

Stick a Pin in Yourself

You able bodied men and women who are toiling day by day to the tune of a clock and who are just managing to squeeze out an existence-- stick a pin in yourself for you are not awake to what a grand opportunity awaits you at

GUTHRIE ACRES

There is not a man, woman or child who is able to do a good days' work who cannot be benefitted by establishing themselves on a Guthrie Acre tract where Dame Nature herself will work for you.

Competition is fierce in all business and industrial lines--you know that. But there is no competition on the production of growing things on farms. There's only about half as many farmers as are needed and every dollars' worth of products raised are sold nowadays at the highest prices.

You can buy Guthrie Acre Tracts as low as \$75 per Acre

On a five acre tract you can support a good sized family. On a ten acre tract you can do that and have a good sized bank account at the end of the year.

If we cannot prove these facts to you we will not ask you to consider Guthrie Acres any further.

DALLAS, OREGON

Martyn St. Pierre Funeral.
The funeral of Martyn K. St. Pierre, who died on Sunday at 2:30 p. m., was held Tuesday at the residence in Polk county and the burial took place at City View cemetery at Salem. Rev. H. T. Babcock read the impressive funeral sermon. Mrs. H. T. Babcock, Mrs. A. F. Marcus and Rev. H. T. Babcock sang "Jesus Lover of My Soul," "Beulah Land" and "Simply Trusting Every Day." The pallbearers, who were old school friends of the deceased, were James Best, John Caundy, Geo. Adams, Fred Kabin, Marion Putman and Mr. Johnson. The floral offerings were especially beautiful and contained several costly head pieces.

CANCER removed from DALLAS LADY

On Monday morning a lady of Dallas who does not wish to have her name in the newspapers, but who is willing to talk about her experience to others suffering of similar troubles, had an electrical operation performed by Dr. Toel for the removal of a cancerous growth at the month of her womb. She had had pain in her womb for several years and some discharge lately. A year ago last February she consulted a physician in Portland who expressed his fear that the growth might be cancerous and advised her to have it cut out. However she was afraid of the knife, also knowing that cancers cut out so frequently return. She had read Dr. Toel's notices in the Dallas papers for the last seven weeks but did not have the courage to go to him for an operation. Only when she saw his announcement that June 10th would be the last day on which he would accept new patients did she go to him last Saturday to have a talk with him. She returned on Sunday for an examination and on Monday her cancer was removed. As Dr. Toel's electrical operations are bloodless and almost painless, no chloroform or ether was used. She will be treated regularly every day for a nervous disturbance by Dr. Toel for some weeks and if patients that suffer from similar womb troubles wish to see her about her experience, Dr. Toel will submit their names to her and arrange for a meeting, if the parties are acceptable to her. On account of a number of new patients having come under Dr. Toel's treatment since his announcement of June 10th as the last day to stay longer yet in Dallas. See his three-column card in this paper.

Satisfaction of Mortgage.

Editor Says Dr. Albert Abrams Must Be a 'Rip Van Winkle.'

A Faux Pas.
Why are all the doctors gloomy and why do they seem distressed? What horrible occurrence has disturbed their peaceful rest? They are glooms of the first water and the reason for their grief, is because appendicitis no more needs the knife's relief; it was one bright day for doctors when in sixteen, forty-two, Sacramento did discover an appendix all askew; for it soon became the fashion to have that thing taken out, and unless you'd lost your verminform you were a social lout; so the medics carved and snipped along; the proceeds were immense; those who still had their appendix surely felt like 30 cents; now along comes Doctor Abrams and he surely is a yegg for he's trying to destroy the goose that lays the golden egg; he proclaims that all a man must do to cure the dread disease, is to single out a vertebra and give it one good squeeze; if this method of procedure proves to be a real success, this Abrams person sure will be an outcast--that's my guess.--Missoula (Mont.) Missoulian, November 13th.

Stolen Thunder.
Dr. Asa Willard says our jangle on appendicitis being cured through adjusting a vertebrae is original enough, but that Dr. Albert Abrams himself, who heralds through the Associated Press that he has discovered such a way of cure, is about 30 years late in his original discoveries. The Doctor says: "There are scores of people in and about Missoula who have been cured of appendicitis without an operation, during the past 15 years, and thousands of them over the country, and the fundamental part of the treatment they received was adjustment of vertebrae."

Over 30 years ago Dr. A. T. Still the founder of osteopathy, discovered that appendicitis as well as disease of other organs of the body was oftentimes caused by slight displacement of certain vertebrae or strains of the back at various points, which caused pressure to be brought upon nerves emanating from the spine and which supplied the organs. Adjusting these slight displacements and strains allowed the organs to recover. He worked along that line of thought for years and 20 years ago established a school at Kirksville, Mo., which has taught his principles since and there are now but three medical schools in the United States which have as many students and the course of instruction equals that in the best medical colleges. There are now eight osteopathic schools over the country, and the combined attendance of them considerably exceeds the combined attendance of all the homeopathic colleges in the country.

Over 6,000 osteopaths are practicing, some in every state in the Union, and the central principle of their therapy is that the adjustment of vertebrae and control of nerve and blood supply of the organs through properly applied spinal pressure will allow the organs to become normal. This all being true, one might be pardoned for wondering where Dr. Albert Abrams discovered (?) his marvelous discoveries, which he lists under "Spondylotherapy" and is traveling all over the country and giving with much elat to medical societies and Associated Press reporters. Spondylotherapy translated to ordinary English simply means vertebral treatment or spinal treatment. If Dr. Abrams really recently discovered what he is giving out, he must be the original Rip Van Winkle.--Missoula (Mont.) Missoulian, November 7th.

BRANDING OF BUTTER.
A ruling of J. D. Mickle, Oregon Dairy and Food commissioner, recently published, giving his reasons for demanding the proper labeling of butter from farm and dairy. Commissioner Mickle says:

"In explanation of the causes which led to the recent ruling from this office on the branding of 'country butter,' I will say that it is not the purpose of this office to work any hardships upon small dairymen, but on the contrary it is largely for their protection that the ruling was made. Country butter is often had yet it is far from the truth to say that it is all bad, but every roll of good country butter, if unbranded, has forced upon it all the odium that is placed upon the bad butter frequently found in the country store. The brand demanded by this ruling identifies the good as well as the bad and each receives his just reward from the commercial world as soon as his brand or name becomes thoroughly identified with the particular quality of the article. Besides this, the neatness of the label and package has a commercial value that far more than reimburses the farmer for the extra cost of the printing. How would a dealer dispose of a case of creamery butter if it came to him in plain wrappers? It is not unlikely that the loss from the sales of a single case because of the unprinted wrappers, would pay for the printing of a thousand wrappers. Probably the greatest benefit to be derived from the proper branding is the fact that the quality of the butter will improve, hence the consumer, will be willing to pay a better price. When the maker's name follows the butter to the consumer, greater precautions will be taken to see that the quality is good. For instance: Eggs that are stamped and 'warranted or money refunded' are very seldom found bad, while it is unnecessary to state that if the guarantee or name of the farmer is not required, the same care will not be exercised in marketing a good fresh egg."

Forestry Students Leave.
Students of forestry at the Oregon Agricultural college are enlisting in practical work this summer and are gaining experience in the service of the government, or of private timber companies, in patrolling timber holdings. Vacations spent in this way are profitable not only in a financial way but give the student a practical working knowledge of the business.

INTEREST GROWS IN SHOWS.

All Sections of State to be Represented in Exhibits.
Portland, June 10--From all indications Oregon will make a better showing in the eastern land shows this year than ever before. The Oregon State Immigration commission with headquarters at the Commercial club, Portland, is urging commercial bodies of the state, as well as individuals, to make suitable exhibits which will be included in the state display with no expense save that of gathering the specimens and taking them to the depot. They will be shipped from the nearest railroad point to Portland, assembled in a general exhibit and will be sent east by the commission but each organization or grower will receive full credit for the products entered.

A circular is now being issued by the commission giving directions for gathering and shipping the exhibits. Attention is called to the need for careful packing, the selection of only the best specimens and advice and assistance is offered. It is pointed out that the co-operation of all parts of the state is necessary in order that the agricultural wealth of Oregon may be shown to the best advantage and that success may be attained in competition for prizes with the exhibits made by other states. It is suggested that the decision to choose exhibits for this purpose should be made early in the season and that a few choice specimens from each community are much better to show the East what Oregon can grow than a large quantity of sample grains, fruits and vegetables of mediocre quality.

State of Ohio, city of Toledo, Lucas County, Jss.

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of One Hundred Dollars for each and every case of Catarrh that cannot be cured by the use of Hall's Catarrh Cure.

FRANK J. CHENEY.
Sworn to before me and subscribed in my present, this 6th day of December, A. D. 1886.
(Seal) A. W. GLEASON, Notary Public.

Hall's Catarrh Cure is taken internally and acts directly upon the blood and mucous surfaces of the system. Send for testimonials, free. F. J. Cheney & Co., Toledo, O. Sold by all Druggists, 75c. Take Halls, Family Pills for constipation.

DALLAS DELEGATE ELECTED

Mrs. Nellie Tatom to Represent District at Grand Lodge.
At the meeting of the District Circle, Women of Woodcraft, held in Salem on Thursday, Mrs. Nellie Tatom, of Dallas, was elected to represent the district at the grand lodge which meets in Portland next month. There was a spirited contest over this honor, but the Dallas aspirant distanced all contenders, receiving 52 votes to 32 in opposition on the first ballot. The delegates who attended the meeting from Dallas were Nellie Grant, Alta McBeck, Helen Greenwood, Cicely Mitchell, and Nellie Tatom. Emma Jost was elected as one of the delegates but was unable to attend. The next meeting will be held in Dallas.

LIVE STOCK RAISING URGED

Agricultural Expert Advises Farmers on Scientific Culture.
Independence, June 5--(Special) Saturday morning Prof. Thomas Shaw the agricultural expert of the Hill lines spoke to a small crowd of farmers on the subject of scientific farming. He tried to impress the farmers that they should be careful and not raise too much of any thing that was easy to glut the market, such as grain, potatoes or hops, but to put more time in on the raising of live stock for meats, dairying, poultry and poultry products. Prof. Shaw and party were entertained at luncheon at the Beaver hotel at noon after which they were taken back to Salem by auto.

Road to Spend Millions.

The Southern Pacific company will spend millions on its Oregon lines during the next two years, according to a formal statement of planned improvements that has been submitted to the California railroad commission. The company asks for permission to issue bonds to the amount of \$30,000,000 and gives as a reason for the request the number of heavy contemplated investments in this state. Among these are: Electrification of lines in the Willamette valley; reconstruction of the Sheridan-Willamina railroad at a cost of \$2,501,880; Corvallis & Eastern R. R., \$270,580; Pacific Railroad & Navigation Co., \$134,540; Salem, Falls City & Western, \$98,080.

Improved Market Plans.

Improved plans for marketing the fruit crops of the principal northwestern districts have just been completed by the Northern Pacific Fruit Distributors' association and are expected to be of benefit to the fruit growers throughout the northwest group of states. Better arrangements for marketing have been lacking and it is thought the scheme just perfected will supply this need.
