

SEES FOREIGN LANDS

(Continued from Page One.)

and most expressed a preference for the Puget Sound. Our party of fifteen from Washington were entertained at a 5 o'clock tea at the home of Mr. Smith, city editor of the Cablenews-American, where we met many former Washingtonians. In the evening (to those who cared to go) we were entertained at a cocktail given by the natives. They have a large building, similar to the arena at the A-Y-P fair, seating about 4,000 people with the pit or platform in the center, about 25 feet across, enclosed with small pickets. The judges and handlers were inside this enclosure. As the fighting cocks were brought on and exhibited the excitement began.

The arena was packed with Chinese and natives, and it seemed all were betting or waiting to bet on one of the shouting and running around. It reminded one of the wheat pit in Chicago and New York during a panic. The first ring of the gong all was still, with thousands of eyes turned towards the pit; the second ringing of the gong, the fight was on. It was, in reality, a fight for life, as they fight until one is killed or runs away, in the latter case the trainer immediately kills him. It lasts only a few minutes. They certainly get quick action for their money, as they bring in the other cocks as fast as they are needed.

Monday evening at the Hippodrome 5,000 children sang, accompanied by the constabulary band, after which Vice Governor Gilbert received, the program closing with a dance.

Government Question.

The government question is an ever present subject with the foreigners. They are either for or against it. The few I talked with seemed to think Uncle Sam gives the natives too much power. Whatever may be said, there is no question but what the United States government is making great improvements in the harbor and for the city of Manila. A few more years of the same kind of work and this harbor will be one of the best fortified in the world.

On Tuesday, March 22, at 4 p. m., we steamed south for Borneo. A two-day run over a very smooth sea, but getting hotter as we neared the equator, arriving on Friday at 6 a. m. in the small town of Victoria, Labuan Island, Borneo, where we were entertained with a native water dance, spear throwing and a water buffalo race. We did not see any real wild men, one hears so much about, the wildest we saw on our own crowd for stopping at such a place. We spent six hot, sweltering hours at this place and were glad to be on our way again for a three-day run for Batavia on Java Island, six degrees below the equator.

Cross the Equator.

On March 27, at 2 a. m., we crossed the equator, when a messenger from Neptune arrived to report if we were fit subjects to be received by his majesty. The report was evidently all right, as Neptune himself with his full retinue boarded our ship at 2 p. m. the next day when the ceremonies of initiation took place. Many of our passengers were made full members by getting a ducking in the pool. The sea at this place is as smooth as a pond, and if it were not for the vibrations of the engines you would not know you were on the water. The evenings are very pleasant and the sunsets are beautiful. For the first time our shadows are south instead of north. March 28, 6:30 a. m., anchored outside of the breakwater at Tandjong-Prick, landed in coasting steamer and took train for a five-mile run to Batavia, a city of 100,000 people. It is the capital and chief city of the Dutch East Indies. This city is called the Pearl of the Orient and sometimes the Garden City. It certainly is a very beautiful place with its miles of broad streets lined with royal palms and banyan trees which give the impression of an immense park. Their homes are neat, one or two-storied plaster houses with tiled roofs, and are set several hundred feet back from the street, giving a large front yard, completely shaded from the sun's rays.

This applies, as well, to the better business houses. The vehicles used are the victorias, drawn by two horses, four wheeled carriages with canopy top and the two-wheeled dos-dos, drawn by a pony. It is the driver's luck to draw the smallest one, necessitating my crowding the driver almost onto the pony's heels, otherwise my weight would overbalance and raise the pony off its feet; as it was the native had a great deal of sport at my expense. It is needless to say I only tried this conveyance once.

Good Street Car System.

They have a good system of electric street cars and quite a number of automobiles. The money used is the Dutch guilder, 2 1/2 of which is equal

to our dollar. The weather was warm during the day, but with pleasant nights. Further in the interior they say it is much cooler.

The entire island is very fertile. The principal crops are sugar, rubber, rice, copper, coconut and pineapples. In about the ratio named, although tea, in the last few years, is being extensively cultivated. The natives get about \$4 a month in the fields and about \$5 to \$6 as house servants.

The banking house of Batavia is of considerable importance, owing to the vast agricultural resources of the island and the large volume of business that must be carried on through this port, necessitating an enormous amount of capital. The largest bank in Batavia has a capital of \$20,000,000, of which \$10,000,000 is paid up, with a reserve capital of \$2,000,000, and pays a dividend of 5 to 15 per cent. The government bank, which issues specie has a capital of \$2,500,000 and several others are nearly as large. From Batavia it is possible to traverse the entire island of Java by rail, as they have a very good system of narrow gauge railroad, which branches in all directions through the island and to important seaport towns. After a very pleasant and profitable two days stay in Batavia we started north for Singapore, a run of two nights and a day. For over a third of the way we skirted the eastern shores of Sumatra Island, which is also controlled by the Dutch government. It appeared very low and flat, and we were told that the highest elevation was not over 500 feet. Copper, coconut, rice and tobacco are the principal crops raised. The island is also well stocked with tigers.

Arrival in Singapore.

We arrived in Singapore on March 31 at 6 a. m. We were taken at once ashore, where our party was divided, half sight-seeing in the city, the other taking train for a run of seven miles through the tropical island to Woodland, where we were met by small steamers to the mainland.

Jahore, a town of about 20,000 population, the capital and home of the sultan.

We had the pleasure of viewing the interior of the palace and strolling through the grounds, which are quite lovely and nicely kept up. The palace itself is a large building with several smaller ones adjoining, highly decorated with bright paint and gilt. On our return to Singapore we had luncheon at the noted Raffles hotel, after which we drove about the city. Singapore is the most modern of any city yet visited. They have several large department stores, very similar to our general stores. The streets were very clean and attractive, of a red brown color, and kept clean by being constantly swept and sprinkled. The city has a population of 300,000 and is called the crossroads or halfway place of the world. It is claimed that 30,000 vessels come and go through this port yearly.

Alive With Vessels.

The harbor of Singapore is simply alive with vessels. Looking from the shore as far as the eye can see is one large field of masts and smoke stacks, while in between the water is kept alive by the small steamers that supply the ships with provisions and water. Without this shipping Singapore would be of no great importance, as its industries and productions are of comparatively little value. However, during the past year great strides have been made in the rubber planting industry. Over 275,000 acres were planted last year, and this year about 300,000 more will be planted. Singapore has a very pleasant climate, although it is only eighty miles north of the equator. Its daily rain, no doubt have much to do with tempering the heat. We experienced one which inspired some of our party to suggest that they change the name of Singapore to Double-drops.

After too short a stay in this commercial city we started on our way north, a three-day run to Rangoon, a city of 200,000. Arriving on Monday morning, April 4th, we made our way direct to Shwe Sagon pagoda, the most celebrated shrine of the Buddhist world and probably the oldest being established about 400 B. C. Thousands from all over India visit this shrine every year, and its wealth is enormous. It is said the gems in the top are worth \$250,000. It is built upon a terrace, about 170 feet high, 900 feet long and 700 feet wide. In shape the pagoda resembles a huge column or cone, being about 1,350 feet in circumference, tapering rapidly in a bell-like figure to a circular column, the entire height being 317 feet. This huge structure is composed of masonry of stone, brick and cement, and is gilded from base to apex. The column is bound at frequent intervals with iron bands, from which are suspended bells of gold, silver and bronze.

The Great Pagoda.

The great terraces upon which the pagoda stands are reached by flights

of steps, covered with carved teakwood roofs, supported by stone and wooden columns. The entrance to the pagoda is gained through four arched wings, adorned by elaborate carvings and sculptures. Upon the terraces surrounding the pagoda are many smaller temples and shrines, beautifully carved and decorated. A great many of these temples are decorated with inlaid mirrors of about one inch in size, in all sorts of shapes and colors, giving a perfect Persian blending to the entire interior and supporting columns.

We next visited the teakwood sawmill and lumber yards, where we saw the elephants at work handling logs a foot and a half through and fifteen to twenty feet long as easily as some of our big engines.

Rangoon is well laid out with straight streets, crossing at right angles. She extends over a mile along the waterfront and about the same inland. The business section is well covered with good, substantial structures of three and four stories. The riverfront is lined with wharves, and two-thirds of the exports of Burma, which are rice and teakwood, are shipped from this port.

Burma has an area of 290,000 square miles and has fully 10,000,000 people, mostly a mixture of Burmese, Chinese and East Indians. Burma is India politically, but Chinese geographically. The pure blood Burmese will, in a few years, be extinct through intermarriages. Burma boasts of the third largest oil company in the world, called the Burma Oil Company. They have India as well covered as the United States is covered by the Standard Oil company. The most valuable mineral resources of Burma are rubies, jade, amber, tin, coal, gold and marble. The larger part of the world's supply of rubies comes from Burma. After a two-day visit at Rangoon we started on our way northwest, 800 miles, to Calcutta, the real entrance from the east into India, which I will write about in my next letter.

(To be Continued.)

GROWING ENGLISH WALNUTS.

Found to Be Capable of Doing Well in Eastern Orchards.

English walnuts are a welcome addition to the winter dinner bill, and many of them are eaten in New England. Few are the New Englanders, however, who have ever seen English walnuts growing. A Boston Globe correspondent sent in two photographs of walnut trees of the English variety raised in this country, with a note from the raiser of the note, Norman Pomeroy of Lockport, N. Y.

"Few people realize," wrote Mr. Pomeroy, "that English walnuts can

be grown extensively in the eastern part of the United States, and only the merest accident was it found that they could be. My father, Norman Pomeroy, visited the Centennial exposition, and, noticing a tree in the yard where he boarded at Philadelphia bearing nuts, gathered about a peck of them and brought them home with him. Some children found a small hole in the corner of the nut, and he planted them, and they soon put up shoots that grew into fine large trees, which bore well. Some more trees were raised from this acclimated stock, and we now have a fine young orchard. Quite a number of our neighbors also raise walnuts from this stock."

Purpose of Stirring Soil.
A newly stirred soil admits the air to the roots, conserves moisture and prevents the growth of weeds. Every shower tends to seal up the surface and exclude the air. So aim to stir up the soil after every rain.

Little More Than a Bushel.
A box 16 by 18 by 7 1/2 inches inside measurement holds a little over a bushel of fruit. It has a cubical content of 2,100 cubic inches, whereas a standard bushel requires but 2,150.42 cubic inches.

A Good Investment.
Beautiful home grounds are an investment, just as good fences, drainage, etc., are. They add to the value of the farm and to the happiness of the family.

Things Essential in the Dairy.
There are three things that are absolutely essential to success in dairying—a milk scale, a Babcock tester and a centrifugal separator. When dairying is made a business these things are very generally used, but in the small dairy of five or six cows kept as an adjunct to mixed farming they are too often wanting. Statistics show that the average amount of butter produced per cow in the United States does not exceed 150 pounds per annum. Where farms are taken to know the capacity of every cow in the herd, as in a well equipped dairy plant, such a cow soon meets the knife, and it follows that the cream of the small herds considered by themselves the average would be lamentably low, so the question addresses itself particularly to the owner of a few cows.

While milk may be measured, it is so inconvenient that it is rarely done. A scale enables one to quickly ascertain the quantity, so that every milking can be recorded in detail, and it pays to do it. There is no other way to find a cow's butter capacity than with a Babcock tester, except to churn her product separately, which is too much of a task to be attempted.

When the productiveness of the cow is known the older processes of getting the cream, as gasing and surface skimming, skimming separator and the like, are wasteful.

One of Polk County's wealthiest farmers, now retired, once told us that every advertisement published by him in the Observer's "Wanted" and "For Sale" column had paid him \$10 for every \$1 he paid out. He is now one of Portland's heavy property owners. Is not his experience worth considering the next time you have anything to buy or sell?

Farm and Garden

DIRECTIONS FOR SPRAYING.

Various Methods Recommended by the Kentucky Agricultural Station.

There are three general purposes for which one must spray:

First—For gnawing insects, such as the Colorado potato beetle and the codling moth. For these pests some poison is commonly employed, such as paris green or arsenate of lead.

Second—For puncturing insects, such as plant lice, scale insects and the chinch bug. Coal oil in emulsion is one of the most satisfactory preparations for these pests, but several others have advantages.

Third—For fungous pests, such as black rot of grapes, scab of apple and the various mildews. These pests are plant parasites and cannot be poisoned with paris green. Oily preparations, too, have little effect on them. For most of them a good Bordeaux mixture or some preparation of sulphur is best.

The answer to the question, "What spraying outfit shall I get?" depends entirely on the kind of spraying to be done and the extent of the work proposed. If one has a few rosebushes or tomato plants about a dwelling, or even a few small fruit trees, he can get along very well with a small hand pump, known as a bucket pump, with a little extra hose and a pole or bamboo rod, with which to elevate the nozzle. It is possible to spray trees

using a knapsack sprayer. (From bulletin of the Kentucky State university agricultural experiment station.)

For extensive spraying it is well to secure a strong pump attached to a barrel or tank that can be hauled about in a cart or wagon. Hand pumps so attached are used for small orchards and other plants grown in a moderate way, and power pumps are demanded for extensive spraying and for that required by tall trees.

About most farms a useful sprayer is a barrel pump to be operated by hand. It serves for the orchard, for potatoes, and can be so managed as to answer for grapes and single shrubs or trees.

A man engaged in fruit growing or potato growing as a business ought nowadays to have a power sprayer of some sort.

A general purpose spray pump should be made of brass so that it will not be corroded by the copper sulphate used in Bordeaux mixture. If one wishes to spray only arsenate of lead, paris green or lime sulphur preparations a pump of iron may be employed. Nozzles, too, should be made of brass and ought to be constructed so that they can be quickly cleared of solid particles.

The drainage is best investment farmers can make. Not one farm in ten is thoroughly drained—rolling lands no exception.

Wheel Hoe a Good Thing in the Garden. One of the most indispensable garden tools is the wheel hoe. The cost is small, and a surprising amount of labor will be saved, especially in gardens where horse cultivation is not practical. Wheel hoes can be obtained with a variety of attachments. A wheel hoe attachment is a great convenience in planting the seed, as seed of all kinds can be planted, covered and the ground packed all at one operation. The cultivating attachments comprise several kinds of shovels and harrows. Two or three of these attachments to meet the varying conditions the weeds can be kept down with little hand hoeing.

Don't Burn Your Cornstalks.
The old practice of burning cornstalks in the field is still practiced in some localities, and its wastefulness does not seem to be understood. While stalks may have but little value as manure, they have a good deal in the production of humus, and farming on land devoid of humus is a heartbreaking proposition. The cutting and plowing under of the stalks involve no more labor than do the breaking and burning, while the former process saves all of their value to the land. Ashes from cornstalks do not make good manure. —Kansas Farmer.

The new cases in the raspberry patch—those which will be bearing fruit next season—should be tipped when they are about three and a half feet high. This will result in a sturdy, well branched bush, to the maturing of which all the plant energy for the rest of the season will be devoted.

Quite accurately the spread of the root system of shrub or tree is indicated by its visible spread of branches. This should be of aid in pruning roots and branches at the time of transplanting and also in the cultivation and care of trees after they are set, including the growing of tilted crops in orchard tracks.

Two Dollars for One.
One of Polk County's wealthiest farmers, now retired, once told us that every advertisement published by him in the Observer's "Wanted" and "For Sale" column had paid him \$10 for every \$1 he paid out. He is now one of Portland's heavy property owners. Is not his experience worth considering the next time you have anything to buy or sell?

A man on the Deschutes river has produced first class neturines.

Executor's Notice.
Notice is hereby given to whom it may concern, that the undersigned, Executor of the estate of Eliza G. Emmens, deceased, has this day filed his final account in said estate with the County Court of Polk County, Oregon, and the same has been set for hearing by said Court on Saturday September 24, 1910, at the hour of 10 o'clock a. m. in said Court, at which time all persons having objections to said final account, if any there be, are hereby notified to present the same to said Court at the Court room in Dallas, in said County and State, and upon failure so to do, the executor will apply to said Court to have said account finally and finally approved, the estate closed, the executor discharged and his bondmen released.

Dated at Dallas, Polk County, Oregon, this 25th day of August, 1910.

J. D. SMITH, Executor of the estate of Eliza G. Emmens, deceased.

Notice of Final Settlement.
Notice is hereby given that the undersigned as administrator of the estate of Nancy J. Taylor, deceased, has filed his final account in the County Court of the State of Oregon for Polk County, and that Saturday, the 24th day of September, 1910, at the hour of ten o'clock in the forenoon of said day, at the Court room of said County Court in the City of Dallas, Oregon, as the time and place for the hearing of objections to the said final account, and the settlement thereof.

CLAY S. TAYLOR, Administrator of the estate of Nancy J. Taylor, deceased.

NOTICE TO CREDITORS.
Notice is hereby given that the undersigned has been duly appointed administrator of the estate of Pleasant K. Knower, deceased, in and for the County of the State of Oregon for Polk County, and has qualified. All persons having claims against the said estate are hereby notified to present the same to him with proper vouchers at the law office of C. M. Inman in the City of Dallas, Oregon, within six months from the date of this notice.

Dated and first published August 12, 1910.

PETER COOK, Administrator of the estate of Pleasant K. Knower, deceased.

ADMINISTRATOR'S NOTICE OF APPOINTMENT.
Notice is hereby given that the County Court of Polk County, Oregon, did on the 16th day of July, 1910, duly make and enter an order appointing C. A. Knower administrator of the estate of Mary Emmeline Knower, deceased, and the said administrator has duly qualified therefor, and hereby notifies all persons having claims against the said estate to present the same to him with proper vouchers at the law office of C. M. Inman in the City of Dallas, Oregon, within six months from the date of this notice.

Dated and first published August 12, 1910.

R. L. CHAPMAN, Administrator of the estate of Andrew Knower, deceased.

ADMINISTRATOR'S NOTICE.
Notice is hereby given to whom it may concern, that the undersigned, Administrator of the estate of Eliza Allen, deceased, has filed his final account in said estate with the Hon. County Court of Polk County, Oregon, and the same has been set for hearing by said Court on Saturday, the 24th day of September, 1910, at the hour of 10 o'clock a. m., at the Court House in Dallas, in said County and State, at which time all parties having objections thereto, if any there be, are hereby notified to appear and present the same, and in case of failure so to do, the undersigned will ask the Court to have said account finally approved, the estate closed and the executor discharged and his bondmen released.

Dated at Dallas, Oregon, this 25th day of August, 1910.

ANDREW KEISHAW, Administrator of the estate of Eliza Allen, deceased.

SIBLEY & EAKIN, Attorneys.

Summons.
In the Circuit Court of the State of Oregon for Polk County. Department No. 2.

N. L. Goodfellow and Howard D. Goodfellow, Plaintiffs vs. Gilbert Alderman, Defendant.

To Gilbert Alderman, the above named defendant.

In the name of the State of Oregon, you are hereby required to appear and answer the complaint filed against you in the above entitled Court and cause on or before six weeks from the date of the first publication of this summons upon you, and if you fail so to appear and answer the plaintiffs will take a decree against you as prayed for in their complaint herein, to-wit: that plaintiffs are the owners in simple of the following described real estate situate in the County of Polk and State of Oregon, to-wit: The south half of the North half of the County of Polk, in said County, of Section 15, in Township 6 South, Range 4 West of the Willamette Meridian, and that you be forever barred and enjoined from claiming any right, title or interest therein in law or equity in or to said real premises or any part thereof.

Dated at Dallas, Oregon, this 25th day of August, 1910.

ADMINISTRATOR OF THE ESTATE OF ELIZA ALLEN, deceased.

How's This?
We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. F. J. CHENEY & CO., Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions, and financially able to carry out any obligations made by him.

WALDING, KINNAN & MARVIN, Wholesale Druggists, Toledo, O. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price, 75c. per bottle. Sold by all druggists.

Take Hall's Family Pills for constipation.

HIDDEN DANGERS.
Nature Gives Timely Warnings that No Dallas Citizen Can Afford to Ignore.

Danger Signal No. 1 comes from the kidney secretions. They warn you when the kidneys are sick. Well known secrets a clear amber fluid. Sick kidneys send out a thin, pale, foamy or a thick, red, ill-smelling urine, full of sediment and irregular of passage.

Danger Signal No. 2 comes from the back. Back pain, dull and heavy or sharp and acute, tell you of sick kidneys and warn you of the approach of dropsy, diabetes and Bright's disease. Doan's Kidney Pills cure sick kidneys and cure them permanently. Here is proof of a nearby resident:

J. A. Simmons, Log Cabin St., Independence, Ore., says: "I do not believe I would be alive today were it not for Doan's Kidney Pills. I suffered for a long time from kidney trouble and lumberago. The kidney secretions were too frequent and painful in passage and caused me much annoyance. I tried number of remedies but was not helped until I began using Doan's Kidney Pills. They helped me from the first and I am now free from kidney complaint."

For sale by all dealers. Price 50 cents. Foster-McMillan Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

Notice to Creditors.
Notice is hereby given that the undersigned has been duly appointed executor of the estate of Alexander H. Collins, deceased, by the County Court of the State of Oregon for Polk County, and has qualified.

All persons having claims against the said estate are hereby notified to present the same duly verified, together with the proper vouchers therefor, to the undersigned at his residence in the City of Dallas, in said County, within six months from the date of this notice.

Dated and first published July 25, 1910.

SARAH E. COLLINS, Executrix of the estate of Alexander H. Collins, deceased.

Oscar Hayter, Attorney.

Notice of Final Settlement.
Notice is hereby given that the undersigned as administrator of the estate of Silas R. Whitlow, deceased, has filed his final account in the County Court of the State of Oregon for Polk County, and that Saturday, September 2, 1910, at the hour of 1 o'clock in the afternoon of said day, at the Court room of said County Court in the City of Dallas, Oregon, has been appointed as the time and place for the hearing of objections to the said final account, and the settlement thereof.

S. R. BAGLEY, Administrator of the estate of Silas R. Whitlow, deceased.

Raises the dough and complies with all pure food laws.

MAKERS MFG. CO.
MAKERS OF MAPLEINE
(Better than Maple.)

Staggers Skeptics.
That a clean, nice, fragrant compound like Bucklen's Arnica Salve will instantly relieve a bad burn, cut, scald, wound or piles, staggers skeptics. But great cures prove it is a wonderful healer of the worst sores, ulcers, boils, felon, eczema, skin eruptions, as also chapped hands, sprains and corns. Try it. 25c at all druggists.

Try an Observer "Want Ad."
The cost of an advertisement in the Observer's "Wanted" and "For Sale" column is small, and the farmers tell us they bring results.

Struck a Rich Mine.
S. W. Bonds, of Coal City, Ala., says he struck a perfect mine of health in Dr. King's New Life Pills for they cured him of Liver and Kidney Trouble after 12 years of suffering. They are the best pills on earth for Constipation, Malaria, Headache, Dyspepsia, Debility. 25c at all druggists.

Some Baker City hunters "bagged" 40 ashegans on a recent hunting trip.

The Best Hour of Life
Is when you do some great deed or discover some wonderful fact. This hour came to J. R. Pitt, of Rocky Mt., N. C. when he was suffering intensely, as he says, "from the worst cold I ever had, I then proved to my great satisfaction, that a wonderful Cold and Cough cure, Dr. King's New Discovery is. For after taking one bottle, I was entirely cured. You can't say anything too good of a medicine like that." It's the surest and best remedy for diseased lungs, Hemorrhages, La Grippe, Asthma, Hay Fever—any Throat or Lung Trouble. 50c. \$1.00. Trial bottle free. Guaranteed by all druggists.

The harvest is greater than predicted.

Foley Kidney Pills
Tonic in quality and action, quick results. For backache, headache, dizziness, nervousness, urinary irregularities and rheumatism. For sale by Conrad Stafrin.

Rogue River is going to keep up and even improve on its fruit record.

They Have A Definite Purpose
Foley's Kidney Pills give quick relief in cases of kidney and bladder ailments. Mrs. Rose Glaser, Terre Haute, Indiana, tells the result in her case.

"After suffering many years from a serious case of kidney trouble and spending much money for so called cures, I found Foley Kidney Pills the only medicine that gave me a permanent cure. I am again able to be up and attend to my work. I shall never hesitate to recommend them." For sale by Conrad Stafrin.

Hudson Grange will hold an exhibition of products September 3.

From Sickness To "Excellent Health."
So says Mrs. Chas. Lyon, Peoria, Ill.: "I found in your Foley Kidney Pills a prompt and speedy cure for backache and kidney trouble which bothered me for many months. I am now enjoying excellent health which I owe to Foley Kidney Pills." For sale by Conrad Stafrin.

Possibly there may be a flux and hemp mill in Klamath valley.

Acute or Chronic—Which?
No matter if your kidney trouble is acute or chronic Foley's Kidney Remedy will reach your case. Mr. Claude Brown, Reynoldsville, Ill., writes us that he suffered many months with kidney complaint which baffled all treatment. At last he tried Foley's Kidney Remedy and a few large bottles effected a complete cure. He says, "It has been of inestimable value to me." For sale by Conrad Stafrin.

Legal blanks for sale at this office.
