WHY DON'T Use Electricity

# for Lighting

It is certainly cheaper than oil, costing only  $1\frac{1}{3}$  cents per night for a 16 candle power light.

It is less trouble, needs no attention and is always ready.

It is safer, and where used will reduce insurance if

oil is entirely eliminated.

There is no danger from fire.

Lines will be extended to any part of town where the business Warrants such extension and the consumer can have either the same flat rate as was used by the former management, or if the consumer so desires a meter will be installed.

If you are thinking of using electricity, let us know and someone will call upon you to give any information you may desire.
