SATURDAY, APR. 4, - - - 1896.

A pig is a good mathematician because he is good on the square root.

Peaches are selling at \$12 a dozen in New York city. They are cheap with tin overcoats on.

Mrs. Dimmick is all right. She preferred to keep her husband rather than to give him to the country.

England has about patched it up with France, but it will not be so easy to quiet down what Mrs. Partington would call "the dancing devils."

Mary Anderson Navarro has declined an offer of more than \$100,000 for a brief series of dramatic performances. She says she is done with the stage forever.

A not-impossible solution of the squirrel problem may be contained in the suggestion of a writer east of the mountains that canneries be started and squirrel meat be put up for export.

Mrs. Dimmick is credited with being the power which induced Gen. Harrison to abandon the race for the presidential nomination. None but a woman could have accomplished such a feat, if, indeed, it is accomplished.

A distinguished judge after long and profound study has decided that a wife can ride on her husband's mileage. This is much ado about an easy and conclusive matter, for if she can ride on his back, his mileage need not be considered.

W. W. Howard, who was sent by the Christian Herald to Armenia to superintend the distribution of its \$40,000 relief fund, says that the blackest spot in all the world is the heart of the sultan of Turkey, who is himself responsible for the death of 50,000 people and the destitution of 400,000 more.

Over \$16,000,000 in gold, silver and currency was removed from the office of the treasury in the old government building at Chicago, to the temporary offices in the Rand-McNally building. There were 16 half-tons of gold; 90 tons of silver, and five tons of copper, nickels and dimes, and \$3,500,000 in currency.

Some of the old apple trees that seemed hard, tough barks before the borer became numerous are still living and productive. So long as new orchards are put out the borer attacks the young trees and leaves them alone. The Secretary of the Maine Board of Agriculture mentions an apple tree in York, Maine, which was brought over from England in a tub and planted more than 200 years ago. It was still bearing in 1870. Another apple tree near Wiscasset bay was an old tree in 1865, and it continues to bear fruit until now.

East Oregonian: In looking over the wheat fields I notice each year an increasing number of farmers using drills instead of the broadcast sower for sowing. The change is a good one. A field this spring where a seeder and drill have been used together is an eloquent testimonial to this fact. Where the drill runs there is generally a nice even stand of grain, of sufficient thickness, height and of thrifty color. In the path of the seeder in many places the grain is very thin, either frozen or dried out, and what grain there is seems to lack color and general thriftiness.

Western Mining World: It probably may not have occurred to the majority of the Western men, and it certainly does not to eastern capitalists, but it is a fact that there is no other line of business left so entirely to run itself, as mining, save and except in those instances where combinations of large capital have been effected, and placed in the hands of intelligent men, who make it a business not only to invest, but after investment, to stay with the proposition, and manage on close, conservative lines. A mine needs the same care and supervision from day to day in its management as a railroad or mercantile establishment.

Western Mining World: Speculation in copper cuts quite a figure in Europe, but the home market is influenced very little that way, the price being dictated almost wholly by the supply and demand. The Americans are as much addicted to speculation as any nation, but the movement of copper is altogether too slow to suit the average American. This is an encouraging feature of the domestic metal market. Considerable speculation, however, is to be found in copper shares at times, but just now copper shares are not in style in speculative circles. Seemingly the insiders are making all the market and trading among themselves.

ENCOURAGE CAPITAL

In the Mining Interests of South Lane.

Stimulation of the mining industry in South Lane would do more good for the people here and the state generally than many suppose. Many big towns have been built up and the people made very prosperous over successful mining operations. Dr. E. O. Smith of Portland is enthusiastic over the mining outlook of Oregon.

"In the Bohemia mining district, I find a change of formation which is very old and well marked. It is porphyry slate and quartzite of the very best. Still coming north to the Blue river and Quartzville districts, quartz and porphyry are found, with the old granite dyke associated with large fissure veins, carrying a good per cent of gold; still further north, on the little fork of the Santiam, we find a much greater variety of minerals, both copper, silver and gold. The formation changes in this section to what is known as black syenite and some metamorphic rock. The veins or ledges are strong and well defined. If Oregon could move these veins of quartz up to Trail creek or to Cripple creek, with as good a showing as we have, they would sell quickly for many thousands; but they are in Oregon, and it is very hard to make mining capital believe there is valuable quartz in this state.

"Development of our mineral resources would bring men with capital to Oregon, and we would soon see most of our idle people working at good wages. Trade would pick up and all of our farm products bring good prices. Ask Albany business men what the Santiam mines have done for them in the last year; and that is only a drop of the bucket to what could be done."

LITTLE TOO HARD FOR HER

"During the last campaign one day," said Howard, the populist member from Alabama, "I went up to the top of a considerable mountain to see a hunter of the name of Bill Sanders to secure his vote. Bill was not at home, but his wife was, a tall, lean, hony woman, with dusty black hair, hollow, colorless cheeks and sunken eyes, a large mouth, large feet, and yellow hands. In one hand she held a box of snuff, in the other a tooth brush, and she was spitting ambeaque.

"Good morning, madam," said I. "How are you stranger?" said she.

"Is your husband at home, my good woman?"

"No, he ain't. He went down in Coon Holler this morning before dawn and I ain't looking for him back until towards midnight."

"Well, madam," I continued, "I am a candidate for congress and hope you will use your influence to get your husband to vote for me. I know that a woman of your intellect, your beautiful eyes that shine like the dew drops on the mountain sun first strikes it; your fresh rosy cheeks which the gods would kiss as nectar, and your entire charming personality—I say a woman so endowed by nature must have great influence over her husband, for he was indeed fortunate to secure you for a wife."

"Law, now, stranger," exclaimed the woman, "when you come talkin' that away, and bein' as how I likes your looks anyway, I guess if Bill Sanders don't vote for you he need never expect to roost 'round these diggins no more, I tell you."

"I was much pleased with the progress I was making, and I ventured to put the question of most importance to me: 'Are there any politicans in this vicinity?'"

"Dear me, stranger," she answered, "you are a little mite too hard for me this time. You see, I don't pay much attention to them things, but Bill is a mighty prettier hunter and has killed and skunt almost all kinds of varmints in these mountains. But whether he ever kitched one o' them air, what you call it, stranger?—populist varmints—is more nor I know. If you'll just walk 'round the backside of the house, where he's got all his pelts hangin' up a-dryin, you may find one o' them things, for now that I come to think about it, Bill he yesterday mornin' killed one of the dolgastest critters I ever see. He had long legs, bandy shanks, long hair and was crossed, and I jes' bet a pound o' homemade tobaccoer it was a populist though I never heern tell 'o'ns afore."

A man found a \$10 bill. He paid the grocer and took a receipt. The grocer paid the money over to the real estate agent for rent. The agent paid the \$10 bill to the man that owned the property, who happened to be the man that lost the bill. He deposited the bill in the bank and it was returned to him as counterfeit. Was there anything gained or lost in this series of transactions?

Dr. Price's Cream Baking Powder
Warranted Gold Medal Midwinter Fair, San Francisco.

CULTIVATION OF ARTICHOKE.

As several inquiries have come to me regarding the planting and cultivating of artichokes, I will endeavor to give a brief outline. The ground should be plowed eight or ten inches deep and put in about the same order as for corn. Cut the tubers in small pieces, plant in rows three feet apart, and drill the pieces 18 or 20 inches apart in the row. Cover about as deep as for Irish potatoes. Plant any time in April, and they will be ready for use between the middle and last of October, owing to the season. The tubers continue to grow as long as the stalks are green. They are very hardy and rapid growers; far outgrowing the weeds, and need but little cultivation. I usually give them two plowings. When the white roots start out from the stalk do not stir the ground any more, as they run far out from the stalks. Any ordinary soil needs no fertilizing. Wherever corn will grow they will grow, and yield a good crop. They are grown only from tubers, the same as potatoes. They are usually in full bloom about the time the first frost falls, and a prettier sight one may not often see than two or three acres in full bloom. The tall tops are one continuous mass of yellow flowers. Sometimes a large lot of hogs in the fall will nearly clean them out. When such is the case I rake and clean off in the spring, run through with the cultivator, mark off and plant again. Where we dig or plow out and pit for other stock we cannot get them out so clean, and a large crop will grow again the next year without any more planting. And if not too many hogs are turned in the lot in the fall they will leave tubers enough to produce the next crop. This second crop I do not cultivate unless they are too thick, then I run through them with a double shovel plow to admit sun and air to the soil. I fence off a small lot in the fall, unless I have two lots, and leave them just as they grew for spring planting. When you break your cornstalks you can also go over this lot with your pole, then in spring you can rake it off, thus making it nicer to dig the tubers. I have sometimes been asked the question, can they be eradicated? They can. If the stalks are not allowed to grow for one season they are done. The old tuber decays, and the new one cannot grow. This is done by planting to a hoed crop, by mowing them twice or by pasturing them, as stock of any kind are fond of the tender tops. But plant where you want to keep them, and you will never try to get rid of them.

ELI HEATON.
Russiaville, Ind.

The Ideal Panacea.
James L. Francis, Alderman, Chicago, says: "I regard Dr. King's New Discovery as an Ideal Panacea for Coughs, Colds and Lung Complaints, having used it in my family for the last five years, to the exclusion of physician's prescription or other preparation. Rev. John Burgess, Keokuk, Iowa, writes: 'I have been a minister of the Methodist Episcopal Church for 50 years or more, and have never found anything so beneficial, or that gave me such speedy relief as Dr. King's New Discovery.' Try this Ideal Cough Remedy now. Trial bottle free at J. A. Benson's Drug Store.

How Reed Lost a Supporter.
Speaker Reed sometimes makes mistakes. When congress met last December, and the speaker took up the task of arranging his committees, there was a little weazen-faced man from Maryland who did not appear to know much or be possessed of any considerable amount of force or influence, who wanted to be a member of the banking and currency committee. That was all he wanted and he made his modest wishes modestly known. But Mr. Reed put him on the District of Columbia committee and placed another Marylander, a new member, on the banking committee. Some weeks later that little weazen faced congressman, Wellington by name, was elected senator from Maryland, and it was suddenly discovered that he was the acknowledged leader of the republican party in that state. The speaker opened his eyes and offered Wellington a vacancy on the labor committee, and his choice of all the other good things that might appear. But it was too late. Wellington, who will be a senator in a year, is said to be out-and-out for McKinley.

Take Simmons Liver Regulator to prevent illness from the Malarial poison which comes with the Spring months. Simmons Liver Regulator is a mild laxative that cleanses the system and purifies the blood. An excellent alternative and tonic for the Spring. "I have been very much improved in health by taking Simmons Liver Regulator."—M. Newport, Williamsburg, Ky.

Swiss cooks prepare a dish of boiled chestnuts mashed fine, served with spanked cream. So that's where these old jokes bring up.

Poor Economy

By all means be economical, but don't be too economical where health or life is concerned. The matter of a few cents should never count between the old, standard and reliable preparations and the new, obscure, and in many cases, almost worthless substitutes.

SCOTT'S Emulsion

of Cod-liver Oil and Hypophosphites is as much the standard for all conditions of wasting in children and adults where the lungs are weak or affected, as quinine is the standard for malarial fevers. When you go to a store to get Scott's Emulsion, don't be fooled into taking something else they say "is just as good." It isn't. Scott's Emulsion has gained its reputation by its superior merit, and nothing of its kind has ever equalled it. Your doctor will tell you that. All druggists sell Scott's Emulsion. Two sizes—50 cents and \$1.00.

The Overrun Good.—Albany Democrat: Great interest is being taken in the amount of gold being taken out by the Lawler mill, which has been running for several weeks. It is a difficult matter to get at the facts; but men are continually going and coming from the mines and some things can be learned. The first twenty days of running the mill was a starter and of course the full capacity was not tested, in fact the number of tons crushed daily was not nearly as much as reported, and yet the Democrat is reliably informed that \$7000 was taken out. This will be wonderfully increased the second twenty days.

A thing of beauty and a joy forever will be the colossal bridge of pink marble over the Tennessee river at Knoxville. It will cost a million dollars, and will be built entirely of the famous pink marble which abounds in Knox county. It will be 1600 feet long, and the span of the main arch will be 240 feet, which is said to be 20 feet longer than the longest span in the world. The height of the center arch above water will be 105 feet. The roadway will be 50 feet in width. The piers of the bridge will all go to the solid rock. The parapet walls will be constructed of sawed marble slabs, with heavy blocks of pilasters every fifteen feet, projecting above the wall proper, thus giving a semi-castellated effect.

Rural Northwest: One of Portland's wholesale grocers has written a letter to the Oregonian urging the farmers to raise more hogs. It is the best way to induce the farmers to raise more hogs is to provide a good home market. So long as Portland packing houses will not pay as much by a cent and a half a pound for live hogs as packers in Omaha pay, it can not be said that Portland is doing much to encourage the development of the swine industry. If the business men of Portland will only see to it that a packing house is established here which will pay Omaha prices for hogs, the farmers will do their share and Portland will soon be able to supply the home demand for bacon, hams and other pork products. It is not creditable to the business men of Portland to allow so many live hogs to be sent from Oregon and Washington to San Francisco, Omaha and other distant cities to find a market.

Importance of a Good Breakfast.
It is no uncommon thing to find among our acquaintances that many persons, when asked as to the kind of breakfast they eat, reply that they either eat none at all or only, perhaps, drink a cup of coffee or tea, says the Family Doctor. It is true that the ordinary English breakfast is calculated to strike terror in the minds of the average European, and French people would be appalled at the idea of eating breakfast or a couple of chops the first thing in the morning; and yet it is a great mistake to commence the day without a good meal as a foundation. It may have been noticed by those who have no appetite for breakfast that even if hungry on retiring it is an exception to find a feeling of hunger on awakening in the morning. It is probable that during sleep, the functions of digestion be in abeyance, the stomach contracts, and this is probably why some persons cannot eat late at night. The empty stomach, having no function to perform, contracts itself, and in the morning it requires some little stimulation for it to begin its daily work. This is why so many, especially invalids, cannot take a heavy breakfast.

For those who can do so, it is a good plan to drink a little cold water on rising. It washes out the stomach, takes away any mucus that might have collected there in the night, and stimulates the digestive glands to give forth their secretions, and prepare for that important act, digestion.

Western Mining World: Montana leads all other states in the number of sheep within her borders. On January 1, 1895, there were 3,667,502 sheep in the state, or about one-twelfth of the total number in the United States.

Western Mining World: The state of Idaho during 1895 produced a total of \$16,140,495 in minerals. This was an increase of \$316,405 over that of 1894. Shoshone is the banner county, producing \$3,576,312. It is estimated that the production for 1896 will fully amount to \$15,000,000.

Among the measures dealing with the postal service recently introduced Congress is one providing for the reduction of letter postage charge to one cent for each half ounce. This proposed reduction is a step in the right direction, which it was supposed would long ago have been taken, but which one kind of influence or another has up to the present prevented. There are a number of reasons to be urged in behalf of the change proposed. For one thing justice demands it, for at the present those who pay letter postage pay much more than their share of the expense of running the post-office department, while under existing conditions other users of the mails pay much less than their share. In the next place, the reduced charge will not, judging by the experience of the past, result in a corresponding loss of revenue, for when a reduction of 33 1/3 per cent in the rate was made in 1884 the revenues showed a falling off of only 4 per cent, while six years later they had grown to an amount a third greater than during the last year under the high rate. It should not be forgotten, further, that the measure under discussion does not actually reduce the rate of letter postage, which, under its provisions, will remain at two cents per ounce, but only allows a pro rata charge of the present rate for half ounce letters.

W. BRUMMETT
Notary Public and
Real Estate Agent,
Office in Meinzer Residence
Main Street, Cottage
Grove, Oregon.

All who have country or city property for sale would do well to call on him. The following is a few special bargains in farms.

FINE BARGAIN.
A large, two story hotel corner lot, furnished and good run business with lively stable building can be purchased for \$2,000. A business man can make money from the start on this property in one of the best towns in Oregon. Call on or address
W. BRUMMETT,
Cottage Grove, Or.

A RARE BARGAIN.
160 acres of land with running water the whole year; fine fir and cedar saw timber, never culled; 20 acres cleared with some fruit trees. Will make a splendid fruit place and only 5 miles south of Cottage Grove.

A FINE 80 ACRE FARM FOR SALE.
4 miles from Cottage Grove, all under good fence, 25 acres in cultivation, 150 fruit trees four years old, good buildings, well watered, two or three good orchards, all within five miles from good school. Price \$12500. Write or call on
W. BRUMMETT,
Cottage Grove, Or.

RARE BARGAIN.
Farm for Sale or Exchange for Cottage Grove Property.
313 acres one mile west of Yoncalla, all under fence, about 90 acres in cultivation. This place is a model farm, good orchard of about 1,500 trees, and well watered with running water all the year. Good soft well water. All farming implements go with farm and 5 head of cattle. This farm is situated only one mile from Yoncalla, a growing town on the Oregon & California R. R. in Douglas Co. \$4,000 for every acre. Write or call on W. BRUMMETT, Cottage Grove, Or.

For Sale or Exchange for Cottage Grove Property.
425 acres of land, all fenced and cross fenced, about 40 acres of plow land, 40 more could be easily cleared, balance good pasture land. Splendid garden land; about 5 acres of orchard; 1 good dwelling house and out buildings; 4 barns; 7 chicken houses. Horses, sheep and goats per acre \$8.00. Situated 9 miles from Yoncalla, 1 1/2 miles from Elkhead Quick Silver Mines; 20 rods from post office; 10 rods from school. Call on or write W. BRUMMETT, Cottage Grove, Or.

One Of The Best Stock

FARMS IN DOUGLAS CO.
For sale or trade. Situated 6 miles east of Yoncalla on Elk Creek, 480 acres, 200 acres good bottom land, balance hills. This place contains about 5000 acres of out side range. The place is well watered, Elk Creek running through it and dozens of good springs on the place. Mostly all fenced; two sets of buildings; about 75 fruit trees; school and saw mill within half mile from the Cinnabar mines. Price \$3800. Write or call on
W. BRUMMETT,
Cottage Grove, Or.

DOCTOR
Acker's Remedy
ENGLISH
for Coughs, Colds, and Consumption
It is beyond question the greatest of all modern medicines. It will stop a cough in one night, check a cold in a day, prevent Croup, relieve Asthma, and cure Consumption if taken in time. "You can't afford to be without it." A 25c. bottle may save your life! Ask your druggist for it. Send for pamphlet. If the little ones have Croup or Whooping Cough use it promptly. It is sure to cure. Three Sizes—25c., 50c. and \$1. All Druggists. ACKER MEDICINE CO., 16 & 18 Chambers St., N. Y.

A corporation that holds a good share of the mortgages on Umatilla county farms is helping out the farmers who have been obliged to re-sow their fields. The company furnishes squirrel poison, fence posts, horse feed and seed to its mortgagors, on time and at cost. This is an interesting object-lesson on the independence of capital and labor. It is better for these mortgage companies that the farmers should raise crops and continue to pay interest than that the mortgages should be foreclosed. The farmer's prosperity means the money-lender's prosperity. It is hard to make people believe sometimes that the converse of the proposition is true. The belief is all too prevalent that the farmer's interest is enhanced by making it as nearly impossible as possible for the money-lender to do business at all.

Billington Booth's lasses will not wear poke bonnets and they will consequently look much better than Booth-Tucker's squad. That is a judicious conception of Billington. He sees that pretty doesn't necessarily depend on ill-fitting clothes and ugly head wear.

The only reliable means of ridding the hen roost and pigeon loft of vermin is a preparation of sulphur and carbon, technically known as sulphur carbon. In France it has been thoroughly tested, and it works like a charm. It kills the insects that prey upon pigeons and fowls without injuring the birds. A bottle containing the solution will last several days, and the cost of it is small. Put two ounces of the sulphur of carbon in a bottle open at the mouth and hang it by a string in a henhouse. At the end of eight days the bottle should be refilled. The remedy is said to be infallible.

A Valuable Prescription.
Editor Morrison of Worthington, Ind., writes: "You have a valuable prescription in Electric Bitters, and I can cheerfully recommend it for Constipation, Sick Headache, and as a general system tonic it has no equal." Mrs. Annie Stedle, 2625 Cottage Grove Ave., Chicago, was all run down, could not eat or digest food, had a backache which never let her and felt tired and weary, but six bottles of Electric Bitters restored her health and renewed her strength. Price 50c. and \$1.00. Get a bottle at J. A. Benson's Drug Store.

NOTICE OF FOREFEITURE.
John Murphy your heirs and assigns are hereby notified that we have expended one hundred dollars in labor on the Morning Star mine situated in Helena, Lane county, Oregon, for the year of 1895, and fifty dollars in labor on said mine in 1896, said fifty dollars being the local cash assessment for the year of 1896. In order to hold said mine under the provisions of section 2252, Revised Statutes, being the amount required for holding the same till the year ending 1897, you fall or refuse to contribute your proportion of such expenditure as co-owner with the undersigned under said section 2252. H. P. BARNHARTT feb-35

NOTICE OF FOREFEITURE.
H. B. Wiseman and Charles Kevers, your heirs and assigns are hereby notified that I have expended one hundred dollars in labor on the Chinese mine situated in Helena, Douglas county, Oregon, in order to hold said mine under the provisions of section 2252, Revised Statutes, being the amount required for holding the same for the year ending 1896, and if within ninety days after this notice by publication you fail or refuse to contribute your proportion of such expenditure as co-owner with the undersigned under said section 2252. H. P. BARNHARTT feb-35

DEATH TO FRUIT PESTS.
To make the orchard pay you must spray, exterminate and summer with Prof. Brown's Insect Destroyer. The only insecticide known that will kill all insect life without injury to Fruit, Foliage.
Endorsed by individual members, the State Board of Horticulture of California, Oregon and Washington. Used by many nurserymen and orchardists. My winter wash is the only one that will kill the Woolly Aphis, (most only while the foliage is out). My summer wash is a sure destroyer of the Coddling Moth eggs, and all insects except Woolly Aphis, use just after the blossoms fall out. My soap wash kills all insects that molest vines, vegetables or plants. The ingredients used in my formula can be found in any drug store, costs much less than other washes. Full and explicit directions for mixing and using.
Knowing I have a sure remedy, some unprincipled parties are now selling imitations. Therefore to discourage all such parties I have enclosed (for a short time only) to reduce the price of the three formulas to \$2.50 by mail to the address. Formula copyrighted January 14, 1896. By W. H. BIRD '95. Entomologist. Mention this paper.

THE NAME OF THE NEXT
PRESIDENT OF THE UNITED STATES
THE NEW YORK WEEKLY TRIBUNE
OF NOVEMBER 4th, 1896.
Public interest will steadily increase, and the question how the men whose votes turned the scale at the last election are satisfied with the results under the administration they elected, will make the campaign the most intensely exciting in the history of the country.

The New York Weekly Tribune,
the leading Republican family newspaper of the United States, will publish all the political news of the day, interesting to every American citizen regardless of party affiliations.
Also general news in attractive form, foreign correspondence covering the news of the world, an agricultural department, second to none in the country, market reports which are recognized authority, fascinating short stories, complete in each number, the cream of the humorous papers, foreign and domestic, with their best comic pictures, fashion plates and elaborate descriptions of woman's attire, with a varied and attractive department of household interest. The "New York Weekly Tribune" is an ideal family paper, with a circulation larger than that of any other weekly publication in the country issued from the office of a daily. Large changes are being made in its details, tending to give it greater life and variety, and especially more interest to the women and young people of the household.
A SPECIAL CONTRACT enables us to offer this splendid journal and The LEADER for One Year for Only \$2.25, CASH IN ADVANCE.
(The regular subscription price of the two papers is \$3.00) SUBSCRIPTIONS MAY BEGIN AT ANY TIME.
Address all orders to THE LEADER.
Write your name and address on a postal card, send it to Geo. W. Best, Room 2, Tribune Building, New York City, and a sample copy of the New York Weekly Tribune will be mailed to you.
