Homers and Carrier Pigeons.

The homer and the carrier are both brilliant filers, but the homer is the speedier bird and better fitted for long distances. The homer has the widest spread wings of all pigeons, and can sail for an enormous distance through midair. It is also considerably lighter than the carrier and is possessed of more phenomenal powers of endurance, having been known to fly 800 miles without alighting. On a clear day, with a good sky and favorable wind, 400 miles is an admirable record, although 500 miles a day is the goal of every pigeon flier's ambition. A bird that can perform this remarkable feat is worth at least \$100, and may be valued at \$500 if it is capable of a better record. The bird's gameness, stamina and speed reach their highest point of excellence at 3 and 4 years of age, which is the natural prime of life for a filer. After they have passed their prime they deteriorate in a scarcely noticeable degree and at 10 or 12 years of age are still good for the shorter distances. - Chicago

DRAWING UP WILLS.

But there was a new obstacle. The Lawyers Do Not Want Their Names Iden-

That it takes a smart man to draw a will is an adage the respect for which in the legal fraternity is evidenced by the fact that few lawvers want to furnish visible evidence of their part in drawing up wills. It is perfectly easy for a man to hire a lawyer to draft his testament, of course, no matter how complicated its provisions may be. It is quite another thing to get the lawyer to witness it. He will not even allow clerks in his office to do so except perhaps where the client is an old or regular one. He wants him to go elsewhere to get the necessary attestations. There are exceptions to this unwritten rule, it is true, but it is pretty generally observed.
