THE FARM COLLIE.

Training a Young Shepherd Dog in the Care of Stock.

To make a success in training the collie puppy we must be willing to use both time and patience. He must first learn to come at call and come at once, not hesitatingly or doing so unwillingly. When he is called he should know that he is to obey, and while he is being taught this if he is favored with bits of cooked meat or cake and a friendly pat upon the head he will readily understand and do as he is bidden gladly. Never scold or whip him at this period, for forced obedience done in a

A GOOD COLLIE.
[Waiting for his master's word.]

menial way cannot be depended upon. No dog can be expected to obey gracefully when he knows the whip is waiting for him. Gain his confidence by kind treatment, and his training will be an easy matter. If he looks for a favor or kindness at his master's hand he comes to him full of animation and spirit, ready to help if wanted. Good work cannot be secured if the dog is harshly treated. If he is under good control in this way he can at once be checked when he makes errors in his work instead of going on and making things worse.

Then to come to call at once there is nothing more important for a useful dog to know—to leave all else and heed his master's call. Then teach him to drive at the heel, keeping him in check close by your side while you do the driving, so that he may become accustomed to drive at the rear or heel. Persist in this until he gets the habit well formed, and do not undertake to teach him to head off or turn the stock to right or left until he is a sure driver at the heel. Then he can be taught easily any desired ways of handling the stock, only go slowly, step by step, not trying to accomplish the impossible in turning out a fully trained dog in a few days.

Often a cord is used in restraining the dog if he is over-anxious to force the stock, and in some cases it may be necessary to continue its use until he has given up his fault of going to the head. A headstrong or vicious steer turning upon the puppy would cause him to fight at the head and so get this habit, for which reason we advise avoiding such kind of stock in the early training. If the dog is kept on a chain or in a small kennel yard it is well that he should have a bit of freedom before attempting to keep him under control, it being much easier to manage him after a short run, says Lotherian in giving the foregoing advice in the Breeder's Gazette, Chicago.
