A plan is under consideration in the postoffice department to stamp the weather forecast for the day on all letters deposited for transmission through the mails.

It would be a whole-some rule for the postoffice department to declare non-mailable all letters that have no return address on the envelope, plain, ly written or stamped.

Mr. Gladstone has been forbidden to make any more public speeches this year. The distinguished patient will probably rest by writing twelve hours a day and chopping trees at intervals by way of exercise.

A little girl in Boston who was asked what people find when they reach a mountain top, replied that they find they are out of breath. Platt and Quay will enjoy this response when they think of the McKinley boom.

In England and Germany ladies are required to remove their hats before entering the auditorium of a theater. This long-established custom seems to be a satisfactory solution in that part of the world of a vexed question.

Salem Post: Once a good body of ore is struck on the Bohemia mines it appears to be inexhaustible, while in many regions the tendency of the vein is to run out. That is what gives these mines their great value.

England proposes to introduce Sir Wallace Raleigh as a witness in the Venezuela case, though he has been dead nearly 300 years. Besides, England chopped off Sir Walter's head, and can hardly make use of his now as a credible person and man of excellent character.

Our new war-ships, if assembled, would make quite an imposing fleet, and President Cleveland has authority to send them to Cuban waters whenever he deems it necessary. He is not likely to use it at present, because Spain is disposed to be cautious in dealing with this country.

While the Eastern States were suffering from hot weather during the third week in April California was visited by a succession of unusual frosts which have damaged the fruit crop considerably. The average temperature in Los Angeles for the week was 52, an exceedingly low figure for the season.

One of the bills signed by Gov. Morton, of New York, last week provides that sixty hours a week shall be the maximum of work for women and children, that chairs shall be provided for women clerks, and that all places where women and children are employed shall be subject to sanitary inspection.

Two Lives Saved. Mrs. Phoebe Thomas, of Junction City, Ill., was told by her doctors that she had Consumption and that there was no hope for her, but two bottles Dr. King's New Discovery completely cured her and she says it saved her life. Mr. Thos. Eggers, 139 Florida St. San Francisco, suffered from a dreadful cold, approaching Consumption, tried without result everything else then bought one bottle of Dr. King's New Discovery and in two weeks was cured. He is naturally thankful. It is such results, of which these are samples, that prove the wonderful efficacy of this medicine in Coughs and Colds. Free trial bottles at J. A. Benson's Drug Store. Regular sizes 50c and \$1.00.

The bill of the Boer President against England is \$7,500,000, which is cheap enough considering the size of the British bill presented to Nicaragua and Venezuela for calling hault on a British consular officer and a police sergeant. But President Kruger has no war-ship to send with the bill as was done in the case of Nicaragua.

Dr. Price's Cream Baking Powder Awarded Gold Medal Midwinter Fair, San Francisco.

(Yaquna Post, Lincoln county, May 2, '96.) Hon. W. E. Yates, republican nominee for prosecuting attorney, of this judicial district is not only an able lawyer but he is a man of unusual attainments, of unblemished character, and is one of the most genial and popular gentlemen in this district. That he will fill the office acceptably to the people, in the interest of justice and right, and to his own credit goes without saying. A better and more deserving gentleman for the important and responsible office, could not have been found in the district, and we hope he will be elected by the vast majority ever given to a candidate for any office in this district.

ADVERTISING.—An exchange says: An Iowa newspaper tells a story of a woman who went to an adjoining town and purchased a supply of carpets and household decorations. Admiring neighbors suggested that she had best not let anyone connected with a newspaper know that she had gone out of town to purchase her carpets instead of patronizing local merchants as she would be apt to get a newspaper scolding. She very properly replied that until the merchants of the town got around to advertise in the papers that they had things of that sort to sell, and price with the quality, style, and price neither they nor the paper had any grounds for faultfinding. All of which is strictly true. We often hear kicks at merchants because their townsmen go out of town for goods which they could have sold them at no higher prices. It's no fault of the people. Spend the necessary money with your local papers to inform them of the facts and you'll get their trade. Otherwise you won't get their trade, and you don't deserve it.

Hon. George M. Brown our talented forensic orator, started for Empire City today to close his labors in that county as district attorney in the second judicial district. It is with pleasure we can state that the concurrent opinion of all who have witnessed his labors and noted his success, is to the effect that Mr. Brown has been the most successful and economical district attorney that this district has ever had. He is painstaking and cautious and has uniformly instructed the grand juries to make no indictments, where the evidence before it was doubtful when presented in court for final trial. Often compliments have been lodged against parties for personal spite, apparently for the purpose of smirching the accused's character. Mr. Brown sifts these complaints and advises accordingly. Thus saving to the taxpayers great and useless expense. We trust his success, whoever he may be, will be equally watchful of our interest as has been Mr. Brown.—Roseburg Plaindealer.

Kate Field writes from Honolulu to say that "she never" threw a brick through a window as charged by an Illinois paper. She does not add that if she could get her hands on that man a wool she—b— that would be another story.

GOLD WILL BE CHEAPER. The earning value of gold was never before in all the world's history so low as it is now. Its value in comparison with commodities will surely from now on gradually decrease. There was added to the world's supply of gold for the five years up to 1896 a total of \$815,000,000. The annual production increased from \$130,000,000 in 1891 to \$200,000,000 in 1895, and it is estimated, nearly, if not quite, \$300,000,000 worth of this metal will be mined this year.

Not more than \$60,000,000 a year has been taken for decorative and manufacturing purposes. This is a high estimate. So, at least \$515,000,000 has been added to the world's stock to increase the hoard of the various governments and moneyed institutions and individuals of the world. This great quantity of the metal piled up on top of the present stock, filled vaults in all lands, would have before this effected an increase in the price of other commodities, obeying the inalterable laws of supply and demand, but for the unnatural effect given to the markets by the hoarding of Russia and Austria. Those countries have now filled their coffers from the increased supply, and the markets will henceforward take their regular and even course.

As we have so many times predicted, this can be no downward. The continued increase in the amount of the metal will enormously increase the credits based upon it. That is nearly the only use to which gold money is now put. Ninety-five per cent of all the business of the country is now done by means of checks and paper representatives of money. This percentage, too, is growing. With the election of a republican president, and the enactment of a new protective tariff law, with a liberal reciprocity clause, putting the business of this country on a sound and progressive basis, there must come a period of growth that will restore the world and discount all former history. The full vaults of Europe and America are ready to furnish the capital in unlimited quantities and at low and lowering rates of interest.—Oregon Statesman.

Old People. Old people who require medicine to regulate the bowels and kidneys will find the true remedy in Electric Bitters. This medicine does not stimulate and contains no whiskey nor other intoxicant, but acts as a tonic and alterative. It acts mildly on the stomach and bowels, adding strength and giving tone to the organs, thereby aiding Nature in the performance of the functions. Electric Bitters is an excellent appetizer and aids digestion. Old People find it just exactly what they need. Price fifty cents and \$1.00 per bottle at J. A. Benson's Drug Store.

Eugene Register: The latest move on foot in the Campbell-Amis combine is to pull Sp. new off from the zone for county clerk and push Yarnell for the place, promising Spencer the deputyship with an equal division of the salary. Of course this scheme is considered necessary in view of the fact that Spencer cannot pull a populist vote. This is the vain scheme of the managers of the crews, but Spencer refuses to pose as the clown to dance to the whip of the ring-master.

Lincoln County Leader. (Democratic) "The republicans of the second judicial district have nominated W. E. Yates, of Corvallis, for district attorney. The nomination will reflect credit on the party. Mr. Yates is entitled to this much being said of him. He is a man whose personal character is beyond a shadow of reproach. If this office falls to him when the plums are ripe in June, the people can rest assured that it will be in the hands of an honorable and upright man."

This country is full of swindlers of all kinds, and at the least indication that times are getting a trifle lumbered up, a thousand new ones are sprung to catch the unwary. One of the worst of these, and by no means new, is the floating of gigantic gold mining schemes on paper, and selling imaginary stock for gold money. We are in receipt of a proposition from a New York house to advertise some of such stock for sale, but most respectfully decline to have anything to do with it.

The Corvallis Times, (Democratic) "There are this year but two candidates in the field for district attorney in the second judicial district. W. E. Yates of Corvallis, is the republican nominee and J. M. Upton has been nominated by the populists and democrats. But little is known here of Mr. Upton save that his father was editor of the Corvallis Gazette many years ago. The republican nominee is well known in his adopted county. He is a good citizen, a sound lawyer, and perfectly qualified for the position."

CONSIDER YOUR INTEREST.

Have you thought of the matter, farmers? For the past four years there has been almost no horses raised. Where will the horses come from for the next ten years to supply the places of those now almost worn out? Europe is taking all of the best of our fancy drivers, and within two years from now there will be almost no good horses to supply the places of those now almost worn out. Horses will not be hunting a market, but the market will be scouring the country for good horses at a long price. Then the man who has a few good horses can almost name his price. In the next ten years there will be more money made by the farmer who continues to breed a few good drivers or drafters than in any other line of productive farming. If you have a good draft mare or two, don't fear to breed to a good draft stallion; it will pay, and pay well. But that's other hand, if you have a few good breeding mares, or a good road mare, or several of them, breed to a good, well-bred trotting stallion. Select a horse from a good producing family; be sure he is of good disposition, kind and gentle; see his colts if possible and make your selection and breed. Don't hesitate, for he who hesitates is lost; but breed, and then take care of your colts, and you need not doubt the result. But don't raise a scrub; it will never sell for the expense of two winters' feed. The day of the scrub horse has passed forever. Now if you are at the point of making a selection of a good, well-bred, level-headed, kind and gentle stallion, and what is of more value, one which transmits these good qualities, examine the record of Favoritus Wilkes, advertised in THE LEADER. There are none finer in Oregon.

Everyone who takes the trouble to cut out this notice and forward it, with ten cents, to the address below, will receive a copy of the Pattern Magazine, containing a Pattern Order which entitles the holder to reliable and stylish patterns at a very reasonable cost. The patterns that can be obtained during a year on the Order given would, if purchased in the regular way, cost at least from \$20 to \$75.

Weygen

Wood won't burn unless air—oxygen—is present. The food taken into the body must be united with oxygen before it can be consumed and give heat to keep the body warm. Scott's Emulsion of Cod-liver Oil, with Hypophosphites, is one of the best food-fuels. The cod-liver oil obtains its oxygen from the air and heat is produced. It warms, nourishes, invigorates, gives good blood, and fortifies against the piercing winds of fall and winter. The hypophosphites tone up the nervous system and improve digestion. Scott's Emulsion prevents colds, coughs, consumption and general debility.

SCOTT'S EMULSION has been endorsed by the medical profession for twenty years. (Ask your doctor) This is because it is always palatable—always uniform—always contains the purest Newmarket Cod-liver Oil and Hypophosphites. Price 50 cents and \$1.00 sizes. The small size may be bought to cure your cough or help your baby.

We predict that the people's party in Lane county will prove themselves not so verdant as the democrats would have them appear. As soon as they are thoroughly aroused at the insult democracy is offering them they will bid their gallant knights a respectful farewell. Some of the populists are in favor of fusion, but not at the rate of 16 to 1 sixteen dollars to one populist and they are fast demonstrating this fact to their democratic allies.—Eugene Register.

A PARADISE FOR HOUSEKEEPERS.

Americans, with characteristic modesty, are prone to think they can give points on every subject under the sun, to every nation under the sun; but there are some subjects about which they can advantageously take points from their antipodal friends "the Americans of the East," as the Japanese have been facetiously called. For instance, in housekeeping. To be sure in the Japanese household there are numerous servants! "Life in a Japanese Household," published in their number of Demorest's Magazine, gives an account of an American woman's housekeeping experience in Japan which makes the reader wish that the system and the servants might be transported bodily to this country. A "Manga Nipponse," says the author, "propose itself on a pneumatic tire, which is decidedly more up-to-date than anything yet heard from in America."

Coming back again to the Western Continent, handsomely illustrated papers on "Venezuela and her Debated Boundary," and "Cuba's Struggle for Independence," describe vividly the situation in these unfortunate countries; and the popular work of the Salvation Army is told by pictures and letter press in "A Mighty Power for Good," which is a most interesting story. "A Knight of the Nets," by Amelia E. Barr, and one by Beatrice Harraden. There are most excellent suggestions which in these interesting "Summer Home," and the vital subject of "Headaches" is treated in the Sanitarian Department; while "A Day with the Fishes" is a most interesting college aspirations. The Fashions, as usual, are practical and up-to-date, and everyone who has ever used the patterns given with interest will know their intrinsic value. Every number of Demorest's contains a Pattern Order which entitles the holder to reliable and stylish patterns at a very reasonable cost. The patterns that can be obtained during a year on the Order given would, if purchased in the regular way, cost at least from \$20 to \$75.

NORMAL SCHOOL NOTES.

Drain May 4, 1896. Last Wednesday afternoon Miss Warner's music pupils gave another recital at the music room before the teacher and students of the Normal school and a few invited friends. The selections rendered showed careful preparation and while several of the pupils played before an audience for the first time, all did well. The vocal solo by Miss Isham and the piano solos by Misses Byrd and Johnson were especially deserving of mention.

The music classes have begun rehearsals on the cantata, "Lady Bountiful's Heirress" which they expect to have worked up about commencement time.

Miss Edna Kent is teaching a successful term of school at Elkton. Miss Kent is a graduate of '91.

The lecture to patrons of the school given by Prof. Barzee last week was well attended and is appreciated by the people as an effort to bring about a closer union of "pupils, patrons and pedagogues."

A number of the students attended the populist speaking at the Odd Fellows hall Wednesday evening.

The Normal school Chorus Band seems to be in demand on all occasions of a public nature, which shows they know how to make music. We note with pleasure their improvement in the last few months.

It's an old saying that "The proof of the pudding is in the eating of it." And it is because people have taken Simmons Liver Regulator that they know it to be a most excellent medicine, and especially for the Spring and Fall when there is so much malaria in the air. Mr. W. T. Lee, of Pendleton, N. C. says, "I have used Simmons Liver Regulator for twenty years, in place of calomel and quinine."
