CURE YOUR KIDNEYS.

Do Not Endanger Life When a Sufferer Shows You the Cure.

Why will people continue to suffer the agonies of kidney complaint, backache, urinary disorders, lameness, headaches, languor, why allow themselves to become chronic invalids, when a certain cure is offered them?

Doan's Kidney Pills is the remedy to use, because it gives to the kidneys the help they need to perform their work.

If you have any, even one, of the symptoms of kidney diseases, cure your self now, before diabetes, dropsy or Bright's disease sets in.

Mrs. L. Hodson, of 717 Anna St., Pendleton, Ore., says: "I just as enthusiastically endorse Doan's Kidney Pills today as I did nearly three years ago. They relieved me of kidney trouble which had bothered me for a considerable time. There was aching pains across the small of my back and down through my kidneys, which were aggravated by colds which settled in the back and loins and caused an awful lameness. This was my condition when I began taking Doan's Kidney Pills. This remedy banished the backache and pain through the loins, regulated the kidney secretions and removed every symptom of the trouble. From that day to this there has been no recurrence, and I give Doan's Kidney Pills all the credit. I consider them to be the best kidney remedy procurable and recommend them whenever the occasion arises."

OIL IN ROAD WORK.

EXPERT BELIEVES IT EXCELLENT FOR HARDENING SANDY HIGHWAYS.

Cost is About One-third That of Macadam, or \$1,200 Per Mile, Says Kansas Professor—Several Practical Tests Made.

"Roadmaking with oil I believe to be a commercial success, which will in time be generally adopted in improving the sandy roads of the state."

This is the opinion Professor Albert Dickens of the Kansas State Agricultural college, the man who for the past year has been assigned to the work of expending the \$2,500 appropriated by the last legislature for the purpose of experimenting in oil roadmaking, gave the Topeka Journal.

"The cost of oiling a sandy road," said Professor Dickens while the guest of F. D. Coburn, secretary of the state board of agriculture, "will be about \$1,200 a mile. Some roads will cost more than others. This is only about one-third the cost of macadam and where stone is not plentiful is much less than a third."

"We have constructed oil roadways in four different parts of the state. Our most extensive experiment was near Garden City, where we oiled a little over a mile of road. The sandy soil absorbed vast quantities of oil. Four carloads were put into the roadway with a sprinkling cart. At Hutchinson we made nearly a mile of oil road, and we built short stretches at Manhattan and Maple Hill."

"Whether the oil in the roadways will have to be renewed remains to be seen. Of course there are certain portions of the oil which are volatile and will pass off into the air. But we use for this oiling only the heavy residuum oil left after the kerosene and gasoline have been extracted. This oil is thick and heavy and works better than thin oil."

"Up at Manhattan the people who own fast horses were so well pleased with the oil road that they have oilled the race track and claim that it makes their track one of the best in the state."

"Out at Garden City, where the sand is probably as heavy as any place in the state, the oil experiments are watched with the greatest interest. The whole of western Kansas will be benefited greatly if the oil road comes into general use. There is a rich farming country tributary to Garden City, which is at times almost cut off from the town because of the heavy sand in the roads. The roads are so bad that a horse cannot haul more than ten bushels of wheat at a load."

"The farmers living near Garden City and the merchants in the town are talking of oiling the main roads leading to this tributary country, so that the farmers can come into town regardless of the sand."

"We have found that narrow tired wagons cut up the road badly after it has been oiled, while the wide tired wagons tend to make it more solid and firm. This is of course true to a great extent of the effect of the tires on ordinary roads."

It is likely that the next legislature will be asked to continue the appropriation for oil road experiments in other parts of the state and establish fully the practicability of this method of good roads making.

CALL FOR NATIONAL ROAD.

Appeal to Have Famous Highway Rebuilt by the Government.

The National Good Roads association, with headquarters in St. Louis, has sent out the following appeal to motorists, says the New York American:

"The National Good Roads association is a powerful force for good, and its work is accomplishing results in all parts of the United States. It is engaged in many things that will benefit the people. One of the great schemes it has in mind and which it has set about to accomplish is the repair and rebuilding of the great national road across Maryland, Pennsylvania, West Virginia, Ohio and Indiana."

"That memorable road was intended to be one of the highways of the east and the west before railroads were known. It was built at great expense, costing the federal government over \$7,000,000, and during the early days was a famous highway over which thousands traveled every week. When railroads came into existence the national road was neglected, and today it is only a skeleton of what it once was."

"It is proposed to rebuild it, and the National Good Roads association has undertaken to have it done by the government. The length of the road is about 700 miles, and it can be rebuilt for less than \$7,000,000. That is about the cost of one good battleship, and we are building lots of them. The appropriation of that sum to make this old road across five states would do as much good as the average battleship, for not one such ship in ten will ever get in a fight. Then when the old road has been put in good shape to the Mississippi river it may be that the price of about three other battleships will be set aside to build the road to the Pacific coast."

"One first class continuous highway across the continent would be a great thing. Many a traveler would spend two or three months going and coming by team, bicycle, automobile or otherwise. It would be easy for the nation to do a thing like this."

"In 1905 150,000 Americans visited Europe and for the privilege of going over the first class European roads paid over \$500,000,000."

One of the December bulletins of the public roads office of the department of agriculture shows that the state of Nebraska has 79,462 miles of public roads. Of this mileage only seventeen miles are reported to have been improved with stone and six with sand-clay mixtures. This showing, while a very small one, is not to be construed as meaning that Nebraska is a state in neglect of her roads, but rather that the natural conditions of soil and atmosphere are very favorable to the maintenance of excellent roads with a minimum expenditure of money.
