

Farm and Garden

PLANT PROTECTION.

Ways of Shielding Them From the Hot, Direct Rays of the Midday Sun.
If plants are not protected from high winds and too much sun they will not flourish, especially in the early stages of their growth. This is particularly true of the plants in the vegetable garden, and fortunately there are many easy and simple methods of providing them with shade. Empty soap boxes raised on blocks, empty fruit baskets, rolls of carpet and matting spread out on supports to look like awnings may all be used. Old matting or carpets that have seen their best days may enjoy a new lease of life as plant coverings. The great thing is to cover the plants so that they will be shady.

COVERING THE LETTUCE WITH MATTING.

but not without air. Even castoff hats may be used to prop over a delicate new plant, and as straw allows the air to circulate it will not be entirely deprived of oxygen. Stones laid on the bathrims will keep them from blowing away on a windy day.
Castoff fruit baskets are excellent to cover transplanted plants. They provide sufficient shade and do not smother the plants because the openings let in air. They are very light to handle and easy to store because they set into each other, besides being sufficiently durable to last an entire season or longer. They cost nothing, can be collected and saved for the purpose, and weather does not destroy them quickly or winds blow them easily about. Use peach baskets for the larger plants, plum and grape baskets for smaller plants, or for two or three of the very smallest, and strawberry baskets for the smallest of all. Even these will span two seedlings set near together.
Choose a cool, shaded corner for lettuce. If you have none such, make a retreat for the succulent delicacy. Have a movable screen of reeds or woven twigs with which to protect the lettuce bed from the noonday sun. Take it up at night and do not put it up on cloudy days. By a little care in this respect you will secure sweet salad. As the first supply of plants shows a tendency to rot to seed, have a second and a third installment ready to take its place. Lettuce that grows in the sun gets bitter, and when the head elongates into a stem it is past use.
Radishes also thrive into juicy mildness in the shade, although they will bear more sunshine than lettuce. If set so near a brick wall as to feel the radiated heat as well as the direct rays of the sun, they will develop too fast and become pithy and pungent. Here, too, it is wise to have a succession of crops. Manage this by judicious renewal of young plants or by sowing seeds at different times.
Green peas should be planted early in the season. Give them rich earth, plenty of light and heat, and water

formation of little runs which might produce washouts.
The soil should be enriched with a liberal supply of well rotted manure. This is essential where the soil is lacking in humus; otherwise bone meal or other good fertilizer is useful, and manure often contains the seed of weeds. The ground should be plowed or spaded not less than eight inches deep, removing all the stones and similar material, and the surface made as smooth as possible. Then it is ready for sowing.
One of the best mixtures for the lawn is four parts Kentucky blue grass with one part of white clover, sown not less than five bushels to the acre. Equally good results are usually obtained by the use of redtop in place of the blue grass or with equal parts of redtop and blue grass and a little white clover. When moisture is plentiful the blue grass forms a softer turf than the redtop, but does not seem to endure drought so well. In shady places the blue grass mixture is best. Nothing but pure seed should be sown. It is well to be liberal with the seed, not to scatter it too thinly and to reseed portions that come up poorly.

War Against Consumptives
All nations are endeavoring to check the ravages of consumption, the "white plague" that claims so many victims each year. Foley's Honey and Tar cures coughs and colds perfectly and you are in no danger of consumption. Do not risk your health by taking some unknown preparation when Foley's Honey and Tar is safe and certain in results. Stafirin Drug Co.; M. L. Thompson, Falls City.
Some Grande Ronde valley apples raised last year are still sound and of fine flavor.
A Revelation
It is a revelation to people, the severe cases of lung trouble that have been cured by Foley's Honey and Tar. It not only stops the cough but heals and strengthens the lungs. L. M. Roggles, Reasnor, Iowa, writes: "The doctors said I had no chance of recovery. I got better until I took Foley's Honey and Tar. It stopped the hemorrhages and pain in my lungs and they are now as sound as a bullet." Stafirin Drug Co.; M. L. Thompson, Falls City.
The Bandon woolen mill is again running, with a greater capacity and output than ever before.

BRUSSELS SPROUTS.
Easy to Raise and Profitable if Properly Marketed.
Brussels sprouts may be easily grown in the ordinary home vegetable garden. The plant is a close relative of the cabbage and cauliflower, but instead of producing a single head forms a number of small ones in the axils of the leaves, and these heads are called sprouts and are the edible part of the vegetable. The sprouts average one or two inches in diameter.
The seed should be sown in the open ground as early as the weather permits. When the plants are three inches high they should be transplanted or thinned out into rows twenty-four to thirty inches apart and about two feet apart in the row. The plants must be well watered after they have been moved.
As the small sprouts begin to crowd the leaves should be broken from the stem to give the small heads more room. A few leaves should be left at the top of the stem where the new heads are formed.
In warm climates the plants may be left in the open ground all winter, the heads being removed as desired, but in more northern latitudes plants that are well laden with heads are taken up when frost comes and set close together in a pit or cellar or a "cold frame" or bed covered with glass. With a little soil packed about their roots they may in this way be kept all winter, being used when needed. When boiled or stewed with cream they are delicious.

GROWING RHUBARB.
A Crop That Pays Well For Very Little Outlay and Work.
The best crop, counting expense of growing and amount of land used, is pieplant. Procure some roots of the Linnaeus variety that is early, tender and, while growing very large, is less acid than many other kinds.
Prepare the benches by putting five or six stalks in a bunch, tying it securely at the butts of stalks and again around the leaves just above the stems; then with a sharp knife cut off a portion of the leaves, leaving about a third of the green leaf on the stalk. It will wilt less quickly with a part of the leaf on than with the whole leaf or where only the stalk has been left.
The rows should be six feet apart and plants four feet in row. The only work expended on it is to cultivate two or three times early in the season and hoe it once. In the fall the rows are covered with a mulch of straw manure.
Pull it late in the day, tie and trim the leaves, then pack it in sixty quart berry crates. It does not wilt as much if crowded in tightly.
Rhubarb may be made to yield about \$5 to \$10 an acre per month.

MILK POWDER.
Great Trade Can Be Built Up For Product, It Is Believed.
The Creamery Journal of London predicts a bright future for the milk powder trade. It says: Now that practical processes have been invented for the conversion of milk into powder the question of the possibilities of such a business demands the attention of all creamery proprietors and managers. The great difficulty in most manufacturing businesses is the proper utilization of byproducts. Now, separated milk in creameries is practically a waste material. It fetches on the average a price of a penny per gallon. It can only be sold in the immediate neighborhood of the creameries, as carriage to a distance is not possible at such a price.
The process referred to gets rid of practically the whole of the water contained in the milk, and the residue of milk powder amounts to only about one-tenth of the weight of the milk. Even were it possible to send the separated milk economically to a distance the heavy cost of the packages required would be a very serious drag on the business. But the milk powder may be forwarded in any ordinary light commercial package that can stand the strain of a railway journey.
For wholesale purposes it may be packed in bags, like flour, at practically no cost whatever. The trade being perfectly practical one, the next question is, What are the possibilities of finding a successful market for the product? And it seems to us that if milk powder is properly placed on the market it will find innumerable profitable outlets. It will be used in enormous quantities by biscuit manufacturers and by bakers and confectioners to a large extent in the manufacture of milk bread, cakes and pastry of various sorts. As it will keep for any length of time, it will obviously be invaluable on board ship.
Utilizing a Broken Hoe.
Don't throw away the hoe with a broken handle even if there are only two feet of the handle left. Instead take it to a blacksmith shop and have the hoe straightened out on a line with the handle. It would not be amiss also to have the hoe sharpened. You will find this useful in many places around the chicken house or in the garden for digging weeds or lifting plants for repotting.

GRASS CULTURE.
Forethought and Intelligent Supervision Insure a Good Lawn.
Great care should be taken by the gardener with his lawn. It is the canvas upon which he will paint his flower bed pictures and landscape effects. To be successful he must prepare his canvas first.
The first thing is to grade the ground, smoothing rough surfaces, making proper level stretches and gentle slopes. If possible, the lawn should slope from the house. The grading should be done so as to distribute evenly all surface water, avoiding the

Best of the World Affords.
"It gives me unbounded pleasure to recommend Bucklen's Arnica Salve," says J. A. Jenkins, of Chapel Hill, N. C. "I am convinced it's the best salve the world affords. It cured a felon on my thumb, and it never fails to heal every sore, burn or wound to which it is applied." 25c. at Belt & Cherrington's drug store.
Brooks claims to be the loganberry center, shipping carload lots. One grower has 21 acres and ships 300 to 600 crates a day.
Rev. I. W. Williams, Huntington, W. Va., testifies as follows: "This is to certify that I used Foley's Kidney Remedy for nervous exhaustion and kidney trouble, and am free to say that Foley's Kidney Remedy will do all that you claim for it." Stafirin Drug Co.; M. L. Thompson, Falls City.
Away back in 1874 the Coos bay mites shipped as much coal to San Francisco as Bellingham bay, Seattle and Vancouver together.
Delay in commencing treatment for a slight irregularity that could have been cured quickly by Foley's Kidney Remedy may result in a serious kidney disease. Foley's Kidney Remedy builds up the worn out tissues and strengthens these organs. Commence taking it today. Stafirin Drug Co.; M. L. Thompson, Falls City.
Out of six cherries which have a commercial value and are now being grown extensively, five were originated in the Willamette valley, only one, the Royal Ann, not being a Willamette valley product.
Just Exactly Right.
"I have used Dr. King's New Life Pills for several years, and find them just exactly right," says Mr. A. A. Nelson, of Harrisville, N. Y. "New Life Pills relieve without the least discomfort. Best remedy for constipation, biliousness and malaria." 25c. at Belt & Cherrington's drug store.
A cherry tree on the C. H. Taylor farm, south of Salem, measures seven feet seven inches in circumference and bears as much fruit as some entire orchards, the crop this year being several wagon loads.
The function of the kidneys is to strain out the impurities of the blood which is constantly passing through them. Foley's Kidney Remedy makes the kidneys healthy. They will strain out all waste matter from the blood. Take Foley's Kidney Remedy and it will make you well." Stafirin Drug Co.; M. L. Thompson, Falls City.
Amity, in Yamhill valley, has a new milk condenser which began operations last May, handling 30,000 pounds of milk daily, employing 45 persons and receiving milk from 2,000 cows.
Foley's Urino Laxative, the new laxative, stimulates, but does not irritate. It is the best laxative. (Guaranteed or your money back. Stafirin Drug Co.; M. L. Thompson, Falls City.)
Savoy Cabbage.
Savoy leaved cabbages are largely used in Europe. They are marked by a peculiar fine crumbling of all the leaves, particularly those of the head. They are generally of better table quality than common cabbage, more tender, finer in texture and of more delicate flavor. The plants are better able to resist cold, but do not give so large a yield of heads, and the heads are less solid and cannot be handled so well as the more common sort.

War Against Consumptives
All nations are endeavoring to check the ravages of consumption, the "white plague" that claims so many victims each year. Foley's Honey and Tar cures coughs and colds perfectly and you are in no danger of consumption. Do not risk your health by taking some unknown preparation when Foley's Honey and Tar is safe and certain in results. Stafirin Drug Co.; M. L. Thompson, Falls City.

The Publisher's Claims Sustained
UNITED STATES COURT OF CLAIMS
The Publishers of Webster's International Dictionary allege that it is, in fact, the popular and undoubted best dictionary in every detail, and vastly enriched in every part, with the purpose of adapting it to meet the larger and severer requirements of another generation.
We are of the opinion that this allegation most clearly and accurately describes the work that has been accomplished and the results that have been reached. The Dictionary, as it now stands, has been thoroughly re-edited in every detail, has been corrected in every part, and is admirably adapted to meet the larger and severer requirements of a generation which demands more of popular philological knowledge than any generation that the world has ever contained.
It is perhaps needless to add that we refer to the dictionary in our judicial work as the highest authority in accuracy of definition; and that in the future we will past it will be the source of constant reference.
CHARLES C. NOTT, Chief Justice.
LAWRENCE WELDON, JOHN FAY, HENRY J. HANCOCK, CHARLES H. BOWLEY, Judges.

Grasses Everywhere.
Grasses are widely distributed. We usually think of them as existing in our temperate zones only, because here we have the perennial pastures and meadows. They are, however, to be found as far north that the soil is frozen under them during the greater part of the year, while they are also common to parts of the south where the frost is never known. Even the mountain tops that are clothed with perpetual snow have just below the snow line their carpets of moss that grow and bloom through a brief period every year. The grasses push hard against the eternal snows.
Holland Cabbages.
It appears that some varieties of cabbage and cauliflower suffer more from maggot attack than others, but except for the Holland cabbages there are none, so far as we know, that will not be badly injured by these pests. Both from our own state and elsewhere the Holland cabbages are reported as being quite free from maggot attack and need little if any treatment. -New Jersey Experiment Station.
Applying Lime.
The fall is generally considered the best time to apply lime, but moderate application may be made whenever the farmer finds it convenient to perform the work. Much of the fall grain is sown on corn ground, and this land is not plowed up or in shape to apply the lime advantageously at that season.

WHY WOMEN SUFFER
A Little Sound Advice Will Help Many a Sufferer in Dallas.
Women have so much to go through in life that it is a pity there is so much needless suffering from backache, headaches, dizziness, languor and other common aches and pains of kidney complaint. Doan's Kidney Pills have brought new life and strength to thousands of women afflicted in this way. Don't worry if you feel tired and dragged out—if you have backache and bearing-down pains, headache, dizzy spells, faintness and lack ambition. Don't think it's some trouble peculiar to the sex. Men suffer in the same way when they have kidney trouble. Ask yourself this question: "Are the kidneys well?" The condition of the kidney secretions may give you an answer. If there is a brick-dust sediment, or a stringy settling in the urine; if passages are too frequent and copious, or scanty and painful it is time to begin using Doan's Kidney Pills. Delay may run you into Bright's disease or diabetes.
Doan's Kidney Pills cure every form of kidney trouble. Call at Belt & Cherrington's drug store, and ask to see the statements of Dallas women who have used this remedy.
For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

ROBERTINE
The Secret of a Beautiful Face lies in keeping the skin protected as well as cleaned. Just washing is not enough—that only leaves the delicate surface more exposed to the irritation of dust and germs; to mercurial attacks of sun and weather. After washing, apply Robertine and experience its delightful refreshment. You will admire the line-less softness it imparts to face, neck and arms. It not only stimulates radiant glow, but protects the skin from becoming coarse. Prevents burning, tan and freckles.
