liabilities of some railroad combine stepping in and swooping him is not thought of, the farmers of foreign soil will surely in coming years form an undermining and powerful competing nation, that will severely bring out to its utmost the immense capabilities of our own land resources and farther develop in the American farmer his practically unlimited competing powers.

The estate of the late Samuel G. Reed, of Portland, has been appraised at over \$1,100,000. This does not include that portion of the estate located in California.

In addition to this all the old books in the town will be given to the students who lost their books; new books and clothing will be sold the students at cost prices. Some of the more wealthy families have offered to board those who were burned out free of charge for the school year. In fact, the citizens of Drain have shown a truly friendly spirit to the students, and are doing all in their power to alleviate so far as possible the losses sustained by them. The building was owned and conducted by private parties. There was no insurance and the total loss is estimated at \$2500.—Eugene Guard.

Speaking of the massacres reported about by the Turks the Globe-Democrat mentions that Mrs. Julia Ward Howe is well-informed on the subject of the Turkish massacres of Christians in modern times, and writes to a Boston paper giving the figures collected by her husband and herself. During her own lifetime nearly 100,000 Christians have been murdered by the Turks. In 1822 a Turkish army killed 23,000 Greek Christians on the Island of Chios, and sold into slavery 47,000. This is the largest single item, but, as a matter of fact, the slaughter has been continuous.

Commercial (Portland) Review: Circulation for November showed a net decrease of \$4,663,837. A net decrease of over \$13,000,000 is shown in the treasury statement of charges in money and bullion for the month. The total amount of money in circulation on December 1, amounted to \$1,594,195,475, which represents a decrease of about \$43,000,000, as compared with the corresponding date last year. While the circulation has been decreasing, the population has been increasing and the circulation per capita has been falling even in a greater ratio than the decrease in circulation. The amount of money in circulation, per capita on December 1, is \$22.61, which represents a decrease of 11 cents per capita for the month and of \$1.11 since the corresponding date last year.

ANON. Oakland City (Ind.) Enterprise: Subsequent events are proving that, if one would enjoy any true happiness in married life, the foundation of that happiness must be based upon a true and well tried ground; not hastily built on ever shifting quicksand, that to-day is, and tomorrow are not. A hasty nation of youths are to-day marrying a hasty nation of maidens, and daily occurrences rise up before the judges and are hurled around the globe, all proving that ill-timed and thoughtless choice of youth is productive of a source of evil that rivals the chiefest wrong existing within the bounds of our endless horizon. This hurried choosing of the young is producing divorced men and women at such an increasing rate that one would scarcely be surprised if by one common impulse, the entire male and female race, divorced in absolute separation, were to pass before his gaze, fleeing wildly from each other.

Mrs. W. B. Meek, who resides at Cantonville, Cal., says her daughter was for several years troubled at times with severe cramps in the stomach, and would be in such agony that it was necessary to call in a physician. Having read about Chamberlain's Colic, Cholera and Diarrhoea Remedy, she concluded to try it. She found it always gave prompt relief. It was seldom necessary to give the second dose. "It has not only saved us lots of worry and time," she says, "but also doctor bills. It is my opinion that every family should have a bottle of this remedy in the house." For sale by J. A.
