## Can You Look Your Lawn in the Face?

You can if you're using a good lawn mower. You can increase the beauty of your place fifty per cent. by keeping the grass well clipped.

We furnish everything for the work but the ambition to do it—and a little of that will go a long way if you have the right things to use.

Get a good lawn mower—one that cuts even—runs easily—and isn't too heavy. We keep them.

Get a good grass knife to trim around fence corners and shrubs where the mower won't go.

Get a good sprinkler for keeping the grass like velvet during the hot days. Prices reasonable.

You aren't getting the real value out of your place, when you aren't making the most of your lawn.

Buy sheathing paper with your eyes open. Cheap tarred felt and resin-sized papers tear in the handling and split open on the house, letting in dampness and draughts.

NEPONSET waterproof sheathing paper reduces heating cost by keeping the house tight and warm—NEPONSET

is soon paid for itself. It keeps the house cool in summer by insulating against outside heat. It is made so good that it has also been the standard low cost roofing for over 25 years.

Insure that your contract specifies NEPONSET. We are local agents.
