Dr. Lyman Abbott's Stand on World Peace Makes Big Stir

DR. LYMAN ABBOTT, editor of the Outlook and one of the country's notables, is being widely praised and criticised for his outspoken attitude on the world peace question. His views were expressed editorially and led to his withdrawal or expulsion—the stories differ—and led to the American peace congress and were also contained in his address at the Lake Mohonk (N. Y.) peace conference, where he presided. He held that international disarmament was not now practical and that peace among all nations of the globe was still in the dim and misty future. Many people wonder whether the association of Dr. Abbott with Colonel Roosevelt had anything to do with his now radical stand.

Mammoth Cave.
Mammoth cave breathes once a year. That is to say, in summer, when the temperature of the external air is above that of the cave, the current sets from the latter to the former. In fact, the cave is the entire summer making an expiration. On the other hand, when the order is reversed, or the outer atmosphere is below 54 degrees, the cave makes an inspiration or draws in its breath. This is accomplished during the winter.
