Electricity for Lighting

Is only expensive to people who are
wasteful and careless. To you, who
are naturally careful, it does not
come high.

It is economical because it can be quickly turned off when not needed.
With gas or kerosene there is the temptation to let light burn when
not needed to save both of lighting and adjusting. In some homes
the electric light bills amount to only one or two dollars per month.
You can probably get some kind of artificial light for less money
than electric light, but does it save you anything when it limits op-
portunities for work and recreation—ruins your eyesight—smokes
your walls—mars decorations and increases household work. You
could probably save a dollar tomorrow by going without your meals
but it wouldn't be economy. It is not so much what you save, but
how you save that counts.

The expert in charge of grain stand-

There is many a good old deacon

The cotton crop of the country for

000,000 bales. About 1,500,000 pickers
were required to gather the crop, each
picking an average of 100 pounds per
day for a period of 100 days. The cost
of harvesting the crop at 90 cents per
hundredweight, of \$9 a bale, amounted
to \$90,000,000.

from time to time mournful proof that
the practice is not yet entirely obsolete

hold of rat poison or start a fire is
noticeable in the extreme.
