An apple tree less than two years old bearing five well-developed apples is a curiosity to be seen at the home of E. V. Dalton in this city. The tree (if a mere sprout can be called a tree) is of the Bismark variety, and was planted from nursery stock a year ago last spring. It blossomed the same season it was planted, but the young fruit was picked off to save the tender stalk from breaking. This year the tree was permitted to bear, and the five large, well-colored apples are perfect specimens of their kind. The unusual sight has attracted much attention and comment.
