**Flax will make quite a showing this year in Oregon, according to reports from those sections where the crop has been planted. Plantings made in the Willamette Valley last spring are looking exceptionally well and experts say it is as good flax as is usually seen. **Condon Globe:** A field in this county is turning out \$24.00 worth of wheat to the acre. The price asked for land in that vicinity is approximately \$30 per acre. **Investigations without end have been directed at rural life and the end is not yet, but now comes the government with its announced intention of muckraking the cities, and they need it more than the country ever did. A survey is to be made of urban life with a view to solving some of the problems that are found in every community. An independent official who passed through Portland last week told of the plan and says a great municipal exhibit will probably be gathered for the Panama-Pacific Exposition.**
